CARINATÆ (PSITTACIFORMES—PASSERIFORMES).

BY
EUGENE W. OATES.

ASSISTED BY
CAPT. SAVILE G. REID.

LONDON:
PRINTED BY ORDER OF THE TRUSTEES.

SOLD BY

LONGMANS & Co., 39 PATERNOSTER ROW, E.C.;
B. QUARITCH, 15 PICCADILLY, W.; DULAU & Co., 37 SOHO SQUARE, W.;
KEGAN PAUL & Co., 43 GERRARD STREET, W.;

AND AT THE

BRITISH MUSEUM (NATURAL HISTORY), CROMWELL ROAD, S.W.
1903.

P R E F A C E.

I REGRET that, owing to the ill-health of Mr. Oates, it has been found necessary to entrust the completion of the 'Catalogue of Birds' Eggs' to other hands.

The manuscript prepared by him was in a forward state, and the Trustees have been fortunate in securing the co-operation of a well-known Ornithologist, Capt. Savile Reid, who has revised the manuscript and the proofs. Capt. Reid has also written the Index to the present volume, and has incorporated in the text references to the specimens recently received by the Museum.

E. RAY LANKESTER,
Director.

British Museum (Natural History),
July 7, 1903.

INTRODUCTION.

IN this third volume, the *Carinatae* are continued from the *Psittaciformes* to the end of the family *Pycnonotidae* of the Order *Passeriformes*, the contents thus exactly corresponding to those of Volumes II. and III. of Dr. Bowdler Sharpe's 'Hand-list of the Genera and Species of Birds.'

The total number of species included is 907, and the number of eggs catalogued 8,474, as shown in the following table :—

CARINATÆ.		
Order.	No. of species.	No. of specimens of eggs.
Psittaciformes	82	332
Coraciiformes	216	1991
Trogones	12	70
Coccyges	57	844
Scansores	14	121
Piciformes	72	894
Eurylæmiformes	7	62
Menuriformes	3	19
Passeriformes	444	4141
Total	<hr/> 907 <hr/>	<hr/> 8,474 <hr/>

May 30, 1903.

SAVILE G. REID.

CATALOGUE
OF
BIRDS' EGGS.

VOL. III.

Sub-Class **CARINATÆ.**

Order **PSITTACIFORMES.**

THE eggs of the Parrots are invariably plain white. The shell is firm and compact in texture and frequently pitted with small pores. Typically the eggs are of an oval shape, but in every series specimens of an elliptical or spheroidal form are to be met with. The shell seldom exhibits any large amount of gloss, and the eggs of the majority of the species are completely devoid of it.

Family **NESTORIDÆ.**

Genus **NESTOR**, *Wagl.*

Nestor notabilis, *Gould.*

Nestor notabilis, *Potts, Tr. N. Z. Inst.* iii. p. 86 (1870); *Buller, Birds New Zeal.* 2nd ed. i. p. 166 (1888); *Salvadori, Cat. Birds B. M.* xx. p. 4 (1891); *Sharpe, Hand-l.* ii. p. 1 (1900).

The eggs of the Kea Parrot measure from 1·63 to 1·72 in length, and from 1·22 to 1·32 in breadth.

- | | |
|----------------------------------|------------------|
| 2. New Zealand. | Crowley Bequest. |
| 4. Waia River, New Zealand, Jan. | Crowley Bequest. |

Nestor meridionalis (*Gm.*).

Nestor meridionalis, *Potts, Tr. N. Z. Inst.* ii. p. 64 (1869); iii. p. 81 (1870); *Buller, Birds New Zeal.* 2nd ed. i. p. 150 (1888); *Salvadori, Cat. Birds B. M.* xx. p. 5 (1891); *Sharpe, Hand-l.* ii. p. 1 (1900).

The eggs of the Kaka Parrot measure from 1·5 to 1·75 in length, and from 1·21 to 1·27 in breadth.

Genus **GLOSSOPSITTACUS**, *Bp.*

Glossopsittacus concinnus (*Shaw*).

Glossopsitta australis, *Gould, Handb. Birds Austr.* ii. p. 100 (1865);
North, Nests & Eggs Austr. Birds, p. 268 (1889).
Glossopsittacus concinnus, *Salvadori, Cat. Birds B. M.* xx. p. 69 (1891);
Sharpe, Hand-l. ii. p. 6 (1900); *Campbell, Nests & Eggs Austr.*
Birds, ii. p. 595 (1901).

Three eggs of the Musk-Lorikeet measure respectively : .97 by .78 ; .93 by .75 ; .9 by .77.

3. Australia.

Crowley Bequest.

Glossopsittacus pusillus (*Shaw*).

Glossopsitta pusilla, *Gould, Handb. Birds Austr.* ii. p. 104 (1865); *North, Nests & Eggs Austr. Birds*, p. 268 (1889).

Glossopsittacus pusillus, *Salvadori, Cat. Birds B. M.* xx. p. 71 (1891); *Nehrke, Kat. Eiersamml.* p. 174 (1899); *Sharpe, Hand-l.* ii. p. 6 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 597 (1901).

The eggs of the Little Lorikeet measure from .74 to .79 in length, and from .64 to .68 in breadth.

3. Dawson River, Queensland, 18th Sept. (*North Coll.*).

Crowley Bequest.

2. Murray River, Victoria, 30th Sept. (*North Coll.*).

Crowley Bequest.

Genus **HYPOCHARMOSYNA**, *Salvad.*

Hypocharmosyna wilhelminæ (*A. B. Meyer*).

Psittanteles wilhelminæ, *Gould, Birds New Guinea*, v. pl. 19 (1876).

Hypocharmosyna wilhelminæ, *Salvadori, Cat. Birds B. M.* xx. p. 73 (1891); *Sharpe, Hand-l.* ii. p. 6 (1900).

The eggs of Wilhelmina's Lorikeet in the Collection measure respectively : .67 by .53 ; .66 by .53.

2. S.E. New Guinea.

Herr Weiske [C].

Family CACATUIDÆ.

Sub-Family CACATUINÆ.

Genus **MICROGLOSSUS**, *Vieill.*

Microglossus aterrimus (*Gm.*).

Microglossum aterrimum, *Gould, Handb. Birds Austr.* ii. p. 27 (1865); *North, Nests & Eggs Austr. Birds*, p. 254 (1889).

Microglossus aterrimus, *Salvadori, Cat. Birds B. M.* xx. p. 103 (1891); *Le Souëf, Ibis*, 1898, p. 56; *Sharpe, Hand-l.* ii. p. 9 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 600 (1901).

An egg of the Palm Cockatoo in the Collection measures 1.86 by 1.48.

1. Cape York, N. Australia.

Gould Coll.

Genus **CALYPTORHYNCHUS**, *Vig. & Horsf.***Calyptorhynchus baudini**, *Vig.*

Calyptorhynchus baudini, *Gould, Handb. Birds Austr.* ii. p. 25 (1865); *North, Nests & Eggs Austr. Birds*, p. 253 (1889); *Salvadori, Cat. Birds B. M.* xx. p. 196 (1891); *Le Souëf, Vict. Nat.* xvi. p. 102 (1899); *Sharpe, Hand-l.* ii. p. 10 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 601 (1901).

An egg of the White-tailed Cockatoo measures 1·9 by 1·43.

1. West Australia (*G. J. Bostock* : Crowley Bequest.
Tristram Coll.).

Calyptorhynchus funereus (*Shaw*).

Calyptorhynchus funereus, *Gould, Handb. Birds Austr.* ii. p. 20 (1865); *North, Nests & Eggs Austr. Birds*, p. 253 (1889); *Salvadori, Cat. Birds B. M.* xx. p. 107 (1891); *Sharpe, Hand-l.* ii. p. 10 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 602 (1901).

Three eggs of the Funereal Cockatoo measure respectively : 1·81 by 1·3; 1·94 by 1·4; 1·99 by 1·37.

1. Dawson River, Queensland, 11th Jan. (*North Coll.*) Crowley Bequest.
2. Port Lincoln, S. Australia (*G. French Angas*). Gould Coll.

Calyptorhynchus stellatus, *Wagl.*

Calyptorhynchus naso, *Gould, Handb. Birds Austr.* ii. p. 17 (1865); *North, Nests & Eggs Austr. Birds*, p. 252 (1889).
Calyptorhynchus stellatus, *Salvadori, Cat. Birds B. M.* xx. p. 111 (1891); *Sharpe, Hand-l.* ii. p. 10 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 608 (1901).

An egg of the Western Black Cockatoo in the Collection measures 1·81 by 1·4.

1. Fink River, Central Australia. Crowley Bequest.

Calyptorhynchus viridis (*Vieill.*).

Calyptorhynchus leachii, *Gould, Handb. Birds Austr.* ii. p. 18 (1865).
Calyptorhynchus viridis, *Salvadori, Cat. Birds B. M.* xx. p. 112 (1891); *Sharpe, Hand-l.* ii. p. 10 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 609 (1901).

An egg of Leach's Cockatoo in the Collection is considerably larger than typical eggs of this species, the dimensions of which are given by Mr. Campbell. It measures 1·82 by 1·32.

1. Wainbangelang, New South Wales, April (*A. J. North*). Crowley Bequest.

Genus **CACATUA**, *Vieill.***Cacatua galerita** (*Lath.*).

Psittacus galeritus, *Thien. Fortpflanz. ges. Vög.* p. 78, tab. xiv. fig. 13 (1845-54).

Cacatua galerita, *Gould, Handb. Birds Austr.* ii. p. 2 (1865); *North, Nests & Eggs Austr. Birds*, p. 250 (1889); *Salvadori, Cat. Birds B. M.* xx. p. 116 (1891); *Nehrke, Kat. Eiersamml.* p. 174 (1899); *Sharpe, Hand-l.* ii. p. 10 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 611 (1901).

The eggs of the Greater Sulphur-crested Cockatoo measure from 1·69 to 2·16 in length, and from 1·14 to 1·37 in breadth.

- | | |
|-------------------------------------------------------------------|-------------------------------------|
| 2. Australia. | Crowley Bequest. |
| 2. Dawson River, Queensland, 16th Sept. (<i>North Coll.</i>). | Crowley Bequest. |
| 1. Deniliquin, New South Wales, 16th Aug. (<i>North Coll.</i>). | Crowley Bequest. |
| 3. South Australia. | Gould Coll. |
| 1. North Queensland, 14th June. | W. Radcliffe Saunders, Esq.
[P.] |

Cacatua sulphurea (*Gm.*).

Cacatua sulphurea, *Salvadori, Cat. Birds B. M.* xx. p. 121 (1891); *Meyer & Wieglesworth, Birds Celebes*, i. p. 128 (1898); *Nehrke, Kat. Eiersamml.* p. 174 (1899); *Sharpe, Hand-l.* ii. p. 10 (1900).

An egg of the Lesser Sulphur-crested Cockatoo in the Collection measures 1·6 by 1·12.

- | | |
|-------------------------------------|------------------|
| 1. Celebes (<i>Nehrke Coll.</i>). | Crowley Bequest. |
|-------------------------------------|------------------|

Cacatua leadbeateri (*Vig.*).

Cacatua leadbeateri, *Gould, Handb. Birds Austr.* ii. p. 5 (1865); *North, Nests & Eggs Austr. Birds*, p. 251, pl. 14. fig. 2 (1889); *Salvadori, Cat. Birds B. M.* xx. p. 123 (1891); *Sharpe, Hand-l.* ii. p. 11 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 612 (1901).

Two eggs of Leadbeater's Cockatoo measure respectively: 1·42 by 1·11; 1·37 by 1·05.

- | | |
|----------------------------------------------------------------|------------------|
| 2. Ivanhoe, New South Wales, 10th Aug. (<i>A. J. North</i>). | Crowley Bequest. |
|----------------------------------------------------------------|------------------|

Cacatua goffini (*Finsch*).

Cacatua goffini, *Salvadori, Cat. Birds B. M.* xx. p. 129 (1891); *Sharpe, Hand-l.* ii. p. 11 (1900).

Two eggs of Goffin's Cockatoo measure respectively: 1·56 by 1·1; 1·52 by 1·17.

- | | |
|--------------------------------------|------------------|
| 1. [Laid in confinement.] | Crowley Bequest. |
| 1. [Laid in confinement, 19th Sept.] | Crowley Bequest. |

Cacatua ducorpsi, *Jacq. & Pucher.*

Cacatua ducorpsi, *Salvadori, Cat. Birds B. M.* xx. p. 129 (1891); *Sharpe, Hand-l.* ii. p. 11 (1900).

Two eggs of Ducorps's Cockatoo measure respectively : 1·47 by 1·1 ; 1·48 by 1·1.

- | | |
|---------------------------|------------------|
| 1. Solomon Islands. | Crowley Bequest. |
| 1. [Laid in confinement.] | Crowley Bequest. |

Cacatua roseicapilla, *Vieill.*

Cacatua roseicapilla, *Gould, Handb. Birds Austr.* ii. p. 8 (1865); *North, Nests & Eggs Austr. Birds*, p. 251, pl. xiv. fig. 3 (1889); *Salvadori, Cat. Birds B. M.* xx. p. 132 (1891); *Sharpe, Hand-l.* ii. p. 11 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 617 (1901).

Three eggs of the Roseate Cockatoo measure respectively : 1·4 by 1 ; 1·36 by 1·1 ; 1·3 by 1.

- | | |
|--------------------------------|------------------|
| 3. New South Wales, 13th Sept. | Crowley Bequest. |
| (<i>A. J. North</i>). | |

Genus **LICMETIS**, *Wagl.***Licmetis pastinator**, *Gould.*

Licmetis pastinator, *Gould, Handb. Birds Austr.* ii. p. 12 (1865); *Salvadori, Cat. Birds B. M.* xx. p. 134 (1891); *Sharpe, Hand-l.* ii. p. 11 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 620 (1901).

Two eggs of the Western Slender-billed Cockatoo measure respectively : 1·69 by 1·2 ; 1·65 by 1·18.

- | | |
|--------------------|-------------|
| 2. West Australia. | Gould Coll. |
|--------------------|-------------|

Sub-Family CALOPSITTACINÆ.

Genus **CALOPSITTACUS**, *Less.***Calopsittacus novæ-hollandiæ** (*Gm.*).

Calopsitta novæ-hollandiæ, *Gould, Handb. Birds Austr.* ii. p. 84 (1865); *North, Nests & Eggs Austr. Birds*, p. 254, pl. xiv. fig. 9 (1889).
Calopsittacus novæ-hollandiæ, *Salvadori, Cat. Birds B. M.* xx. p. 135 (1891); *Nehrke, Kat. Eiersamml.* p. 175 (1899); *Sharpe, Hand-l.* ii. p. 11 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 621 (1901).

The eggs of the Cockateel measure from ·95 to 1·13 in length, and from ·68 to ·83 in breadth.

- | | |
|---------------|-------------------------|
| 1. Australia. | Old Collection. |
| 2. Australia. | E. A. Smith, Esq. [P.]. |

- | | |
|-----------------------------------------------------------------|---------------------|

(<i>A. J. North</i>). | Crowley Bequest. |
| 2. South Australia. | Gould Coll. |
| 1. Tasmania. | Gould Coll. |
| 2. Laid in confinement (Zool. Gardens,
London). | Salvin-Godman Coll. |
| 2. Laid in confinement (Zool. Gardens,
London). | Crowley Bequest. |

Family PSITTACIDÆ.

Sub-Family NASITERININÆ.

Genus **NASITERNA**, *Wagl.*

Nasiterna pusio, *Scl.*

Nasiterna pusio, *Gould, Birds New Guinea*, v. pl. 26 (1878); *Salvadori, Cat. Birds B. M.* xx. p. 144 (1891); *Nehrk. Kat. Eiersamml.* p. 175 (1899); *Sharpe, Hand-l.* ii. p. 12 (1900).

An egg of the Solomon Islands Pigmy Parrot in the Collection measures .62 by .52.

- | | |
|---------------------|-------------------|
| 1. S.E. New Guinea. | Herr Weiske [C.]. |
|---------------------|-------------------|

Sub-Family CONURINÆ.

Genus **ARA**, *Cuvier*.

Ara ararauna (*Linn.*).

Ara ararauna, *Salvadori, Cat. Birds B. M.* xx. p. 152 (1891); *Sclater, Ibis*, 1895, p. 145; *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 564 (1897); *Nehrk. Kat. Eiersamml.* p. 175 (1899); *Sharpe, Hand-l.* ii. p. 13 (1900).

Ara arana, *von Ihering, Rev. Mus. Paulista*, iv. p. 264 (1900).

The eggs of the Blue-and-Yellow Macaw in the Collection measure respectively : 1.6 by 1.25 ; 1.77 by 1.22 ; 1.9 by 1.38.

- | | |
|--------------------------------------------------------------------------------|---------------------------|
| 2. Laid in confinement, Tours, France,
28th July (<i>H.-H. Sharland</i>). | P. L. Sclater, Esq. [P.]. |
| 1. Guiana (<i>Nehrkorn Coll.</i>). | Crowley Bequest. |

Ara militaris (*Linn.*).

Ara militaris, *Salvadori, Cat. Birds B. M.* xx. p. 158 (1891); *Sclater, Ibis*, 1895, p. 145; *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 566 (1897); *Nehrk. Kat. Eiersamml.* p. 175 (1899); *Sharpe, Hand-l.* ii. p. 13 (1900).

The eggs of the Military Macaw in the Collection measure respectively: 1·83 by 1·17; 1·8 by 1·41.

1. Laid in confinement, Tours, France, P. L. Sclater, Esq. [P.]
June (*H. H. Sharland*).
1. Mazatlan, Mexico (*A. Forrer*). Crowley Bequest.

Ara hahni (*Souancé*).

Ara hahni, *Salvadori*, *Cat. Birds B. M.* xx. p. 168 (1891); *Sharpe*, *Hand-l.* ii. p. 14 (1900).

An egg of Hahn's Macaw in the Collection is in a very imperfect condition, and measures about 1·06 by ·87.

1. Laid in confinement, Castle Eden, R. Morton Middleton, Esq.,
Durham. Jun. [P.].

Genus **CONURUS**, *Kuhl*.

Conurus canicularis (*Linn.*).

Conurus canicularis, *Salvadori*, *Cat. Birds B. M.* xx. p. 201 (1891); *Salv. & Godm. Biol. Centr.-Amer.*, *Aves*, ii. p. 577 (1897); *Nehrke. Kat. Eiersamml.* p. 175 (1899); *Sharpe*, *Hand-l.* ii. p. 16 (1900).

Two eggs of the Red and Blue-headed Conure measure respectively: 1·05 by ·83; 1 by ·8.

2. Mazatlan, Mexico (*A. Forrer*). Crowley Bequest.

Genus **CONUOPSIS**, *Salvadori*.

Conuopsis carolinensis (*Linn.*).

Conurus carolinensis, *Baird*, *Brewer & Ridgw. N. Amer. Birds*, ii. p. 587 (1874); *Bendire*, *Life-Hist. N. Amer. Birds*, ii. p. 1, pl. i. fig. 1 (1895).

Conuopsis carolinensis, *Salvadori*, *Cat. Birds B. M.* xx. p. 203 (1891); *Nehrke. Kat. Eiersamml.* p. 175 (1899); *Sharpe*, *Hand-l.* ii. p. 16 (1900).

An egg of the Carolina Paroquet in the Collection measures 1·42 by 1·15.

1. North America (*Nehrke. Coll.*). Crowley Bequest.

Genus **HENICOGNATHUS**, *Gray*.

Henicognathus leptorhynchus (*King*).

Henicognathus leptorhynchus, *Salvadori*, *Cat. Birds B. M.* xx. p. 209 (1891); *Sharpe*, *Hand-l.* ii. p. 16 (1900).

An egg of the Slender-billed Paroquet in the Collection measures 1·19 by ·98.

1. Chile. Crowley Bequest.

Genus **MYOPSITTACUS**, *Bp.***Myopsittacus monachus** (*Bodd.*).

Bolborhynchus monachus, *Dalgleish, Proc. Roy. Phys. Soc. Edin.* viii. p. 84 (1883-5); *Scl. & Huds. Argent. Orn.* ii. p. 43 (1889); *Holland, Ibis*, 1892, p. 203; *Aplin, Ibis*, 1894, p. 192.

Myopsittacus monachus, *Salvadori, Cat. Birds B. M.* xx. p. 231 (1891); *Nehr. Kat. Eiersamml.* p. 175 (1899); *Sharpe, Hand-l.* ii. p. 18 (1900); *von Ihering, Rev. Mus. Paulista*, iv. p. 264 (1900).

The eggs of the Grey-breasted Paroquet measure from 1.03 to 1.14 in length, and from .76 to .85 in breadth.

3. Argentine Republic, Oct.

A. H. Holland, Esq. [C.].

2. South America.

Crowley Bequest.

Genus **BOLBORHYNCHUS**, *Bp.***Bolborhynchus aurifrons** (*Less.*).

Bolborhynchus aurifrons, *Salvadori, Cat. Birds B. M.* xx. p. 236 (1891); *Nehr. Kat. Eiersamml.* p. 176 (1899); *Sharpe, Hand-l.* ii. p. 18 (1900).

An egg of the Golden-fronted Paroquet, laid in confinement, measures 1.1 by .79.

1. Laid in confinement.

Crowley Bequest.

Genus **PSITTACULA**, *Ill.***Psittacula cœlestis** (*Less.*).

Psittacula cœlestis, *Tacz. P. Z. S.* 1877, p. 753; *Salvadori, Cat. Birds B. M.* xx. p. 241 (1891); *Nehr. Kat. Eiersamml.* p. 176 (1899); *Sharpe, Hand-l.* ii. p. 18 (1900).

An egg of the Peruvian Green Paroquet measures .79 by .64.

1. Peru (*Nehrkorn Coll.*).

Crowley Bequest.

Psittacula passerina (*Linn.*).

Psittacula passerina, *Salvadori, Cat. Birds B. M.* xx. p. 245 (1891); *Nehr. Kat. Eiersamml.* p. 176 (1899); *Sharpe, Hand-l.* ii. p. 19 (1900); *von Ihering, Rev. Mus. Paulista*, iv. p. 265 (1900).

The egg of the Passerine Paroquet in the Collection measures .82 by .72.

1. Brazil (*Nehrkorn Coll.*).

Crowley Bequest.

Genus **BROTOGERYS**, *Vig.***Brotogerys tirica** (*Gm.*).

Brotogerys tirica, *Salvadori, Cat. Birds B. M.* xx. p. 254 (1891); *Nehr. Kat. Eiersamml.* p. 176 (1899); *Sharpe, Hand-l.* ii. p. 19 (1900); *von Ihering, Rev. Mus. Paulista*, iv. p. 265 (1900).

An egg of the Long-tailed Green Paroquet measures .97 by .83.

1. Sta. Catherina, Brazil. Crowley Bequest.

Brotogerys chiriri (*Vieill.*).

Brotogerys xanthopterus, *Scl. & Salv. P. Z. S.* 1873, p. 300.

Brotogerys chiriri, *Salvadori, Cat. Birds B. M.* xx. p. 255 (1891); *Sharpe, Hand-l.* ii. p. 19 (1900).

An egg of the Orange-winged Paroquet in the Collection measures .91 by .75.

1. Upper Ucayali River (*E. Bartlett*: Crowley Bequest.
Tristram Coll.).

Brotogerys devillei (*Gray*).

Brotogerys devillei, *Salvadori, Cat. Birds B. M.* xx. p. 261 (1891);
Nehrck. Kat. Eiersamml. p. 176 (1899); *Sharpe, Hand-l.* ii. p. 19
(1900); *von Ihering, Rev. Mus. Paulista*, iv. p. 265 (1900).

The egg of the Orange-throated Paroquet measures .89 by .78.

1. Peru (*Nehrckorn Coll.*). Crowley Bequest.

Brotogerys gustavi, *Berlepsch*.

Brotogerys gustavi, *Salvadori, Cat. Birds B. M.* xx. p. 262 (1891);
Nehrck. Kat. Eiersamml. p. 176 (1899); *Sharpe, Hand-l.* ii. p. 19
(1900).

An egg of Berlepsch's Paroquet measures 1.0 by .75.

1. Peru (*Nehrckorn Coll.*). Crowley Bequest.

Sub-Family PIONINÆ.

Genus **AMAZONA**, *Less.*

Amazona finschi (*Scl.*).

Chrysotis finschi, *Salvadori, Cat. Birds B. M.* xx. p. 298 (1891); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 589 (1897); *Nehrck. Kat. Eiersamml.* p. 176 (1899).

Amazona finschi, *Sharpe, Hand-l.* ii. p. 21 (1900).

The eggs of Finsch's Amazon in the Collection measure respectively: 1.5 by 1.16; 1.45 by 1.15.

2. Mazatlan, Mexico (*A. Forrer*). Crowley Bequest.

Amazona albifrons (*Sparrm.*).

Chrysotis albifrons, *Salvadori, Cat. Birds B. M.* xx. p. 311 (1891); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 593 (1897).

Amazona albifrons, *Sharpe, Hand-l.* ii. p. 22 (1900).

Two eggs of the White-browed Amazon measure respectively : 1·2 by ·88 ; 1·18 by ·9.

2. Mazatlan, Mexico, 27th May Crowley Bequest.
(*A. Forrer*).

Genus **PIONUS**, *Wagl.*

Pionus menstruus (*Linn.*).

Pionus menstruus, *Salvadori*, *Cat. Birds B. M.* xx. p. 322 (1891); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 595 (1897); *Nehrck. Kat. Eiersamml.* p. 176 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 265 (1900); *Sharpe, Hand-l.* ii. p. 22 (1900).

The egg of the Red-vented Parrot in the Collection measures 1·4 by 1·08.

1. Medellin, Antioquia. Crowley Bequest.

Genus **PŒOCEPHALUS**, *Swains.*

Pœocephalus fuscicapillus (*Verr. & Des Murs*).

Pœocephalus fuscicapillus, *Salvadori*, *Cat. Birds B. M.* xx. p. 368 (1891); *Sharpe, Ibis*, 1897, p. 502; *id. Hand-l.* ii. p. 25 (1900).
Green-and-Yellow Parrot, *R. B. & J. D. S. Woodward, Ibis*, 1898, p. 228.

The egg of the Brown-necked Parrot in the Collection measures 1·07 by ·9.

1. Zulu-land, S. Africa. R. B. & J. D. S. Woodward
[C.].

Sub-Family **PSITTACINÆ**.

Genus **PSITTACUS**, *Linn.*

Psittacus erythacus, *Linn.*

Psittacus erythacus, *Salvadori*, *Cat. Birds B. M.* xx. p. 377 (1891); *Nehrck. Kat. Eiersamml.* p. 176 (1899); *Sharpe, Hand-l.* ii. p. 26 (1900).

The eggs of the Grey Parrot measure from 1·39 to 1·5 in length, and from 1·11 to 1·23 in breadth.

- | | |
|-------------------------|-------------------------|
| 2. Laid in confinement. | Old Collection. |
| 3. Laid in confinement. | W. Stringer, Esq. [P.]. |
| 1. Laid in confinement. | G. Ormerod, Esq. [P.]. |
| 1. Laid in confinement. | Crowley Bequest. |

Genus **CORACOPSIS**, *Wagl.*

Coracopsis vaza (*Shaw*).

Coracopsis obscura, *Milne-Edwards & Grandidier, Hist. Nat. Madag., Ois.* i. p. 1, pl. 301. fig. 1 (1879).

- Coracopsis vasa*, *Salvadori, Cat. Birds B. M.* xx. p. 381 (1891); *Nehrke, Kat. Eiersamml.* p. 176 (1899).
Coracopsis vasa, *Sharpe, Hand-l.* ii. p. 27 (1900).

The eggs of the Vasa Parrot measure from 1·75 to 1·86 in length, and from 1·29 to 1·35 in breadth.

7. Madagascar.

Crowley Bequest.

Sub-Family PALÆORNITHINÆ.

Genus **ECLECTUS**, *Wagl.*

Eclectus pectoralis (*P. L. S. Müll.*).

- Eclectus polychlorus*, *Layard, Ibis*, 1880, p. 301.
Eclectus pectoralis, *Salvadori, Cat. Birds B. M.* xx. p. 389 (1891);
Nehrke, Kat. Eiersamml. p. 177 (1899); *Sharpe, Hand-l.* ii. p. 27 (1900).

Two eggs of the Red-sided *Eclectus* measure respectively : 1·55 by 1·2; 1·47 by 1·2.

2. Duke of York Island, June (*E. L.* Crowley Bequest.
Layard: Tristram Coll.).

Eclectus roratus (*P. L. S. Müll.*).

- Eclectus roratus*, *Salvadori, Cat. Birds B. M.* xx. p. 393 (1891); *Nehrke, Kat. Eiersamml.* p. 177 (1899); *Sharpe, Hand-l.* ii. p. 27 (1900).

An egg of the Grand *Eclectus* in the Collection measures 1·45 by 1·2.

1. Moluccas (*Nehrke's Coll.*). Crowley Bequest.

Genus **PALÆORNIS**, *Vig.*

Palæornis indoburmanica, *Hume.*

- Palæornis eupatrius*, *Oates ed. Hume, Nests & Eggs Ind. Birds*, iii. p. 82, part. (1890).
Palæornis indoburmanica, *Salvadori, Cat. Birds B. M.* xx. p. 438 (1891);
Nehrke, Kat. Eiersamml. p. 177 (1899); *Sharpe, Hand-l.* ii. p. 31 (1900).
Palæornis indoburmanicus, *Blanford, Fauna Brit. Ind., Birds*, iii. p. 248 (1900).

The eggs of the Large Burmese Parrakeet measure from 1·3 to 1·4 in length, and from 1 to 1·05 in breadth.

- | | |
|-----------------------------------------------------------|---------------|
| 1. Pegu, 25th Feb. (<i>E. W. Oates</i>). | Hume Coll. |

Pyrrhulopsis personata (Gray).

- Platyercus personatus*, *Layard, P. Z. S.* 1875, p. 425; *Nehr. J. f. O.* 1879, p. 394.
Pyrrhulopsis personata, *Salvadori, Cat. Birds B. M.* xx. p. 497 (1891); *Nehr. Kat. Eiersamml.* p. 177 (1899); *Sharpe, Hand-l.* ii. p. 34 (1900).

Two eggs of the Masked Parrakeet measure respectively: 1·52 by 1·2; 1·52 by 1·21.

2. Fiji Islands, 10th Sept. (*E. L. Crowley Bequest.*
Layard: Tristram Coll.).

Genus **AGAPORNIS**, Selby.**Agapornis roseicollis** (Vieill.).

- Psittacula roseicollis*, *Anderss. Birds Dam. Land*, p. 216 (1872).
Agapornis roseicollis, *Sharpe, ed. Layard's Birds S. Africa*, p. 192 (1875-84); *Salvadori, Cat. Birds B. M.* xx. p. 512 (1891); *Nehr. Kat. Eiersamml.* p. 178 (1899); *Sharpe, Hand-l.* ii. p. 35 (1900).

An egg of the Rosy-faced Love-bird measures ·93 by ·7.

1. Ovampo-land, S. Africa (*C. J. Andersson: Tristram Coll.*) Crowley Bequest.

Genus **LORICULUS**, Blyth.**Loriculus vernalis** (Sparrm.).

- Loriculus vernalis*, *Oates ed. Hume, Nests & Eggs Ind. Birds*, iii. p. 92 (1890); *Salvadori, Cat. Birds B. M.* xx. p. 517 (1891); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 260 (1895); *Sharpe, Hand-l.* ii. p. 35 (1900).

The eggs of the Indian Loricet measure from ·68 to ·78 in length, and from ·58 to ·63 in breadth.

2. Travancore, S. India, 15th March Hume Coll.
 (*F. Bourdillon*).
 3. Thoungyin River, Tenasserim, 24th Hume Coll.
 Feb. (*C. T. Bingham*).
 1. Port Mouat, Andamans, 19th April Hume Coll.
 (*W. Davison*).

Loriculus indicus (Gm.).

- Loriculus indicus*, *Legge, Birds Ceylon*, p. 180 (1878); *Salvadori, Cat. Birds B. M.* xx. p. 526 (1891); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 262 (1895); *Sharpe, Hand-l.* ii. p. 36 (1900).

Two eggs of the Ceylon Loricet measure respectively: ·8 by ·61; ·79 by ·62.

2. Ceylon, 2500 feet, 9th March Crowley Bequest.
 (*A. L. Butler*).

Loriculus galgulus (Linn.).

Loriculus galgulus, *Sharpe*, *P. Z. S.* 1879, p. 325; *Salvadori*, *Cat. Birds B. M.* xx. p. 531 (1891); *Nehrk. Kat. Eiersamml.* p. 178 (1899); *Sharpe*, *Hand-l.* ii. p. 36 (1900).

Three eggs of the Blue-crowned Loriculet measure respectively :
 .7 by .6 ; .7 by .59 ; .7 by .52.

3. Labuan, Borneo.

Sir Hugh Low [C.].

Loriculus stigmatus (S. Müll. & Schl.).

Loriculus stigmatus, *Salvadori*, *Cat. Birds B. M.* xx. p. 535 (1891);
Meyer & Wieglesworth, *Birds Celebes*, i. p. 158 (1898); *Nehrk. Kat. Eiersamml.* p. 178 (1899); *Sharpe*, *Hand-l.* ii. p. 36 (1900).

An egg of the Celebean Loriculet measures .83 by .67.

1. Kurukan, Celebes (*Nehrkorn Coll.*). Crowley Bequest.

Sub-Family PLATYCERCINÆ.**Genus PLATYCERCUS, Vig.*****Platycercus elegans (Gm.).***

Platycercus pennantii, *Gould*, *Handb. Birds Austr.* ii. p. 44 (1865);
North, *Nests & Eggs Austr. Birds*, p. 257, pl. xiv. fig. 6 (1889).
Platycercus elegans, *Salvadori*, *Cat. Birds B. M.* xx. p. 541 (1891);
Nehrk. Kat. Eiersamml. p. 178 (1899); *Sharpe*, *Hand-l.* ii. p. 37
 (1900); *Campbell*, *Nests & Eggs Austr. Birds*, ii. p. 629 (1901).

The eggs of Pennant's Parrakeet in the Collection measure
 respectively: 1.1 by .93; 1.11 by .91.

2. Cape Otway, Victoria (*E. P. Seymour*). Crowley Bequest.

Platycercus adelaidæ, Gould.

Platycercus adelaidensis, *Gould*, *Handb. Birds Austr.* ii. p. 46 (1865).
Platycercus adelaidæ, *Salvadori*, *Cat. Birds B. M.* xx. p. 543 (1891);
Sharpe, *Hand-l.* ii. p. 37 (1900); *Campbell*, *Nests & Eggs Austr. Birds*, ii. p. 631 (1901).

Two eggs of the Adelaide Parrakeet measure respectively : 1.12
 by .9 ; 1.08 by .91.

2. South Australia.

Gould Coll.

Platycercus flaviventris (Temm.).

Platycercus flaviventris, *Gould*, *Handb. Birds Austr.* ii. p. 48 (1865);
North, *Nests & Eggs Austr. Birds*, p. 258 (1889); *Salvadori*, *Cat. Birds B. M.* xx. p. 545 (1891); *Nehrk. Kat. Eiersamml.* p. 178
 (1899); *Sharpe*, *Hand-l.* ii. p. 37 (1900); *Campbell*, *Nests & Eggs Austr. Birds*, ii. p. 633 (1901).

Four eggs of the Yellow-bellied Parrakeet measure respectively :
1·18 by ·93 ; 1·07 by ·85 ; 1·12 by ·85 ; 1·03 by ·88.

Genus *NEOPHEMA*, Salvadori.

***Neophema venusta* (Temm.).**

Euphema chrysostoma, *Gould, Handb. Birds Austr.* ii. p. 71 (1865).
Euphema venusta, *North, Nests & Eggs Austr. Birds*, p. 262 (1889).
Neophema venusta, *Salvadori, Cat. Birds B. M.* xx. p. 570 (1891);
Nehrke, Kat. Eiersamml. p. 178 (1899); *Sharpe, Hand-l.* ii. p. 39 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 649 (1901).

The eggs of the Blue-winged Grass-Parrakeet measure from .9 to .94 in length, and from .73 to .79 in breadth.

5. Terrick Terrick, Victoria (*E. P. Seymour*). Crowley Bequest.

Neophema elegans (Gould).

Euphema elegans, Gould, *Handb. Birds Austr.* ii. p. 73 (1865); *North, Nests & Eggs Austr. Birds*, p. 263 (1889).

Neophema elegans, Salvadori, *Cat. Birds B. M.* xx. p. 572 (1891); *Nehrck. Kat. Eiersamml.* p. 178 (1899); *Sharpe, Hand-l.* ii. p. 39 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 651 (1901).

Four eggs of the Elegant Grass-Parrakeet measure respectively : .89 by .69; .9 by .7; .85 by .72; .86 by .72.

2. Australia.

Gould Coll.

2. New South Wales.

Crowley Bequest.

Neophema pulchella (Shaw).

Euphema pulchella, Gould, *Handb. Birds Austr.* ii. p. 77 (1865); *North, Nests & Eggs Austr. Birds*, p. 263 (1889).

Neophema pulchella, Salvadori, *Cat. Birds B. M.* xx. p. 575 (1891); *Nehrck. Kat. Eiersamml.* p. 179 (1899); *Sharpe, Hand-l.* ii. p. 39 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 654 (1901).

The eggs of the Turquoise Grass-Parrakeet in the Collection measure respectively : .91 by .78; .93 by .73; .9 by .76.

3. Australia.

Crowley Bequest.

Neophema splendida (Gould).

Euphema splendida, Gould, *Handb. Birds Austr.* ii. p. 79 (1865).

Neophema splendida, Salvadori, *Cat. Birds B. M.* xx. p. 576 (1891); *Sharpe, Hand-l.* ii. p. 39 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 654 (1901).

Two eggs of the Splendid Grass-Parrakeet measure respectively : .9 by .67; .89 by .67.

2. South Australia.

Gould Coll.

Genus CYANORHAMPHUS, Bp.**Cyanorhamphus novæ-zealandiæ (Sparrm.).**

Platycercus novæ-zealandiæ, Buller, *Birds New Zeal.* 2nd ed. i. p. 137 (1888).

Cyanorhamphus novæ-zealandiæ, Salvadori, *Cat. Birds B. M.* xx. p. 581 (1891); *Nehrck. Kat. Eiersamml.* p. 179 (1899); *Sharpe, Hand-l.* ii. p. 40 (1901).

The eggs of the Red-fronted Parrakeet in the Collection measure respectively : 1 by .83; .98 by .83; .99 by .85; 1.05 by .92; 1.1 by .9; 1.09 by .95.

2. Milton, Otago, New Zealand

Sub-Order **BUCEROTES**.

The eggs of the Hornbills are of an elliptical or regular oval shape. The shell is rough in texture, granulated, frequently covered with small pimples and rugosities, and pitted with pores. When first laid they are pure white and slightly glossy, but as incubation proceeds the gloss disappears and the shell becomes of an earth-colour or dark brown.

Genus **DICHOCEROS**, *Gloger*.**Dichoceros bicornis** (*Linn.*).

Dichoceros bicornis, *Elliot, Mon. Bucer.* text to pl. vi. (1877); *Oates, Birds Brit. Burm.* ii. p. 87 (1883); *Oates ed. Hume, Nests & Eggs Ind. Birds*, iii. p. 68 (1890); *Grant, Cat. Birds B. | 1. Lower Albany, S. Africa. | Dr. S. Schönland [P.]. |
|-----------------------------|------------------------|

Sub-Order **UPUPÆ**.

The eggs of the Hoopoes are devoid of markings and are subject to much variation of colour. When fresh the majority are of a bluish-white or pale greenish-blue colour, but some are of a pale olive-green, olive-brown, or grey colour. They exhibit a small amount of gloss. The shell is smooth and pitted with very minute pores, and is often marked with small white specks, caused by the disintegration of the surface of the shell.

The eggs are typically of a narrow oval form, a good deal pointed at the smaller end, and frequently at the broad end as well.

Family **UPUPIDÆ**.

Genus **UPUPA**, *Linn.*

Upupa epops, *Linn.*

- Upupa epops*, *Thien. Fortpflanz. ges. Vög.* p. 110, tab. xv. 10, a-c (nec 12, a-c) (1845-54); *Baedeker, Eier. Eur. Vög.* tab. 50. fig. 3 (1855-63); *Hewitson, Eggs of Brit. Birds*, i. p. 249, pl. lxiii. fig. iii (1865); *Dresser, Birds Eur.* v. p. 179 (1871); *Saunders, Ibis*, 1871, p. 67; *Danford, Ibis*, 1878, p. 7; *Seebohm, Brit. Birds*, ii. p. 334, pl. 15 (1884); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 337 (1890); *Salvin, Cat. Birds B. M.* xvi. p. 4 (1892); *Seebohm, Eggs of Brit. Birds*, p. 167, pl. 48. figs. 1 & 4 (1896); *Sharpe, Hand-l.* ii. p. 70 (1900).

The eggs of the Common Hoopoe measure from .88 to 1.15 in length, and from .63 to .77 in breadth.

Upupa africana, Bechst.

Upupa africana, *Sharpe, ed. Layard's B. S. Afr.* pp. 134, 808 (1875-84); *Salvin, Cat. Birds B. M.* xvi. p. 14 (1892); *Nehr. Kat. Eiersamml.* p. 152 (1899); *Sharpe, Hand-l.* ii. p. 70 (1900).

An egg of the African Hoopoe measures 1.5 by .73 inch.

1. Grahamstown, Dec. W. Radcliffe Saunders, Esq. [P.].

Sub-Order MEROPES.

Family MEROPIDÆ.

The eggs of the Bee-eaters are plain white and of a rounded shape, many being perfectly spherical. The shell is very smooth and extremely glossy.

Genus *DICROCERCUS*, Cab. & Heine.

Dicrocercus hirundineus (Licht.).

Dicrocercus hirundineus, *Anderss. Birds Dam-land*, p. 63 (1872); *Sharpe, ed. Layard's Birds S. Africa*, p. 101 (1875-84).
Dicrocercus hirundineus, *Dresser, Mon. Merop.* p. 99 (1884); *Sharpe, Cat. Birds B. M.* xvii. p. 43 (1892); *id. Hand-l.* ii. p. 72 (1900); *Nehr. Kat. Eiersamml.* p. 159 (1899).

Two eggs of the Swallow-tailed Bee-eater in the Collection measure respectively: .8 by .69; .82 by .7.

2. Omaruru, Damara-land, 31st Oct. Crowley Bequest.
(*C. J. Andersson : Tristram Coll.*).

Genus **MELITTOPHAGUS**, *Boie*.

Melittophagus swinhoei (*Hume*).

- Merops swinhoei*, *Legge, Birds Ceylon*, p. 312 (1878).
Melittophagus quinticolor, *Dresser, Mon. Merop.* p. 115 (1885); *Oates ed. Hume, Nests & Eggs Ind. Birds*, iii. p. 67 (1890).
Melittophagus swinhoei, *Sharpe, Cat. Birds B. M.* xvii. p. 55 (1892); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 114 (1895); *Sharpe, Hand-l.* ii. p. 73 (1900).

The eggs of the Chestnut-headed Bee-eater measure from .77 to .92 in length, and from .72 to .81 in breadth.

10. Nilghiri Hills, S. India, 26th March. Hume Coll.

Two eggs of the Cuban Tody measure respectively : ·64 by ·51; ·68 by ·52.

2. Cuba (*Nehrkorn Coll.*). Crowley Bequest.

Sub-Order CAPRIMULGI.

The eggs of the Nightjars are typically of a true elliptical shape, the two ends being precisely similar in contour; in some cases, however, one end is very slightly compressed. The shell is smooth and generally glossy.

With few exceptions the eggs of these birds are double-spotted. In a few instances they are plain white, and occasionally they are single-spotted. The eggs of many Nightjars bear a close resemblance to those of the Sand-Grouse.

Family CAPRIMULGIDÆ.

Sub-Family NYCTIBIINÆ.

Genus **NYCTIBIUS**, Vieill.**Nyctibius jamaicensis** (Gm.).

(Plate I. fig. 13.)

Nyctibius jamaicensis, Gosse, *Birds Jamaica*, p. 41 (1847); *Hartert, Cat. Birds B. M.* xvi. p. 625 (1892); *Goëldi, Ibis*, 1896, p. 299, figs. 1 & 2; *Sharpe, Hand-l.* ii. p. 79 (1900); *von Ihering, Rev. Mus. Paulista*, iv. p. 257 (1900).

An egg of the Jamaica Nightjar presented to the Museum by Dr. Goëldi is a perfect ellipse in shape and almost devoid of gloss. It is white, sparingly marked with spots and small blotches of chocolate-brown and violet-grey. It measures 1.62 by 1.16.

1. Colonia Alpina, Rio de Janeiro, Dr. E. A. Goëldi [P.].
25th Nov.

Sub-Family CAPRIMULGINÆ.

Genus **CHORDEILES**, Swains.**Chordeiles virginianus** (Gm.).

Caprimulgus virginianus, Thien. *Fortpflanz. ges. Vög.* tab. xlii. fig. 17 (1845-54).

Chordeiles virginianus, Brewer, *N. Amer. Ool.* pt. i. p. 87, pl. v. figs. 59-61 (1856); *Hartert, Cat. Birds B. M.* xvi. p. 610 (1892); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 396 (1894); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 163, pl. iii. figs. 1-3 (1895); *von Ihering, Rev. Mus. Paulista*, iv. p. 257 (1900); *Sharpe, Hand-l.* ii. p. 79 (1900).

Chordeiles popetue, var. *popetue*, Baird, *Brewer & Ridgw. N. Amer. Birds*, ii. p. 401 (1874).

The eggs of the American Night-Hawk are of a greyish-white or cream-colour, densely marked with lavender-grey and various shades of brown. Some are speckled, others spotted and blotched, and others again are clouded and marbled. They are moderately glossy, and measure from 1.15 to 1.3 in length, and from .85 to .9 in breadth.

Stenopsis ruficervix, *Scl.*

Stenopsis ruficervix, *Scl. & Salv. P. Z. S.* 1879, p. 531; *Hartert, Cat. Birds B. M.* xvi. p. 584 (1892); *Nehrk. Kat. Eiersamml.* p. 156 (1899); *Sharpe, Hand-l.* ii. p. 84 (1900).

The eggs of the American Red-necked Nightjar are elliptical or broadly oval in shape, and are almost devoid of all gloss. The specimens in the Collection are of a plain white colour, but Mr. Salmon states that the eggs of this species are sometimes of a pale red colour with small spots. Four examples measure respectively: 1.1 by .82; 1.06 by .75; 1.1 by .79; 1.08 by .77.

Genus **CAPRIMULGUS**, Linn.**Caprimulgus nigrescens**, Cab.

Antrostomus nigrescens, *Salv. This*, 1885, p. 438.

Caprimulgus nigrescens, *Hartert, Cat. Birds B. M.* xvi. p. 572 (1892); *Nehrke, Kat. Eiersamml.* p. 156 (1899); *von Ihering, Rev. Mus Paulista*, iv. p. 256 (1900); *Sharpe, Hand-l.* ii. p. 84 (1900).

The eggs of the Dusky Nightjar in the Collection are moderately glossy and of a pale pinkish-buff colour, marked with clear, well-defined spots and blotches of dark chocolate-brown and underlying lavender-grey. They measure respectively: .98 by .74; 1.05 by .73.

2. British Guiana (*H. Whitely*). Crowley Bequest.

Caprimulgus vociferus, Wils.

Caprimulgus vociferus, *Thien. Fortpflanz. ges. Vög.* tab. xlii. fig. 18 a, b (1845-54); *Hartert, Cat. Birds B. M.* xvi. p. 568 (1892); *Nehrke, Kat. Eiersamml.* p. 156 (1899); *Sharpe, Hand-l.* ii. p. 84 (1900).

Antrostomus vociferus, *Brewer, N. Amer. Ool.* pt. i. p. 84, pl. v. fig. 57 (1856); *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 413 (1874); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 146, pl. i. figs. 10 & 11 (1895).

The eggs of the Whip-poor-Will are of a creamy-white colour, spotted and blotched with dark lavender-grey. Some specimens, however, are also spotted with pale rufous and various shades of brown. They have a moderate amount of gloss, and measure from 1.04 to 1.18 in length, and from .76 to .86 in breadth.

Caprimulgus monticola, *Hartert, Cat. Birds B. M.* xvi. p. 547 (1892) *Blanf. Fauna Brit. Ind., Birds*, iii. p. 185 (1895); *Rattray, Journ. Bomb. Nat. Hist. Soc.* xii. p. 343 (1899); *Sharpe, Hand-l.* ii. p. 86 (1900).

The eggs of Franklin's Nightjar are of much the same type as those of *C. asiaticus*. An egg taken by Mr. Davison and another by Mr. Blewitt are salmon-pink, blotched and smeared with reddish brown and underlying lavender-grey. Two other specimens are of a pinkish cream-colour, with large underlying smudges of lavender-grey and some small spots and blotches of pale reddish brown. The

specimens are glossy, and measure respectively: 1·18 by ·89; 1·22 by ·88; 1·15 by ·8; 1·2 by ·87.

Caprimulgus macrurus, *apud Blanf. Fauna Brit. Ind., Birds*, iii. p. 188, part. (1895).

The eggs of the Bengal Nightjar are of three types. In one the eggs resemble those of *C. macrurus*. In another they also resemble the eggs of *C. macrurus*, but they have the ground-colour decidedly tinged with salmon-pink. In a third type the ground-colour is greyish white, and this is finely spotted and blotched with lavender-grey and very pale brown, closely resembling the common type of the egg of *C. europæus*. Specimens measure from 1·1 to 1·3 in length, and from ·88 to ·92 in breadth.

Caprimulgus atripennis, Jerd.

Caprimulgus atripennis, *Legge, Birds Ceylon*, p. 340 (1878); *Barnes, Journ. Bomb. Nat. Hist. Soc.* iv. p. 7, pl. —. fig. 111 (1889); *Oates ed. Hume, Nests & Eggs Ind. Birds*, iii. p. 47 (1890); *Hartert, Cat. Birds B. M.* xvi. p. 542 (1892); *Sharpe, Hand-l.* ii. p. 87 (1900).
Caprimulgus macrurus (*nec Horsf.*), *Blanf. Fauna Brit. Ind., Birds*, iii. p. 188 (1895).

The eggs of the South-Indian Nightjar, from the Nilghiri Hills, resemble pale eggs of *C. asiaticus*. They are very glossy, and measure respectively: 1·12 by ·7; 1 by ·73.

Eggs of this species taken in Ceylon by Mr. A. L. Butler are, however, of quite a different type from the above. They have a pale buff ground, and are sparingly marked with well-defined spots and small blotches of purplish brown and lavender. Four examples measure respectively: 1·19 by ·85; 1·13 by ·87; 1·12 by ·81; 1·2 by ·89.

Caprimulgus andamanicus, Hume.

(Plate I. fig. 11.)

Caprimulgus andamanicus, *Oates ed Hume, Nests & Eggs Ind. Birds*, iii. p. 46 (1890); *Hartert, Cat. Birds B. M.* xvi. p. 543 (1892); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 190 (1895); *Sharpe, Hand-l.* ii. p. 87 (1900).

The eggs of the Andaman Nightjar in the Collection are dissimilar. The ground-colour of both is a pale salmon-pink. In one specimen, however, the markings consist of clouds of pale purplish pink, chiefly disposed about the broad end, and a few inconspicuous blotches of underlying grey. In the other, the ground is blotched, mottled, and also marked with irregular lines and scrawls of pale purplish pink of two shades, no trace of underlying markings being visible. They measure respectively: 1·11 by ·85; 1·05 by ·83.

Caprimulgus europæus, Linn.

Caprimulgus europæus, *Thien. Fortpflanz. ges. Vög.* tab. xlii. fig. 15, *a-c* (1845-54); *Baedeker, Eter Eur. Vög.* tab. 50. fig. 8 (1855-63); *Hewitson, Eggs of Brit. Birds*, i. p. 270, pl. lxxvi. (1856); *Dresser, Birds Eur.* iv. p. 621 (1875); *Seebohm, Brit. Birds*, ii. p. 309, pl. 17 (1884); *Whitehead, Ibis*, 1885, p. 27; *Hartert, Cat. Birds B. M.* xvi. p. 526 (1892); *Seebohm, Eggs of Brit. Birds*, p. 163, pl. 47. figs. 4, 5, & 6 (1896); *Sharpe, Hand-l.* ii. p. 87 (1900).

The majority of the eggs of the Common Nightjar have a white or pale ashy-white ground-colour, and are covered with blotches, veins, smears, and clouds of ashy brown, yellowish brown, or pale rufous, together with underlying markings of lavender-grey. On some eggs the markings almost entirely consist of well-defined blotches; on others indistinct shapeless clouds and smears, intermingled with veins and lines. The underlying markings are always very large and prominent.

Eggs of another type have the ground cream-coloured or of a pale salmon-pink colour, with the markings of the same character as those described above.

Specimens measure from 1.1 to 1.4 in length, and from .8 to .95 in breadth.

Caprimulgus unwini, Hume.

(Plate I. fig. 10.)

Caprimulgus unwini, Oates ed. Hume, *Nests & Eggs Ind. Birds*, iii. p. 47 (1890); *Hartert, Cat. Birds B. M.* xvi. p. 528 (1892); *Sharpe, Hand-l.* ii. p. 87 (1900).

The eggs of Unwin's Nightjar do not appear to differ in any respect from those of *C. europæus* of the common type. Two examples measure respectively: 1·22 by ·85; 1·13 by ·83.

1. Murree, N.W. Himalayas, 5th May (<i>C. H. T. Marshall</i>).	Hume Coll.
1. Murree (<i>C. H. T. M.</i>).	Hume Coll.

Caprimulgus ruficollis, Temm.

Caprimulgus ruficollis, Thien. *Fortpflanz. ges. Vög.* tab. xlii. fig. 16 (1845-54); *Baedecker, Eier Eur. Vög.* tab. 50. fig. 9 (1855-63); *Saunders, Ibis*, 1871, p. 67; *Dresser, Birds Eur.* iv. p. 633 (1874); *Bree, Birds Eur.* 2nd ed. iv. p. 100, pl. — (1875); *Hartert, Cat. Birds B. M.* xvi. p. 531 (1892); *Seebohm, Eggs of Brit. Birds*, p. 165, pl. 47. figs. 1 & 3 (1896); *Sharpe, Hand-l.* ii. p. 87 (1900).

The eggs of the Red-necked Nightjar are not separable from those of *C. europæus*. They measure from 1·22 to 1·3 in length, and from ·88 to ·91 in breadth.

Caprimulgus rufigena, Smith.

Caprimulgus rufigena, Ayres, *Ibis*, 1869, p. 289; Sharpe, ed. *Layard's Birds S. Africa*, p. 85 (1875-84); Hartert, *Cat. Birds B. M.* xvi. p. 532 (1892); *Nehr. Kat. Eiersamm.* p. 155 (1899); Sharpe, *Hand-l.* ii. p. 88 (1900).

An egg of the Rufous-cheeked Nightjar taken by Mr. Ayres is of a pinkish-buff colour, distinctly spotted and, in a minor degree, blotched with lilac-red and lavender. It measures 1·08 by ·78.

- | | |
|--------------------------------------------------------------------|------------------|
| 1. Transvaal, Oct. (T. Ayres: <i>Tris-</i>

Caprimulgus frænatus, Salvad.

Caprimulgus frænatus, Hartert, *Cat. Birds B. M.* xvi. p. 533 (1892); *id. Tierreich*, Lief. i. *Caprimulgidae*, p. 59 (1897); Sharpe, *Hand-l.* ii. p. 88 (1900); Hinde, *Ibis*, 1900, p. 499.

The eggs of Salvadori's Nightjar are cream-coloured, with underlying blotches of lavender-grey, these blotches being much more pronounced on one of the eggs than on the other, the same egg also having some surface-blotches of pale brown, which are present, but very faintly indicated, in the second. The measurements are 1·20 by ·82; 1·14 by ·82.

Sub-Order **TROCHILI.**Family **TROCHILIDÆ.**

The eggs of the Humming-birds are typically of an elongated cylindrical shape, with the two ends quite similar, but some examples are of an elongated oval form. They are plain white and entirely devoid of gloss.

Genus **THRENETES**, *Gould*.**Threnetes ruckeri** (*Bourc.*).

Glaucis ruckeri, *Gould, Mon. Troch.* i. pl. 11 (1851).

Threnetes ruckeri, *Salv. Cat. Birds B. M.* xvi. p. 265 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 316 (1892); *Nehr. Kat. Eiersamml.* p. 153 (1899); *Sharpe, Hand-l.* ii. p. 98 (1900).

An egg of Rucker's Hermit measures $\cdot 57$ by $\cdot 37$.

1. Chiriqui, Panama (*Nehr. Korn Coll.*). Crowley Bequest.

Genus **GLAUCIS**, *Boie*.**Glaucis hirsuta** (*Gm.*).

Glaucis hirsuta, *Gould, Mon. Troch.* i. pl. 5 (1858); *Salv. Cat. Birds B. M.* xvi. p. 41 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 255 (1892); *Nehr. Kat. Eiersamml.* p. 152 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 252 (1900); *Sharpe, Hand-l.* ii. p. 98 (1900).

The eggs of the Hairy Hermit in the Collection measure respectively: $\cdot 6$ by $\cdot 38$; $\cdot 59$ by $\cdot 37$; $\cdot 61$ by $\cdot 38$.

2. Grenada, W. Indies (*J. G. Wells*). Crowley Bequest.
1. [S. America.] Crowley Bequest.

Genus **PHAËTHORNIS**, *Swains.***Phaëthornis eurynome** (*Less.*).

Phaëthornis eurynome, *Gould, Mon. Troch.* i. pl. 16 (1849); *Salv. Cat. Birds B. M.* xvi. p. 276 (1892); *Nehr. Kat. Eiersamml.* p. 153 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 253 (1900); *Sharpe, Hand-l.* ii. p. 98 (1900).

An egg of Lesson's Hermit measures $\cdot 57$ by $\cdot 34$.

1. [Brazil.] Crowley Bequest.

Phaëthornis augusti (*Bourc.*).

Phaëthornis augusti, *Gould, Mon. Troch.* i. pl. 29 (1854); *Salv. Cat. Birds B. M.* xvi. p. 277 (1892); *Nehr. Kat. Eiersamml.* p. 153 (1899); *Sharpe, Hand-l.* ii. p. 99 (1900).

The eggs of Salle's Hermit measure, on the average, $\cdot 55$ by $\cdot 37$.

10. Venezuela (*Gugenheimer*). Crowley Bequest.

Genus **CAMPYLOPTERUS**, *Swains.***Campylopterus hemileucurus** (*Licht.*).

Campylopterus delatirii, *Gould, Mon. Troch.* ii. pl. 45 (1855).

Campylopterus hemileucurus, *Salv. Cat. Birds B. M.* xvi. p. 291 (1892);
id. & *Godm. Biol. Centr.-Amer., Aves*, ii. p. 323 (1892); *Sharpe, Hand-l.* ii. p. 102 (1900).

The eggs of Delattre's Sabre-wing in the Collection measure respectively: .67 by .45; .65 by .46.

2. Costa Rica, 3rd July.

C. F. Underwood, Esq. [C.].

Genus **PATAGONA**, *Gray.***Patagona gigas** (*Vieill.*).

Patagona gigas, *Gould, Mon. Troch.* iv. pl. 232 (1855); *Scl. & Huds. Argent. Orn.* ii. p. 4 (1889); *Salv. Cat. Birds B. M.* xvi. p. 348 (1892); *James, New List Chilean Birds*, p. 5 (1892); *Sharpe, Hand-l.* ii. p. 103 (1900).

The eggs of the Giant Humming-bird measure from .76 to .82 in length, by .5 in breadth.

1. Central Chile, Jan.

Berkeley James Coll.

2. Central Chile, Nov.

Berkeley James Coll.

2. Central Chile, Dec.

Berkeley James Coll.

Genus **SAUCEROTTEA**, *Bp.***Saucerottea warszewiczi** (*Cab. & Heine*).

Amazilia warszewiczi, *Sharpe in Gould's Mon. Troch., Suppl.* (1887);
Salv. Cat. Birds B. M. xvi. p. 222 (1892); *Nehrk. Kat. Eiersamml.*
 p. 152 (1899).

Saucerottea warszewiczi, *Sharpe, Hand-l.* ii. p. 107 (1900).

The average dimensions of five eggs of Warszewicz's Amazili are .57 by .36.

5. Venezuela (*Gugenheimer*).

Crowley Bequest.

Saucerottea sophiæ (*Bourc. & Muls.*).

Erythrionota sophiæ, *Gould, Mon. Troch.* v. pl. 322 (1861).

Amazilia sophiæ, *Salv. Cat. Birds B. M.* xvi. p. 224 (1892); *id.* &
Godm. Biol. Centr.-Amer., Aves, ii. p. 303 (1892).

Saucerottea sophiæ, *Sharpe, Hand-l.* ii. p. 107 (1900).

The eggs of Sophia's Amazili in the Collection measure respectively: .53 by .35; .53 by .36.

2. Azahar de Cartago, Costa Rica,
 1st Dec. (*C. F. Underwood*).

Crowley Bequest.

Saucerottea erythronota (*Less.*).

Erythronota antiqua, *Gould, Mon. Troch.* v. pl. 316 (1860).

Amazilia erythronota, *Salv. Cat. Birds B. M.* xvi. p. 225 (1892).

Saucerottea erythronota, *Sharpe, Hand-l.* ii. p. 107 (1900).

The egg of the Trinidad Amazili measures .48 by .31.

1. [Trinidad.]

Crowley Bequest.

Saucerottea feliciæ (*Less.*).

Erythronota feliciæ, *Gould, Mon. Troch.* v. pl. 317 (1849).

Amazilia feliciæ, *Salv. Cat. Birds B. M.* xvi. p. 226 (1892); *Nehr. Kat.*

Eiersamml. p. 152 (1899).

Saucerottea feliciæ, *Sharpe, Hand-l.* ii. p. 107 (1900).

An egg of Felicia's Amazili measures .57 by .37.

1. Venezuela (*Nehr. Korn Coll.*).

Crowley Bequest.

Genus **AMAZILIA**, *Reichenb.***Amazilia tzacatl** (*La Llave*).

Amazilia riefferi, *Gould, Mon. Troch.* v. pl. 311 (1860); *Sci. & Salv.*

P. Z. S. 1879, p. 530; *Salv. Cat. Birds B. M.* xvi. p. 216 (1892);

id. & Godm. Biol. Centr.-Amer., Aves, ii. p. 300 (1892).

Amazilia tzacatl, *Sharpe, Hand-l.* ii. p. 108 (1900).

Two eggs of Rieffer's Amazili measure respectively : .53 by .36; .52 by .35.

2. Antioquia, U.S. Colombia (*T. K. Salvin-Godman Coll.*

Salmon).

Amazilia guatemalensis (*Gould*).

Cyanomyia cyanocephala, *Salv. & Sci. Ibis*, 1860, p. 39.

Cyanomyia guatemalensis, *Salv. Cat. Birds B. M.* xvi. p. 198 (1892);

id. & Godm. Biol. Centr.-Amer., Aves, ii. p. 291 (1892).

Amazilia guatemalensis, *Sharpe, Hand-l.* ii. p. 109 (1900).

Two eggs of the Guatemala Amazili measure respectively : .56 by .37; .57 by .35.

2. Dueñas, Guatemala (*O. Salvin*). Salvin-Godman Coll.

Genus **HYLOCHARIS**, *Boie*.**Hylocharis leucotis** (*Vieill.*).

Heliopædica melanotis, *Gould, Mon. Troch.* ii. pl. 64 (1858).

Basilinna leucotis, *Salv. Cat. Birds B. M.* xvi. p. 252 (1892); *id. &*

Godm. Biol. Centr.-Amer., Aves, ii. p. 312 (1892); *Bendire, Life-*

Hist. N. Amer. Birds, ii. p. 227 (1895).

Hylocharis leucotis, *Sharpe, Hand-l.* ii. p. 110 (1900).

An egg of the White-eared Humming-bird measures .49 by .3.

1. Mazatlan, Mexico (*Tristram Coll.*). Crowley Bequest.

Genus **CHLOROSTILBON**, *Gould*.**Chlorostilbon gibsoni** (*Fraser*).

Chlorostilbon angustipennis, *Gould, Mon. Troch.* v. pl. 353 (1861); *Sci. & Salv. P. Z. S.* 1879, p. 531; *Salv. Cat. Birds B. M.* xvi. p. 52 (1892); *Nehr. Kat. Eiersamml.* p. 152 (1899).
Chlorostilbon gibsoni, *Sharpe, Hand-l.* ii. p. 112 (1900).

The eggs of the Colombian Emerald in the Collection measure respectively: .45 by .29; .49 by .29; .52 by .34.

2. Medellin, Antioquia, U.S. Colombia Salvin-Godman Coll.
 (*T. K. Salmon*).
1. U.S. Colombia (*Nehr. Korn Coll.*). Crowley Bequest.

Chlorostilbon stenura (*Cab. & Heine*).

Panychlora stenura, *Sharpe in Gould's Mon. Troch., Suppl.* pl. 58 (1883);
Salv. Cat. Birds B. M. xvi. p. 71 (1892); *Nehr. Kat. Eiersamml.*
 p. 152 (1899).
Chlorostilbon stenura, *Sharpe, Hand-l.* ii. p. 114 (1900).

Four eggs of the Venezuela Emerald measure respectively: .52 by .38; .51 by .38; .53 by .34; .49 by .32.

4. Venezuela (*Gugenheimer*). Crowley Bequest.

Genus **RICORDIA**, *Reichenb.***Ricordia elegans** (*Vieill.*).

Sporadinus elegans, *Gould, Mon. Troch.* v. pl. 347 (1859); *Salv. Cat. Birds B. M.* xvi. p. 59 (1892).
Ricordia elegans, *Sharpe, Hand-l.* ii. p. 114 (1900).

An egg of the St. Domingo Humming-bird measures .45 by .3.

1. St. Domingo (*Tristram Coll.*). Crowley Bequest.

Genus **THALURANIA**, *Gould*.**Thalurania glaucopsis** (*Gm.*).

Thalurania glaucopsis, *Gould, Mon. Troch.* ii. pl. 99 (1856); *Salv. Cat. Birds B. M.* xvi. p. 77 (1892); *Nehr. Kat. Eiersamml.* p. 152 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 252 (1900); *Sharpe, Hand-l.* ii. p. 115 (1900).

Four eggs of the Brazilian Wood-nymph measure respectively: .5 by .31; .5 by .32; .49 by .3; .48 by .31.

2. S.E. Brazil (*Tristram Coll.*). Crowley Bequest.
2. S. Brazil. W. Radcliffe Saunders, Esq. [P.].

Thalurania colombica (*Bourc.*).

Thalurania columbica, *Gould, Mon. Troch.* ii. pl. 106 (1858); *Salv. Cat. Birds B. M.* xvi. p. 79 (1892).

Thalurania colombica, *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 256 (1892); *Sharpe, Hand-l.* ii. p. 116 (1900).

The eggs of the Colombian Wood-nymph in the Collection are both imperfect, but their approximate dimensions are .6 by .37.

2. Bogotá (*Tristram Coll.*).

Crowley Bequest.

Thalurania furcata (*Gm.*).

Thalurania furcata, *Gould, Mon. Troch.* ii. pl. 101 (1858); *Salv. Cat. Birds B. M.* xvi. p. 84 (1892); *Sharpe, Hand-l.* ii. p. 116 (1900).

An egg of the Cayenne Wood-nymph measures .5 by .34.

1. Guiana.

Crowley Bequest.

Genus **PETASOPHORA**, *G. R. Gray.***Petasophora cyanonota** (*Bourc. & Muls.*).

Petasophora cyanotus, *Gould, Mon. Troch.* iv. pl. 228 (1853).

Petasophora cyanotis, *Salv. Cat. Birds B. M.* xvi. p. 110 (1892); *Nehrk. Kat. Eiersamml.* p. 152 (1899).

Petasophora cyanonota, *Sharpe, Hand-l.* ii. p. 117 (1900).

Two eggs of the Little Violet-ear measure .58 by .38; .56 by .35.

1. United States, 3rd July.

W. Radcliffe Saunders, Esq.
[P.]

1. [South America.]

Crowley Bequest.

Petasophora iolata (*Gould*).

Petasophora iolata, *Gould, Mon. Troch.* iv. pl. 225 (1853); *Salv. Cat. Birds B. M.* xvi. p. 107 (1892); *Sharpe, Hand-l.* ii. p. 117 (1900).

The egg of the Bolivian Violet-ear in the Collection is imperfect, but appears to have measured about .62 by .38.

1. Venezuela (*Gugenheimer*).

Crowley Bequest.

Genus **LAMPORNIS**, *Swains.***Lampornis mango** (*Linn.*).

Lampornis mango, *Gosse, Birds Jamaica*, p. 88 (1847); *Salv. Cat. Birds B. M.* xvi. p. 91 (1892); *Nehrk. Kat. Eiersamml.* p. 152 (1899); *Sharpe, Hand-l.* ii. p. 118 (1900).

Lampornis porphyryrus, *Gould, Mon. Troch.* ii. pl. 81 (1858).

The eggs of the Porphyry-tailed Humming-bird in the Collection measure respectively: .62 by .4; .59 by .39; .6 by .4.

2. Kingston, Jamaica, May (C. B. Crowley Bequest.
Taylor).
1. [Jamaica.] Crowley Bequest.

Lampornis dominicus (Linn.).

Lampornis aurulentus, Gould, *Mon. Troch.* ii. pl. 79 (1858).

Lampornis dominicus, *Salv. Cat. Birds B. M.* xvi. p. 96 (1892); *Sharpe, Hand-l.* ii. p. 119 (1900).

Two eggs of the Haitian Humming-bird measure respectively: .51 by .32; .51 by .34.

2. St. Domingo (*Tristram Coll.*). Crowley Bequest.

Genus **CHRYSOLAMPIS**, Boie.

Chrysolampis mosquitus (Linn.).

Chrysolampis moschitus, Gould, *Mon. Troch.* iv. p. 204 (1856); *Salv. Cat. Birds B. M.* xvi. p. 113 (1892); *Lodge, Ibis*, 1896, p. 514; *von Ihering, Rev. Mus. Paulista*, iv. p. 253 (1900).

Chrysolampis mosquitus, *Sharpe, Hand-l.* ii. p. 119 (1900).

An egg of the Ruby-and-Topaz Humming-bird measures .51 by .35.

1. South America (*Dr. Kutter*). Crowley Bequest.

Genus **SERICOTES**, Reichenb.

Sericotes holosericeus (Linn.).

Eulampis holosericeus, Gould, *Mon. Troch.* ii. pl. 83 (1857); *Salv. Cat. Birds B. M.* xvi. p. 104 (1892); *Nehrk. Kat. Eiersamml.* p. 152 (1899).

Eulampis chlorolæmus, A. & E. Newton, *Ibis*, 1859, p. 138.

Sericotes holosericeus, *Sharpe, Hand-l.* ii. p. 120 (1900).

The eggs of the Green-breasted Humming-bird in the Collection measure respectively: .59 by .37; .56 by .38.

2. St. Croix, W. Indies (A. & E. Crowley Bequest.
Newton: *Tristram Coll.*).

Genus **LEUCOCHLORIS**, Reichenb.

Leucochloris albicollis (Vieill.).

Leucochloris albicollis, Gould, *Mon. Troch.* v. pl. 291 (1855); *Scl. & Huds. Argent. Orn.* ii. p. 7 (1889); *Salv. Cat. Birds B. M.* xvi. p. 178 (1892); *Nehrk. Kat. Eiersamml.* p. 152 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 253 (1900); *Sharpe, Hand-l.* ii. p. 120 (1900).

Two eggs of the White-throated Humming-bird measure respectively: .62 by .36; .63 by .38.

2. Iguapé, Brazil, 3rd Oct.

Crowley Bequest.

Genus **ATHURUS**, *Cab. & Heine*.

Aithurus polytmus (*Linn.*).

Trochilus polytmus, *Gosse, Birds Jamaica*, p. 97 (1847); *Gould, Mon. Troch.* ii. pl. 98 (1857).

Aithurus polytmus, *Salv. Cat. Birds B. M.* xvi. p. 64 (1892); *Nehrk. Kat. Eiersamml.* p. 152 (1899); *Sharpe, Hand-l.* ii. p. 120 (1900).

The eggs of the Black-capped Humming-bird in the Collection measure respectively: .51 by .36; .54 by .32.

1. [Jamaica.]

Crowley Bequest.

1. St. Thomas, Jamaica, 2nd July
(*C. B. Taylor*).

Crowley Bequest.

Genus **OREOTROCHILUS**, *Gould*.

Oreotrochilus leucopleurus, *Gould*.

Oreotrochilus leucopleurus, *Gould, Mon. Troch.* ii. pl. 71 (1849); *Scl. & Huds. Argent. Orn.* ii. p. 1 (1889); *Salv. Cat. Birds B. M.* xvi. p. 336 (1892); *Sharpe, Hand-l.* ii. p. 121 (1900).

An egg of the White-sided Hill-Star measures .66 by .39.

1. Puente del Inca, Andes of Chile
(*P. H. Gosse, Junior*).

E. A. Fitzgerald, Esq. [P.]

Genus **OREOPYRA**, *Gould*.

Oreopyra leucaspis, *Gould*.

Oreopyra leucaspis, *Gould, Mon. Troch.* iv. pl. 264 (1861); *Salv. Cat. Birds B. M.* xvi. p. 306 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 332 (1892); *Nehrk. Kat. Eiersamml.* p. 153 (1899); *Sharpe, Hand-l.* ii. p. 123 (1900).

The eggs of the White-throated Oreopyra in the Collection measure respectively: .57 by .38; .53 by .35.

2. Chiriqui, Panama (*Nehrkorn Coll.*). Crowley Bequest.

Oreopyra calolæma, *Salvin*.

Oreopyra calolæma, *Sharpe in Gould's Mon. Troch., Suppl.* pl. 6 (1885); *Salv. Cat. Birds B. M.* xvi. p. 307 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 333 (1892); *Sharpe, Hand-l.* ii. p. 123 (1900).

Two eggs of the Purple-throated Oreopyra measure respectively: .58 by .4; .6 by .4.

2. Azahar de Cartago, Costa Rica,
28th Dec. (*C. F. Underwood*).

Crowley Bequest.

Genus **HELIANTHEA**, *Gould*.**Helianthea torquata** (*Boiss.*).

Bourcieria torquata, *Gould, Mon. Troch.* iv. pl. 251 (1854); *Scl. & Salv. P. Z. S.* 1879, p. 530; *Salv. Cat. Birds B. M.* xvi. p. 130 (1892).
Helianthea torquata, *Sharpe, Hand-l.* ii. p. 126 (1900).

The eggs of the Collared Inca in the Collection measure respectively: .64 by .4; .61 by .38; .66 by .39.

2. Sta. Elena, Antioquia, U.S. Salvin-Godman Coll.
 Colombia (*T. K. Salmon*).
1. [S. America.] Crowley Bequest.

Genus **PTEROPHANES**, *Gould*.**Pterophanes temmincki** (*Boiss.*).

Pterophanes temmincki, *Gould, Mon. Troch.* iii. pl. 178 (1849); *Whitely, P. Z. S.* 1873, p. 190; *Salv. Cat. Birds B. M.* xvi. p. 118 (1892);
Sharpe, Hand-l. ii. p. 127 (1900).

An egg of Temminck's Sapphire-wing measures .78 by .5.

1. Cachupata, Peru [*H. Whitely*]. Crowley Bequest.

Genus **ERIOCNEMIS**, *Reichenb.***Eriocnemis cupreiventris** (*Fraser*).

Eriocnemis cupreiventris, *Gould, Mon. Troch.* iv. pl. 270 (1853); *Salv. Cat. Birds B. M.* xvi. p. 367 (1892); *Sharpe, Hand-l.* ii. p. 129 (1900).

The egg of the Coppery-bellied Puff-leg in the Collection is imperfect, but measures approximately .62 by .4.

1. Bogotá (*Tristram Coll.*). Crowley Bequest.

Eriocnemis lugens (*Gould*).

Eriocnemis lugens, *Gould, Mon. Troch.* iv. pl. 282 (1854); *Scl. & Salv. P. Z. S.* 1879, p. 530; *Salv. Cat. Birds B. M.* xvi. p. 371 (1892); *Sharpe, Hand-l.* ii. p. 129 (1900).

Two eggs of the Hoary Puff-leg measure respectively: .54 by .35; .55 by .35.

2. Antioquia, U.S. Colombia (*T. K. Salmon*). Salvin-Godman Coll.

Genus **ADELOMYIA**, *Bp.***Adelomyia melanogenys** (*Fraser*).

Adelomyia maculata, *Gould, Mon. Troch.* iii. pl. 199 (1861).

Adelomyia melanogenys, *Salv. Cat. Birds B. M.* xvi. p. 169 (1892);
Sharpe, Hand-l. ii. p. 131 (1900).

An egg of the Spotted Humming-bird in the Collection is imperfect, but measures approximately $\cdot 5$ by $\cdot 3$.

1. [S. America.]

Crowley Bequest.

Genus **HELIANGELUS**, *Gould*.**Heliangelus clarissæ** (*Longuem.*).

Heliangelus clarissæ, *Gould, Mon. Troch.* iv. pl. 242 (1855); *Salv. Cat. Birds B. M.* xvi. p. 160 (1892); *Sharpe, Hand-l.* ii. p. 131 (1900).

Two eggs of the Sun-Angel measure respectively: $\cdot 55$ by $\cdot 39$; $\cdot 56$ by $\cdot 37$.

1. U.S. Colombia.

Crowley Bequest.

1. Bogotá (*Tristram Coll.*).

Crowley Bequest.

Heliangelus exortis (*Fraser*).

Heliotrypha parzudakii, *Gould, Mon. Troch.* iv. pl. 240 (1860); *Scl. & Salv. P. Z. S.* 1879, p. 529.

Heliotrypha exortis, *Salv. Cat. Birds B. M.* xvi. p. 165 (1892).

Heliangelus exortis, *Sharpe, Hand-l.* ii. p. 131 (1900).

Two eggs of Parzudaki's Star-frontlet measure respectively: $\cdot 55$ by $\cdot 34$; $\cdot 56$ by $\cdot 35$.

2. Sta. Elena, Antioquia, U.S.
Colombia (*T. K. Salmon*).

Salvin-Godman Coll.

Genus **METALLURA**, *Gould*.**Metallura tyrianthina** (*Lodd.*).

Metallura tyrianthina, *Gould, Mon. Troch.* iii. pl. 195 (1859); *Salv. Cat. Birds B. M.* xvi. p. 152 (1892); *Sharpe, Hand-l.* ii. p. 133 (1900).

An egg of the Tyrian-tail measures $\cdot 5$ by $\cdot 33$.

1. Bogotá (*Tristram Coll.*).

Crowley Bequest.

Metallura smaragdinicollis (*d'Orb. & Lafr.*).

Metallura smaragdinicollis, *Gould, Mon. Troch.* iii. pl. 196 (1859); *Salv. Cat. Birds B. M.* xvi. p. 154 (1892); *Sharpe, Hand-l.* ii. p. 133 (1900).

An egg of the Violet-tail measures .5 by .33.

1. [Peru.]

Crowley Bequest.

Genus **OXYPOGON**, *Gould.***Oxypogon guerini** (*Boiss.*).

Oxypogon guerini, *Gould, Mon. Troch.* iii. pl. 182 (1849); *Salv. Cat. Birds B. M.* xvi. p. 340 (1892); *Sharpe, Hand-l.* ii. p. 133 (1900).

An egg of Guérin's Helmet-crest measures .59 by .4.

1. Bogotá (*Tristram Coll.*).

Crowley Bequest.

Genus **EUSTEPHANUS**, *Reichenb.***Eustephanus galeritus** (*Molina*).

Eustephanus galeritus, *Gould, Mon. Troch.* iv. pl. 265 (1852); *Salv. Cat. Birds B. M.* xvi. p. 156 (1892); *James, New List Chilean Birds*, p. 5 (1892); *Sharpe, Hand-l.* ii. p. 135 (1900).

Four eggs of the Chilean Fire-crown measure respectively: .61 by .41; .59 by .4; .59 by .37; .59 by .38.

2. Central Chile, Oct.

Berkeley James Coll.

2. Central Chile (*Landbeck*).

Berkeley James Coll.

Genus **PSALIDOPRYMNA**, *Cab. & Heine.***Psalidoprymna gouldi** (*Lodd.*).

Lesbia gouldi, *Gould, Mon. Troch.* iii. pl. 167 (1856); *Salv. Cat. Birds B. M.* xvi. p. 149 (1892).

Psalidoprymna gouldi, *Sharpe, Hand-l.* ii. p. 136 (1900).

The eggs of the Bogotá Train-bearer in the Collection measure respectively: .55 by .38; .55 by .39.

2. Bogotá (*Tristram Coll.*).

Crowley Bequest.

Genus **DORICHA**, *Reichenb.***Doricha henicura** (*Vieill.*).

Thaumastura enicura, *Gould, Mon. Troch.* iii. pl. 157 (1859); *Salvin, Ibis*, 1860, p. 264.

Doricha enicura, *Salv. Cat. Birds B. M.* xvi. p. 381 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 345 (1892).
Doricha henicura, *Sharpe, Hand-l.* ii. p. 140 (1900).

Two eggs of the Slender Shear-tail measure respectively: .48 by .3; .51 by .3.

2. Dueñas, Guatemala (*O. Salvin*). Salvin-Godman Coll.

Genus **TROCHILUS**, *Linn.*

Trochilus colubris, *Linn.*

Trochilus colubris, *Gould, Mon. Troch.* iii. pl. 131 (1858); *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 448 (1874); *Salv. Cat. Birds B. M.* xvi. p. 399 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 357 (1892); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 192, pl. i. fig. 27 (1895); *Sharpe, Hand-l.* ii. p. 140 (1900).

The eggs of the Ruby-throated Humming-bird measure from .48 to .53 in length, and from .32 to .34 in breadth.

2. North America. Salvin-Godman Coll.
3. North America. Crowley Bequest.

Trochilus alexandri (*Bourc. & Muls.*).

Trochilus alexandri, *Gould, Mon. Troch.* iii. pl. 132 (1857); *Salv. Cat. Birds B. M.* xvi. p. 402 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 359 (1892); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 198 (1895); *Sharpe, Hand-l.* ii. p. 140 (1900).

The eggs of the Purple-throated Humming-bird in the Collection measure .5 by .35; .51 by .34; .53 by .38; .54 by .35.

1. North America. Crowley Bequest.
1. North America. W. Radcliffe Saunders, Esq.
[P.]
2. California, 10th May. W. Radcliffe Saunders, Esq.
[P.]

Trochilus anna (*Less.*).

Calypte annæ, *Gould, Mon. Troch.* iii. p. 135 (1856); *Salv. Cat. Birds B. M.* xvi. p. 403 (1892).
Calypte anna, *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 206 (1895).
Trochilus anna, *Sharpe, Hand-l.* ii. p. 140 (1900).

The eggs of Anna's Calypte in the Collection measure respectively: .53 by .35; .56 by .34; .53 by .33; .5 by .36; .51 by .33; .51 by .32; .52 by .31.

1. California. Crowley Bequest.
2. [California (*Tristram Coll.*)] Crowley Bequest.
4. California, 10th May. W. Radcliffe Saunders, Esq.

Genus **SELASPHORUS**, *Swains.***Selasphorus rufus** (*Gm.*).

Selasphorus rufus, *Gould, Mon. Troch.* iii. pl. 137 (1852); *Salv. Cat. Birds B. M.* xvi. p. 392 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 353 (1892); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 213 (1895); *Sharpe, Hand-l.* ii. p. 140 (1900).

An egg of the Rufous Flame-bearer measures .51 by .35.

1. North America.

Crowley Bequest.

Selasphorus torridus, *Salvin.*

Selasphorus torridus, *Sharpe in Gould's Mon. Troch., Suppl.* (1887); *Salv. Cat. Birds B. M.* xvi. p. 395 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 354 (1892); *Sharpe, Hand-l.* ii. p. 141 (1900).

An egg of the Torrid Flame-bearer in the Collection measures .48 by .32.

2. Irazu, Costa Rica, 20th Feb.
(*C. F. Underwood*).

Crowley Bequest.

Selasphorus scintilla (*Gould*).

Selasphorus scintilla, *Gould, Mon. Troch.* iii. pl. 138 (1852); *Salv. Cat. Birds B. M.* xvi. p. 395 (1892); *id. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 353 (1892); *Sharpe, Hand-l.* ii. p. 141 (1900).

An egg of the Little Flame-bearer measures .43 by .3.

1. Azahar de Cartago, Costa Rica,
28th Dec. (*C. F. Underwood*).

Crowley Bequest.

Genus **CHÆTOCERCUS**, *Gray.***Chætocercus rosæ** (*Bourc. & Muls.*).

Calothorax rosæ, *Gould, Mon. Troch.* iii. pl. 149 (1857).
Chætocercus rosæ, *Salv. Cat. Birds B. M.* xvi. p. 414 (1892); *Sharpe, Hand-l.* ii. p. 141 (1900).

The egg of the Crimson-throated Wood-star in the Collection measures .49 by .3.

2. Venezuela (*Gugenheimer*).

Crowley Bequest.

Genus **BELLONA**, *Muls. & Verr.***Bellona cristata** (*Linn.*).

Orthorhynchus cristatus, *Gould, Mon. Troch.* iv. pl. 205 (1857).
Bellona cristata, *Salv. Cat. Birds B. M.* xvi. p. 353 (1892); *Sharpe, Hand-l.* ii. p. 142 (1900).

The measurements of four eggs of the Blue-crest average $\cdot 48$ by $\cdot 33$.

4. Grenada, W. Indies (*J. G. Bell*). Crowley Bequest.

***Bellona ornata* (Gould).**

Orthorhynchus ornatus, *Gould, Mon. Troch.* iv. pl. 203 (1861).

Bellona ornata, *Salv. Cat. Birds B. M.* xvi. p. 354 (1892); *Sharpe, Hand-l.* ii. p. 142 (1900).

The eggs of the Green-and-Blue-crest in the Collection measure respectively : $\cdot 47$ by 3; $\cdot 45$ by $\cdot 3$.

2. St. Vincent, W. Indies, April Salvin-Godman Coll.
(*Mrs. H. H. Smith*).

Genus **STEPHANOXYIS**, *Simon*.

***Stephanoxys lalandei* (Vieill.).**

Cephalepis delalandi, *Gould, Mon. Troch.* iv. pl. 208 (1861).

Cephalolepis delalandi, *Salv. Cat. Birds B. M.* xvi. p. 356 (1892).

Stephanoxys lalandei, *Sharpe, Hand-l.* ii. p. 142 (1900).

An egg of Delalande's Plover-crest measures $\cdot 53$ by $\cdot 32$.

1. [Brazil.] Crowley Bequest.

Sub-Order **COLII.**

Family **COLIIDÆ.**

The eggs of the Colies are typically of a regular oval shape, the shell being somewhat rough to the touch and quite devoid of all gloss.

Genus **COLIUS**, *Briss.*

***Colius striatus*, Gm.**

Colius striatus, *Gurney, Ibis*, 1860, p. 213; 1864, p. 359; *Sharpe, ed. Layard's Birds S. Africa*, p. 555 (1875-84); *Sharpe, Cat. Birds B. M.* xvii. p. 339 (1892); *Nehrke, Kat. Eiersamml.* p. 162 (1899); *Sharpe, Hand-l.* ii. p. 145 (1900).

The eggs of the South-African Coly vary from plain white to pale yellowish-white in colour. They measure from $\cdot 77$ to $\cdot 92$ in length, and from $\cdot 63$ to $\cdot 68$ in breadth.

Two eggs of the Long-tailed Coly in the Collection are of a dull white colour, sparingly marked with small blotches of chocolate-brown. One example measures .8 by .57.

2. Khartum, Sudan, 28th May.

R. McD. Hawker, Esq. [P.].

Order TROGONES.

Family TROGONIDÆ.

The eggs of the Trogons are always plain, some being white or cream-coloured and others of a bluish-green colour.

Genus PHAROMACRUS, *De La Llave*.

The Trogons of this genus lay bluish-green eggs of a spheroidal shape and exhibiting a slight gloss.

Pharomacrus mocinno, *De La Llave*.

Pharomacrus paradiseus, *Owen, Ibis*, 1861, p. 66, pl. ii. fig. 1.
Pharomacrus mocinno, *Grant, Cat. Birds B. M.* xvii. p. 431 (1892);
Salv. & Godm. Biol. Centr.-Amer., Aves, ii. p. 481 (1896); *Nehrk. Kat. Eiersamml.* p. 163, pl. iv. fig. 46 (1899); *Sharpe, Hand-l.* ii. p. 146 (1900).

Two eggs of the Resplendent Trogon, or Quezal, measure respectively: 1·38 by 1·13; 1·4 by 1·15.

2. Chilasco, Vera Paz, Guatemala, Salvin-Godman Coll.
11th June. (*R. Owen*).

Pharomacrus auriceps (*Gould*).

(Plate II. fig. 11.)

Pharomacrus auriceps, *Scl. & Salv. P. Z. S.* 1879, p. 535; *Grant, Cat. Birds B. M.* xvii. p. 434 (1892); *Sharpe, Hand-l.* ii. p. 146 (1900).

An egg of the Golden-headed Trogon measures 1·46 by 1·14.

1. Frontino, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus TROGON, *Linn.*

The eggs of the Trogons of this genus are typically of a broad oval form, and exhibit a considerable amount of gloss.

Trogon mexicanus, *Swains.*

Trogon mexicanus, *Grant, Cat. Birds B. M.* xvii. p. 444 (1892); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 487 (1896); *Sharpe, Hand-l.* ii. p. 147 (1900).

The eggs of the Mexican Trogon in the Collection are those described by Salvin (*Biol. l. c.*) as being of a very pale greenish

colour, but they have now faded to white. They measure respectively: 1·2 by ·93; 1·19 by ·92; 1·15 by ·93.

3. Chuacus, Guatemala, June Salvin-Godman Coll.
(*O. Salvin*).

Trogon collaris, Vieill.

Trogon collaris, *Scl. & Salv. P. Z. S.* 1879, p. 534; *Grant, Cat. Birds B. M.* xvii. p. 448 (1892); *Nehrk. Kat. Eiersamml.* p. 163 (1899); *Sharpe, Hand-l.* ii. p. 147 (1900).

Two eggs of the Collared Trogon are white, and measure respectively: 1·14 by ·88; 1·09 by ·9.

2. Sta. Elena, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Trogon ambiguus, Gould.

Trogon ambiguus, *Grant, Cat. Birds B. M.* xvii. p. 451 (1892); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 32 (1895); *Salv. & Godman, Biol. Centr.-Amer., Aves*, ii. p. 490 (1896); *Sharpe, Hand-l.* ii. p. 148 (1900).

An egg of the Coppery-tailed Trogon in the Collection is white, of a broad elliptical shape, almost devoid of gloss. It measures 1·03 by ·82.

1. Mazatlan, Mexico (*A. Forrer*). Crowley Bequest.

Trogon puellus, Gould.

Trogon puella, *Grant, Cat. Birds B. M.* xvii. p. 452 (1892); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 491 (1896); *Nehrk. Kat. Eiersamml.* p. 163 (1899); *Sharpe, Hand-l.* ii. p. 148 (1900).

An egg of the Ray-tailed Trogon in the Collection is of a broad oval shape, glossy, and white. It measures 1·1 by ·85.

1. Guatemala (*Nehrkorn Coll.*). Crowley Bequest.

Trogon chionurus, Scl. & Salv.

Trogon chionurus, *Scl. & Salv. P. Z. S.* 1879, p. 535; *Grant, Cat. Birds B. M.* xvii. p. 460 (1892); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 495 (1896); *Sharpe, Hand-l.* ii. p. 148 (1900).

An egg of the Snowy-tailed Trogon in the Collection is white, and measures 1·1 by ·94.

1. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Trogon melanocephalus, Gould.

Trogon melanocephalus, *Grant, Cat. Birds B. M.* xvii. p. 462 (1892); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 498 (1896); *Nehrck. Kat. Eiersamml.* p. 164 (1899); *Sharpe, Hand-l.* ii. p. 148 (1900).

The eggs of the Black-headed Trogon are white and fairly glossy. They measure from 1·1 to 1·18 in length, and from ·9 to ·95 in breadth.

2. British Honduras, 26th May (*F. Blancaneaux*). Salvin-Godman Coll.
4. British Honduras, 2nd June (*F. B.*). Salvin-Godman Coll.

Trogon caligatus, Gould.

Trogon caligatus, *Grant, Cat. Birds B. M.* xvii. p. 465 (1892); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 500 (1896); *Nehrck. Kat. Eiersamml.* p. 164 (1899); *Sharpe, Hand-l.* ii. p. 148 (1900).

An egg of the Gartered Trogon in the Collection is white, of a blunt oval form, glossy. It measures 1·14 by ·89.

1. Honduras, 4th Aug. Crowley Bequest.

Genus PYROTROGON, Bp.**Pyrotrogon fasciatus (Penn.).**

Harpactes fasciatus, *Legge, Birds Ceylon*, p. 269 (1878); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 340 (1890); *Grant, Cat. Birds B. M.* xvii. p. 485 (1892); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 199 (1895).

Pyrotrogon fasciatus, *Sharpe, Hand-l.* ii. p. 150 (1900).

The eggs of the Malabar Trogon in the Collection are spheroidal in shape, glossy, and of a very pale creamy-white. They measure respectively 1·1, 1·09, and 1·06 in length, by ·95 in breadth.

3. Kaken Cotta, Mysore, 26th April (*Iver Macpherson*). Hume Coll.

Pyrotrogon erythrocephalus (Gould).

Harpactes erythrocephalus, *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 339 (1890); *Grant, Cat. Birds B. M.* xvii. p. 488 (1892); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 200 (1895).

Pyrotrogon erythrocephalus, *Sharpe, Hand-l.* ii. p. 151 (1900).

The eggs of the Red-headed Trogon are spheroidal in shape and very glossy. They vary from creamy white to rich cream-colour. They measure from 1·05 to 1·1 in length, and from ·88 to 1 in breadth.

Sub-Order CUCULI.

Family CUCULIDÆ.

Sub-Family CUCULINÆ.

Genus COCCYSTES, *Gloger.**Coccystes glandarius* (Linn.).

- Oxylophus glandarius*, *Baedeker, Eier Eur. Vög.* tab. 50. fig. 4 (1855-63);
Baedeker, L. Brehm & A. Brehm, J. f. O. 1853, p. 117, taf. v. fig. 4;
Salvin, Ibis, 1859, p. 316; *Saunders, Ibis*, 1869, p. 401; 1871, p. 66.
Cuculus glandarius, *Hewitson, Ibis*, 1859, p. 76, pl. ii. figs. 1 & 2;
Seebohm, Brit. Birds, ii. p. 386, pl. 68 (1884); *id. Eggs of Brit.*
Birds, p. 174, pl. 49. fig. 7 (1896).
Coccystes glandarius, *Dresser, Birds Eur.* v. p. 219 (1874); *Shelley, Cat.*
Birds B. M. xix. p. 212 (1891); *Irby, Orn. Str. Gibr.* 2nd ed. p. 136
 (1895); *Sharpe, Hand-l.* ii. p. 155 (1900); *Ivy, Ibis*, 1901, p. 22.

The eggs of the Great Spotted Cuckoo are almost invariably of an elliptical form, the two ends being quite alike in contour. The shell is smooth and possesses a considerable amount of gloss. The ground-colour is pale greenish blue, and this is thickly speckled and streaked with pale reddish brown and underlying violet-grey. On some specimens there are, in addition, some scrawls and hair-lines of deep brown, forming a wreath round the larger end. They measure from 1.23 to 1.4 in length, and from .92 to 1.05 in breadth.

The eggs of this Cuckoo may be separated from those of the Magpie, in the nest of which it usually deposits its eggs, by their elliptical shape and reddish-brown markings, those of the Magpie being of a pointed oval shape and the markings olive-brown.

***Coccytes jacobinus* (Bodd.).**

(Plate II. fig. 6.)

Coccytes jacobinus, *Sharpe, ed. Layard's Birds S. Africa*, p. 158 (1875-84); *Legge, Birds Ceylon*, p. 246 (1878); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 388 (1890); *Shelley, Cat. Birds B. M.* xix. p. 217 (1891); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 225 (1895); *Nehrke. Kat. Eiersamml.* p. 170 (1899); *Sharpe, Hand-l.* ii. p. 155 (1900); *Ivy, Ibis*, 1901, p. 23.

The eggs of the Pied Crested Cuckoo are usually deposited in India in the nests of the various species of Babblers (*Argya* and *Crateropus*), the eggs of which birds they closely resemble in size and colour: The Cuckoo's eggs are of a spheroidal or broad elliptical shape, very smooth and glossy, and of a dark blue colour. The eggs of the Babblers are almost invariably of a pointed oval shape, and the Cuckoo's eggs may generally be separated from them by their shape. They measure from ·88 to 1·02 in length, and from ·72 to ·82 in breadth.

Birds*, ii. p. 379 (1890); *Shelley, Cat. Birds B. M.* xix. p. 245 (1891); *Rey in Marshall's Zool. Vorträge*, Heft xi. (1892); *Bidwell, Bull. B. O. C.* v. p. xxix (1896); *id. Ibis*, 1896, p. 394; *Seebohm, Eggs of Brit. Birds*, p. 174, pl. 49. figs. 1-5, 9-13 (1896); *Rey, Eier Vög. Mitteleur.* p. 93, taf. 30 & 31 (1900); *Sharpe, Hand-l.* ii. p. 158 (1900).

The eggs of the Common Cuckoo are usually of a blunt oval form, but occasionally they are nearly elliptical in shape. They exhibit a moderate amount of gloss. The shell is thick and hard, and weighs considerably more than the shell of any egg of a Passerine bird of the same size. The eggs are very variable in size, measuring from .76 to .98 in length, and from .57 to .73 in breadth.

The eggs of the Common Cuckoo also vary much in colour and in the character of the markings, but the great majority resemble the eggs of the Skylark (*Alauda arvensis*) and Meadow-Pipit (*Anthus pratensis*), and are subject to the same variations as the eggs of those two species. The ground-colour varies from greyish white to pale green on the one hand, and from pale stone-colour to greyish brown on the other. The markings are densely disposed over the whole shell as a rule, and consist of smears, blotches, spots, and streaks of various shades of brown, greyish yellow, olive-brown, lavender, and lilac, and frequently of blackish dots.

As eggs of the above type, with their numerous slight variations, constitute the bulk of the Cuckoo's eggs in the Collection, it will be unnecessary to attempt to describe them in any further detail. In the following remarks, therefore, only those eggs will be described which differ from this common type.

Eggs of the Common Cuckoo in the Collection disassociated from those of the foster-parents.

Of various forms of the common type.

Phylloscopus minor.

- | | | | |
|----|--------------------------------|------------------|------------------|
| 1. | With 2 eggs of foster-parents, | Churt, 21st May. | Crowley Bequest. |
|----|--------------------------------|------------------|------------------|
- Of the common type.

Acrocephalus phragmitis.

- | | | | |
|----|--------------------------------|------------------------|------------------|
| 1. | With 4 eggs of foster-parents, | Tenby, Wales, | Crowley Bequest. |
| | | 19th June. | |
| 1. | With 6 | „ „ Harrow, Middlesex. | Purchased. |

1. With 4 eggs of foster-parents, Sussex, 30th May (Swaysland). Seebohm Coll.
1. With nest and 5 eggs of foster-parents, England. Crowley Bequest.
1. With " 3 " " Valkenswaard, Holland, 1st July. Crowley Bequest.

Of the common type.

Acrocephalus streperus.

1. With 1 egg of foster-parents, England. Crowley Bequest.
1. With 1 " Fullerton, Hants, 14th June. W. H. Turle, Esq. [P.].
1. With 4 " Avington, Hants (G. E. Shelley). Seebohm Coll.
2. With 1 " Eastbourne, Sussex, 4th June (H. Saunders). Seebohm Coll.
1. With 1 " Pomerania, 25th May (T. Holland). Seebohm Coll.
1. With 2 " Pomerania, 8th June (T. H.). Seebohm Coll.
2. With 2 " Anhalt, Germany, 2nd June (Dr. Rey). Seebohm Coll.
1. With nest and 1 egg of foster-parents, England (Tristram Coll.). Crowley Bequest.
1. With " 2 " Staines, Middlesex. Crowley Bequest.
1. With " 5 " Staines. Crowley Bequest.

Eggs placed in the nests of the Reed-Warbler are of a varied nature. Nine examples are more or less forms of the common type; two, placed in one nest, are white, spotted with lavender and speckled with dark brown; and one is of a greyish-pink colour, marked with lilac and rich purplish-red.

Acrocephalus palustris.

1. With 3 eggs of foster-parents, Halle-on-Saale, 4th June. Purchased.

Of the common type.

Locustella naevia.

1. With nest and 4 eggs of foster-parents, Brighton. Crowley Bequest.
- Of the common type.

Lanius collurio.

1. With 5 eggs of foster-parents, Churt, June. Crowley Bequest.
1. With 3 " " Halle-on-Saale, 21st May. Purchased.

Of the common type, and very different from the fosterers' eggs.

Lanius pomeranus.

1. With 3 eggs of foster-parents, South Spain, 10th May. Crowley Bequest.

Of the common type; greenish white, mottled with brown and lavender.

Lanius minor.

1. With 2 eggs of foster-parents [Europe]. Crowley Bequest.

A very pale example; greenish white, sparingly smeared and blotched with pale lavender and very pale brown.

Regulus ignicapillus.

1. With 5 eggs of foster-parents, Alsace, 16th May. Crowley Bequest.

Purplish white, mottled with pale lilac and lavender, and speckled with dark brown.

Motacilla lugubris.

- | | | | |
|----|-----------------------------------------|------------------------------------------|----------------------------|
| 1. | With 5 eggs of foster-parents, | Dollar, N.B. | Purchased. |
| 2. | With 4 | " Pembroke, 13th June. | Crowley Bequest. |
| 1. | With 5 | " Tenby, 28th May. | Crowley Bequest. |
| 1. | With 4 | " Lancashire, 26th May
(H. E. Smith). | Seebohm Coll. |

Of the common brown type.

Miliaria miliaria.

- | | | | |
|----|--------------------------------|--------------------|------------------|
| 1. | With 3 eggs of foster-parents, | Wareham, Dorset, | C. E. Radcliffe, |
| | | July. | Esq. [P.]. |
| 1. | With 2 „ „ | Halle-on-Saale, | Crowley Bequest. |
| | | Germany, 20th May. | |

One of the brown type; the other has a few scrawls and lines similar to those on some Buntings' eggs.

Cuculus saturatus, Hodgs.

Cuculus striatus, Swinhoe, *Ibis*, 1861, pp. 259, 340.

Cuculus indicus, *Tacz. J. f. O.* 1873, p. 95, taf. i. figs. 7 & 8.

Cuculus intermedius, Oates ed. *Hume, Nests & Eggs Ind. Birds*, ii. p. 381 (1890); *Shelley, Cat. Birds B. M.* xix. p. 252 (1891).

Cuculus saturatus, *Blanf. Fauna Brit. Ind., Birds*, iii. p. 207 (1895); *Sharpe, Hand-l.* ii. p. 158 (1900).

An egg of the Asiatic Cuckoo in the Collection taken by Swinhoe from a nest of *Pycnonotus sinensis* is now imperfect, but appears to correspond well with Mr. Hume's description of an egg of this species. It is of a pinkish-white colour, thickly freckled with purplish grey. It measures .67 in breadth.

1. Amoy (*R. Swinhoe: Tristram Coll.*). Crowley Bequest.

Cuculus poliocephalus, Lath.

(Plate II. fig. 3.)

Cuculus poliocephalus, *Legge, Birds Ceylon*, p. 231 (1878); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 382 (1890); *Shelley, Cat. Birds B. M.* xix. p. 255 (1891); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 208 (1895); *Osmaston, Journ. Bomb. Nat. Hist. Soc.* xi. p. 472 (1898); *Nehrk. Kat. Eiersamml.* p. 171 (1899); *Sharpe, Hand-l.* ii. p. 158 (1900).

Cuculus poliocephalus, var. rochii, *Milne-Edwards & Grandidier, Hist. Nat. Madag., Ois.* i. p. 176 (1879).

Cuculus rochii, *Cowan, Proc. Roy. Phys. Soc. Edinb.* pp. 142, 149 (1882).

The eggs of the Grey-headed Cuckoo taken in Madagascar by Mr. Cowan are of a regular oval shape, smooth and very glossy. They are white, spotted and speckled with umber-brown, more thickly at the large end than elsewhere, and with a few underlying pale purplish markings. They measure respectively: .75 by .55; .7 by .48; .72 by .56; .75 by .54.

Some eggs of this species from the Crowley Collection are very similar, but the markings are more numerous, and form a well-defined zone round the broad end.

An egg taken by Mr. Osmaston and attributed to this species is described as being chocolate-colour. It was probably the egg of *Chalcococcyx maculatus*.

An egg taken by Mr. Brooks, and believed to belong to this species, is described as being pure white and glossy.

4. Madagascar.
2. Madagascar.
3. Tamala Country, Madagascar
(*W. Deans Cowan*).

Rev. W. Deans Cowan [P].
Crowley Bequest.
Crowley Bequest.

Cuculus pallidus (Lath.).

Cacomantis pallidus, *Gould, Handb. Birds Austr.* i. p. 615 (1865); *North, Nests & Eggs Austr. Birds*, p. 243 (1889).

Cuculus pallidus, *Shelley, Cat. Birds B. M.* xix. p. 261 (1891); *Nehrke, Kat. Eiersamml.* p. 171 (1899); *Sharpe, Hand-l.* ii. p. 159 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 564, pl. 16 (1901).

The eggs of the Pallid Cuckoo are of a pointed oval shape and exhibit a considerable amount of gloss. They are flesh-coloured, very sparingly speckled with chestnut. Five examples measure from .92 to .98 in length, and from .68 to .7 in breadth.

Genus **PENTHOCERYX**, *Cab.*

Penthoceryx sonnerati (*Lath.*).

(Plate II. fig. 2.)

Cuculus sonnerati, *Legge, Birds Ceylon*, p. 233 (1878); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 382 (1890); *Shelley, Cat. Birds B. M.* xix. p. 262 (1891).

Penthoceryx sonnerati, *Blanf. Fauna Brit. Ind., Birds*, iii. p. 219 (1895); *Sharpe, Hand-l.* ii. p. 159 (1900).

Two eggs in the Collection, attributed to the Banded Bay Cuckoo, must be accepted with great doubt in view of Mr. Hume's statement that the fragments of an egg-shell extracted from the oviduct of a female of this species were pale bluish green and quite spotless.

They are of a rather pointed oval form, smooth, and very glossy. The ground-colour is white, and they are marked with brick-red. In one specimen the markings are minute specks; in the other spots and small blotches. They measure respectively: .82 by .64; .8 by .61.

| 2. Coorg, S. India, 18th July. | Hume Coll. |
|--------------------------------|------------|

Genus **CACOMANTIS**, *S. Müll.*

Cacomantis flabelliformis (*Lath.*).

Cuculus cineraceus, *Ramsay, P. Z. S.* 1865, p. 463; 1869, p. 360, pl. xxvii. fig. 4.

Cacomantis flabelliformis, *Gould, Handb. Birds Austr.* i. p. 618 (1865); *North, Nests & Eggs Austr. Birds*, p. 244, pl. xiii. fig. 7 (1889); *Shelley, Cat. Birds B. M.* xix. p. 266 (1891); *Sharpe, Hand-l.* ii.

p. 159 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 568 (1901).

An egg of the Fan-tailed Cuckoo in the Collection is of a narrow blunt oval shape, moderately glossy, and of a white colour, thickly speckled with pale chestnut and lilac-grey. It measures .88 by .6.

1. Tasmania.

Gould Coll.

***Cacomantis variolosus* (Horsf.).**

Cacomantis variolosus, *Shelley, Cat. Birds B. M.* xix. p. 272 (1891); *Sharpe, Hand-l. ii.* p. 160 (1900); *Campbell, Nests & Eggs Austr. Birds*, ii. p. 572, pl. 17 (1901).

An egg of the Square-tailed Cuckoo in the Collection is of a blunt oval shape and moderately glossy. It is white, marked, chiefly in the form of a zone round the broader end, with spots of pale rufous and lavender. It measures .73 by .56.

1. Wellington, New South Wales, 12th Crowley Bequest.

Dec. (with two eggs of *Rhipidura albiscapa*).

***Cacomantis insperatus* (Gould).**

(Plate II. fig. 9.)

Cacomantis insperatus, *Shelley, Cat. Birds B. M.* xix. p. 273 (1891); *Nehrk. Kat. Eiersamml.* p. 171, taf. iv. fig. 45 (1899); *Sharpe, Hand-l. ii.* p. 160 (1900).

Two eggs, said to be those of the Papuan Cuckoo, are of a narrow oval form, moderately glossy, and of an olive-brown colour, marked at the broader end with a few minute specks of darker brown. They measure respectively: .8 by .56; .79 by .51.

They are hardly separable from the eggs of *Cacomantis bronzinus* and *Chalcococcyx plagosus*, but they differ altogether from the specimen figured by Herr Nehrkorn (*l.c.*). The authenticity of these eggs, therefore, requires confirmation.

2. S.E. New Guinea (with 3 eggs of *Todopsis cyanocephala*).

Herr Weiske [C.].

***Cacomantis bronzinus* (Gray).**

Cacomantis bronzinus, *Shelley, Cat. Birds B. M.* xix. p. 275 (1891); *Nehrk. Kat. Eiersamml.* p. 171 (1899); *Sharpe, Hand-l. ii.* p. 160 (1900).

An egg of the New Caledonian Cuckoo in the Collection is almost elliptical in shape, moderately glossy, and of a plain olive-brown colour. It measures .8 by .53. This specimen closely resembles the eggs of *C. insperatus*, described above.

1. Noumea, New Galedonia (with two Crowley Bequest.

eggs of *Pseudogerygone flavilateralis*: *E. L. Layard: Tristram Coll.*).

Cacomantis passerinus (Vahl).

(Plate II. fig. 10.)

Cuculus passerinus, Legge, *Birds Ceylon*, p. 235 (1878).*Cacomantis passerinus*, Oates ed. Hume, *Nests & Eggs Ind. Birds*, ii. p. 385 (1890); Shelley, *Cat. Birds B. M.* xix. p. 277 (1891); Blanford, *Fauna Brit. Ind., Birds*, iii. p. 216 (1895); Sharpe, *Hand-l.* ii. p. 160 (1900).

The eggs of the Indian Plaintive Cuckoo are almost elliptical in shape, slightly glossy, and of a pale blue colour, sparingly spotted and blotched with pale reddish brown and lilac-grey. Two examples measure respectively: .76 by .51; .78 by .55.

1. Kotagherri, Nilghiri Hills, 22nd Sept. (Miss Cockburn). Hume Coll.
1. Kotagherri, 26th Sept. (Miss Cockburn). Hume Coll.

Genus CHRYSOCOCCYX, Boie.**Chrysococcyx klaasi (Steph.).***Cuculus klaasi*, Sharpe, ed. Layard's *Birds S. Africa*, p. 155 (1875-84).*Chrysococcyx klaasi*, Shelley, *Cat. Birds B. M.* xix. p. 283 (1891); Nehrk. *Kat. Eiersamml.* p. 171 (1899); Sharpe, *Hand-l.* ii. p. 161 (1900); Ivy, *Ibis*, 1901, p. 28.

An egg in the Collection, attributed to Klaas's Cuckoo, is nearly elliptical in shape and moderately glossy. It is cream-coloured, very densely freckled with greyish brown over the whole surface. It measures .74 by .5.

1. Potchefstroom, Transvaal (*T. Ayres*: Crowley Bequest. Tristram Coll.).

Chrysococcyx cupreus (Bodd.).

Chrysococcyx cupreus, Sharpe, ed. Layard's *Birds S. Africa*, p. 153 (1875-84); Ayres, *Ibis*, 1878, p. 407, 1879, p. 297; Shelley, *Cat. Birds B. M.* xix. p. 285 (1891); Nehrk. *Kat. Eiersamml.* p. 171 (1899); Sharpe, *Hand-l.* ii. p. 161 (1900); Haugner, *Ibis*, 1901, p. 16; Ivy, *Ibis*, 1901, p. 26.

An egg, said to be that of the Golden Cuckoo, is nearly an ellipse in shape and is moderately glossy. It is of a bluish-white colour, spotted and mottled with greyish brown and lavender. It resembles some eggs of *Passer domesticus*. It measures .9 by .6.

Urodynamis taitiensis, *Shelley, Cat. Birds B. M.* xix. p. 314 (1891);
Sharpe, Hand-l. ii. p. 164 (1900).

An egg of the Long-tailed Cuckoo in the Collection is spherical in shape, rough in texture, and pale buff in colour. The measurements are 1·1 by ·85.

- | | |
|-----------------|--------------------------------------|
| 1. New Zealand. | W. Radcliffe Saunders, Esq.
[P.]. |
|-----------------|--------------------------------------|

Genus *EUDYNAMIS*, *Vig. & Horsf.*

Eudynamis honorata (*Linn.*).

Eudynamis orientalis, *Layard, Ann. & Mag. Nat. Hist.* (2) xiii. p. 451 (1854).

Eudynamis honorata, *Legge, Birds Ceylon*, p. 251 (1878); *Barnes, Journ. Bomb. Nat. Hist. Soc.* iv. p. 19, pl. —. fig. 214 (1889); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 392 (1890); *Shelley, Cat. Birds B. M.* xix. p. 316 (1891); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 228 (1895); *Sharpe, Hand-l.* ii. p. 164 (1900).

Eudynamis maculata, *La Touche, Ibis*, 1892, p. 480.

The eggs of the Indian Koel bear a general resemblance to those of the Crows (*Corvus*), in the nests of which birds they usually deposit their eggs. They are of a blunt oval form and are

moderately glossy. The ground-colour is somewhat variable, being generally of some shade of green, tinged with olive or brown, but sometimes pale buff or stone-colour. The surface-markings, which consist of specks, spots, streaks, and blotches, also vary in extent and in shade of colour. Frequently they are densely distributed over the whole shell, but oftener, perhaps, they are most numerous at the broad end, where they form a cap or zone. They vary in colour from olive-brown to reddish brown. The underlying markings are dull purple or lavender-grey, and are of the same character as the surface-markings.

Specimens measure from 1.08 to 1.29 in length, and from .89 to .96 in breadth.

Order SCANSORES.

Sub-Order INDICATOIRES.

Family INDICATORIDÆ.

Genus **INDICATOR**, Vieill.**Indicator minor**, Steph.

Indicator minor, Sharpe, ed. *Layard's Birds S. Africa*, p. 169 (1875-84);
Shelley, Cat. Birds B. M. xix. p. 9 (1891); *Sharpe, Hand-l.* ii. p. 176
 (1900).

The eggs of the Little Honey-Guide in the Collection are white, of an oval form, smooth in texture, with a slight amount of gloss. They measure respectively: .88 by .69; .85 by .69; .82 by .61.

3. S. Africa.

W. Radcliffe Saunders, Esq. [P.].

Sub-Order CAPITONES.

Family CAPITONIDÆ.

The eggs of the Barbets are plain white. The shell is compact and firm, but has seldom much gloss. They are generally of a regular oval form.

Genus **TRICHOLÆMA**, J. & E. Verr.**Tricholæma leucomelan** (Bodd.).

Pogonorrhynchus leucomelas, Sharpe, ed. *Layard's Birds S. Africa*, p. 173
 (1875-84)

Tricholæma leucomelan, Shelley, *Cat. Birds B. M.* xix. p. 31 (1891);
Sharpe, Hand-l. ii. p. 180 (1900); *Ivy, Ibis*, 1901, p. 22.

An egg of the Pied Barbet in the Collection is of a narrow oval form, slightly rough in texture, and devoid of gloss. It measures .92 by .63.

1. Cape Colony (*T. Atmore: Tris-* Crowley Bequest.
tram Coll.).

Genus **MEGALÆMA**, Gray.**Megalæma virens** (Bodd.).

Megalæma virens, Oates ed. *Hume, Nests & Eggs Ind. Birds*, ii. p. 319 (1890); *Shelley, Cat. Birds B. M.* xix. p. 52 (1891); *Blanf. Faun. Brit. Ind., Birds*, iii. p. 86 (1895); *Sharpe, Hand-l.* ii. p. 183 (1900).

The eggs of the Great Chinese Barbet are of a broad pointed oval shape, and have only a trace of gloss. Four examples measure respectively: 1·31 by 1·04; 1·32 by 1·03; 1·29 by 1·02; 1·36 by 1.

Xantholæma malabaricum (*Blyth*).

Xantholæma malabarica, *Marshall, Mon. Capit.* p. 111 (1871); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 332 (1890); *Shelley, Cat. Birds B. M.* xix. p. 95 (1891); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 99 (1895).
Xantholæma malabaricum, *Sharpe, Hand-l.* ii. p. 186 (1900).

An egg of the Crimson-throated Barbet is of a lengthened cylindrical shape and devoid of gloss. It measures .98 by .65.

1. Travancore, S. India, 6th March Hume Coll.
(*F. W. Bourdillon*).

Sub-Order RHAMPHASTIDÆ.

Family RHAMPHASTIDÆ.

Genus PTEROGLOSSUS, *Illig.*

Pteroglossus flavirostris, *Fraser.*

Pteroglossus flavirostris, *Scl. Cat. Birds B. M.* xix. p. 144 (1891); *Nehr. Kat. Eiersamml.* p. 169 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 262 (1900); *Sharpe, Hand-l.* ii. p. 190 (1900).

An egg of the Yellow-billed Toucan in the Collection is elliptical in shape, the ends being somewhat pointed, moderately glossy, and plain white. The shell is smooth, but is covered with shallow pores and longitudinal furrows or grooves, extending more or less from one end of the egg to the other. It measures 1.3 by .92.

1. Peru (*Nehrkorn Coll.*). Crowley Bequest.

Order PICIFORMES.

Sub-Order BUCCONES.

Family BUCCONIDÆ.

Genus BUCCO, *Briss.*

Bucco maculatus (*Gm.*).

Bucco maculatus, *Scl. Mon. Jacam. & Puff-birds*, p. 99 (1879-82); *id. & Huds. Argent. Orn.* ii. p. 30 (1889); *Scl. Cat. Birds B. M.* xix. p. 190 (1891); *Sharpe, Hand-l.* ii. p. 197 (1900).

Two eggs in the Collection, said to be those of the Spotted Puff-bird, are of a somewhat narrow oval shape, smooth in texture, devoid of gloss and plain white. They measure respectively: 1.21 by .83; 1.23 by .86.

2. Argentine Republic. Crowley Bequest.

Genus **MONASA**, Vieill.**Monasa nigrifrons** (Spix).

Monacha nigrifrons, *Scl. Mon. Jacam. & Puff-birds*, p. 159 (1879-82); *id. Cat. Birds B. M.* xix. p. 206 (1891); *Nehrk. Kat. Eiersamml.* p. 170 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 261 (1900).

Monasa nigrifrons, *Sharpe, Hand-l.* ii. p. 200 (1900).

An egg of the Black-fronted Puff-bird in the Collection is spheroidal in shape, smooth in texture, glossy and of a white colour. It measures 1·03 by ·9.

1. Peru (*Nehrkorn Coll.*). Crowley Bequest.

Genus **CHELIDOPTERA**, Gould.**Chelidoptera tenebrosa** (Pall.).

Chelidoptera tenebrosa, *Scl. & Salv. P. Z. S.* 1866, p. 192; 1867, p. 583; *Scl. Mon. Jacam. & Puff-birds*, p. 161 (1879-82); *id. Cat. Birds B. M.* xix. p. 207 (1891); *Sharpe, Hand-l.* ii. p. 200 (1900).

The eggs of the Smaller Swallow-wing are spheroidal in shape, smooth in texture, glossy and of a white colour. Three examples measure respectively : ·99 by ·77; ·93 by ·75; ·93 by ·8.

2. Ucayali River, E. Peru, 10th Sept. P. L. Sclater, Esq. [P.]
(*E. Bartlett*).
1. Ucayali River (*E. B.*). Crowley Bequest.

Sub-Order **PICI**.

The eggs of the Woodpeckers are typically of a broad oval form, but some are of an elliptical and others of a spheroidal shape. They are always plain white. The shell is fine and smooth, and in most cases exhibits a large amount of gloss.

Family **PICIDÆ**.Sub-Family **PICINÆ**.Genus **GEOCOLAPTES**, Swains.**Geocolaptes olivaceus** (Gm.).

Geocolaptes olivaceus, *Sharpe, ed. Layard's Birds S. Africa*, p. 187 (1875-84); *Butler, Feilden & Reid, Zool.* 1882, p. 208; *Hargitt, Cat. Birds B. M.* xviii. p. 9 (1890); *Sharpe, Hand-l.* ii. p. 200 (1900).

The eggs of the Ground Woodpecker in the Collection are excessively glossy and measure respectively: 1·08 by ·85; 1·09 by ·82; 1·11 by ·79; 1·12 by ·82.

4. Newcastle, Natal, 2nd Aug. (*E. A. Crowley Bequest.*
Butler).

Genus COLAPTES, *Swains*.

The eggs of the Woodpeckers of this genus are highly glossy.

Colaptes luteus, *Bangs*.

- Colaptes auratus* (*nec Linn.*), *Ross, Nat. Hist. Rev.* 1862, p. 278; *id. Canad. Nat.* vii. p. 143 (1862); *Blakiston, Ibis*, 1862, p. 3; *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 575, part. (1874); *Coues, Birds N.-West*, p. 292 (1874); *Hargitt, Cat. Birds B. M.* xviii. p. 12, part. (1890); *Bendire, Life-Hist. N.-Amer. Birds*, ii. p. 129 (1895).
Colaptes auratus luteus, *Bangs, Auk*, xv. p. 177 (1898).
Colaptes luteus, *Sharpe, Hand-l.* ii. p. 201 (1900).

The eggs of the Golden-winged Woodpecker measure from 1 to 1·23 in length, and from ·78 to ·91 in breadth.

Genus **ALOPHONERPES**, *Reichenb.*

Alophonerpes pulverulentus (*Temm.*).

Hemilophus pulverulentus, *Hargitt, Cat. Birds B. M.* xviii. p. 494 (1890); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 315 (1890); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 71 (1895); *Nehr. Kat. Eiersamml.* p. 168 (1899).

Alophonerpes pulverulentus, *Sharpe, Hand-l.* ii. p. 230 (1900).

Two eggs of the Great Slaty Woodpecker in the Collection are somewhat spheroidal in shape, and moderately glossy. They measure respectively: 1.4 by 1.1; 1.4 by 1.12.

2. Thoungyin River, Tenasserim, 30th Hume Coll.
April (*C. T. Bingham*).

Genus **CEOPHLEUS**, *Cab. & Heine*.**Ceophlæus scapularis** (*Vig.*).

Ceophlæus scapularis, *Hargitt, Cat. Birds B. M.* xviii. p. 510 (1890);
Salv. & Godm. Biol. Centr.-Amer., Aves, ii. p. 450 (1895); *Nehrke*.
Kat. Eiersamml. p. 168 (1899); *Sharpe, Hand-l.* ii. p. 232 (1900).

The eggs of the White-billed Woodpecker in the Collection are of a very narrow oval shape, and extremely glossy. Four examples measure respectively: 1·15 by ·78; 1·28 by ·78; 1·19 by ·8; 1·1 by ·74.

2. Mazatlan, Mexico (*A. Forrer*).

Crowley Bequest.

2. Mazatlan.

Crowley Bequest.

Genus **DRYOTOMUS**, *Swains*.**Dryotomus pileatus** (*Linn.*).

Hylotomus pileatus, *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 550 (1874).

Dryotomus pileatus, *Hargitt, Cat. Birds B. M.* xviii. p. 515 (1890);
Sharpe, Hand-l. ii. p. 232 (1900).

Ceophlæus pileatus, *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 102, pl. i. fig. 5 (1895).

Four eggs of the Pileated Woodpecker measure respectively: 1·28 by ·95; 1·26 by ·98; 1·23 by ·97; 1·27 by ·98. They are exceedingly glossy.

4. N. America (*Field Coll.*).

Crowley Bequest.

Genus **PICUS**, *Linn.***Picus martius**, *Linn.*

Picus martius, *Thien, Fortpflanz. ges. Vög.* p. 98, tab. xiii. fig. 13 (1845-54); *Simpson, Ibis*, 1859, p. 264; *Hargitt, Cat. Birds B. M.* xviii. p. 518 (1890); *Seeböhm, Eggs of Brit. Birds*, p. 172, pl. 48. fig. 9 (1896); *Sharpe, Hand-l.* ii. p. 232 (1900).

Dryocopus martius, *Baedecker, Eier Eur. Vög.* tab. 11. fig. 3 (1855-63);
Dresser, Birds Eur. v. p. 3 (1871).

The eggs of the Great Black Woodpecker are of a peculiar pointed oval shape, and some are quite pyriform. They are highly glossy, and measure from 1·2 to 1·45 in length, and from ·9 to 1·05 in breadth.

4. Sweden (*H. W. Wheehwright*;
Tristram Coll.).

Order EURYLÆMIFORMES.

Family EURYLÆMIDÆ.

The eggs of the Broadbills are normally of a narrow oval form, and exhibit a moderate amount of gloss. Some of the species lay eggs of two or more distinct types of coloration.

Sub-Family CALYPTOMENINÆ.

Genus CALYPTOMENA, *Raffles*.

Calyptomena viridis, *Raffles*.

Calyptomena viridis, *Scl. Cat. Birds B. M.* xiv. p. 456 (1888); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 288 (1890); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 12 (1895); *Sharpe, Hand-l.* iii. p. 1 (1901).

The eggs of the Green Broadbill are of a plain light yellow colour. They measure from 1.05 to 1.21 in length, and from .74 to .82 in breadth.

3. Nwalabo, Tenasserim, 3rd April Hume Coll.
(*J. Darling*).
3. Nwalabo, 10th April (*J. D.*). Hume Coll.
2. Marudi, N.W. Borneo. Dr. Charles Hose [P.].

***Calyptomena whiteheadi*, Sharpe.**

Calyptomena whiteheadi, *Scl. Cat. Birds B. M.* xiv. p. 457 (1888); *Sharpe, Ibis*, 1889, p. 436; *id. Hand-l.* iii. p. 1 (1901).

An egg of Whitehead's Broadbill in the Collection is of the same colour as those of *C. viridis*, but is much larger, measuring 1·26 by ·97.

1. Mt. Kina Balu, N.W. Borneo, Crowley Bequest.
13th March (*J. Whitehead*).

Sub-Family EURYLÆMINÆ.

Genus **PSARISOMUS**, *Swains.*

***Psarisomus dalhousiæ* (*Jameson*).**

(Plate II. fig. 16.)

Psarisomus dalhousiæ, *Scl. Cat. Birds B. M.* xiv. p. 458 (1888); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 289 (1890); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 11 (1895); *Nehrk. Kat. Eiersamml.* p. 147 (1899); *Sharpe, Hand-l.* iii. p. 1 (1901).

The eggs of the Long-tailed Broadbill are either plain white, or white boldly spotted and blotched with brownish chestnut and lilac. They measure from ·95 to 1·14 in length, and from ·65 to ·76 in breadth.

Genus **SERILOPHUS**, *Swains.*

***Serilophus lunatus* (*Gould*).**

(Plate II. figs. 13 & 14.)

Serilophus lunatus, *Scl. Cat. Birds B. M.* xiv. p. 460 (1888); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 291 (1890); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 9 (1895); *Nehrk. Kat. Eiersamml.* p. 147 (1899); *Sharpe, Hand-l.* iii. p. 2 (1901).

The eggs of Gould's Broadbill are of three types: plain white;

white, speckled all over with numerous dots of purplish brown and lavender; or pink, speckled and spotted, chiefly at the broad end, with purplish red, lavender, and lilac. They measure from .85 to 1 in length, and from .62 to .69 in breadth.

Genus **EURYLÆMUS**, *Horsf.*

Eurylæmus javanicus, *Horsf.*

(Plate II. figs. 17 & 18.)

Eurylæmus javanicus, *Scl. Cat. Birds B. M.* xiv. p. 463 (1888); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 294 (1890); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 4 (1895); *Sharpe, Hand-l.* iii. p. 2 (1901).

The eggs of Horsfield's Broadbill appear to be of two types. In one they are cream-coloured, densely freckled with dull chestnut and lavender, the markings being more or less confluent at the broad end. In the other they are white, spotted and blotched all over with slaty-black and lavender-grey. Four examples measure respectively: 1 by .73; 1.06 by .75; 1 by .72; .99 by .72.

Genus **CYMBORHYNCHUS**, *Vigors*.**Cymborhynchus macrorhynchus** (*Gm.*).

(Plate II. fig. 19.)

Cymborhynchus macrorhynchus, *Sharpe, Ibis*, 1879, p. 264; *Scl. Cat. Birds B. M.* xiv. p. 468 (1888); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 294 (1890); *Blanf. Fauna Brit. Ind., Birds*, iii. p. 7 (1895); *Nehrke. Kat. Eiersamml.* p. 147, taf. iv. fig. 44 (1899); *Sharpe, Hand-l.* iii. p. 3 (1901).

The eggs of the Black-and-Red Broadbill appear to be of three types. In the commonest type they vary from cream-colour to rich buff, and are thickly and coarsely mottled with dull chestnut and lavender. In another they resemble the second type of egg of *Eurylæmus javanicus*, being white, spotted and blotched with slaty-black and slaty-grey, the markings at the broad end being denser than elsewhere and more or less confluent. In the third type, of which there is only one specimen in the Collection, the egg is of a plain bluish-white colour. This example is said to have been found in a nest together with two eggs of the first or common type. Specimens measure from 1·99 to 1·2 in length, and from ·7 to ·78 in breadth.

Order **MENURIFORMES**.Family **MENURIDÆ**.Genus **MENURA**, *Davies*.

The eggs of the Lyre-birds vary from a regular oval to an elliptical shape. The shell is somewhat rough in texture, slightly glossy, and pitted with minute pores.

The eggs of the three species of Lyre-birds are not distinguishable by any character. They are of a darker or paler purplish-grey colour, spotted and blotched, more densely at the broad end than elsewhere, with brown, umber-brown, and lavender.

Menura superba, Davies.

Menura superba, *Cab. J. f. O.* 1856, p. 132; *Gould, Handb. Birds Austr.* i. p. 298 (1865); *Ramsay, P. Z. S.* 1868, p. 49; *North, Nests & Eggs Austr. 1. Central Chile, Oct. Berkeley James Coll.

Genus **HYLACTES**, *King.***Hylactes megapodius** (*Kittl.*).

Hylactes megapodius, *Scl. Cat. Birds B. M.* xv. p. 349 (1890); *Lane, Ibis*, 1897, p. 45; *Scl. Bull. B. O. C.* vii. p. xxiii (1897); *Sharpe, Hand-l.* iii. p. 7 (1901).

An egg of the Turco measures 1·35 by 1·05.

1. Mansel, Central Chile (*A. A. Lane*). Berkeley James Coll.

Family CONOPOPHAGIDÆ.

Genus **CONOPOPHAGA**, *Vieill.***Conopophaga lineata** (*Wied.*).

(Plate III. fig. 12.)

Conopophaga lineata, *Scl. Cat. Birds B. M.* xv. p. 333 (1890); *Nehrke. Kat. Eiersamml.* p. 151 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 251 (1900); *Sharpe, Hand-l.* iii. p. 8 (1901).

An egg of the Lineated Gnat-eater in the Collection is spheroidal in shape, slightly glossy, and cream-coloured, smeared here and there with pale brownish pink. It measures ·83 by ·7. A second example is of a pointed oval shape, moderately glossy, and of a pinkish cream-colour, clouded, chiefly at the broad end, with pale rufous brown. It measures ·93 by ·7.

2. Iguapé, Brazil, 20th Oct. Crowley Bequest.

Family FORMICARIIDÆ.

Genus THAMNOPHILUS, Vieill.

Thamnophilus guttatus, Vieill.

(Plate III. fig. 9.)

Thamnophilus guttatus, *Scl. Cat. Birds B. M.* xv. p. 182 (1890); *Nehr. Kat. Eiersamml.* p. 150 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 248 (1900); *Sharpe, Hand-l.* iii. p. 10 (1901),

The eggs of the Spotted Bush-bird are of a narrow oval shape and moderately glossy. They are white, streakily blotched and spotted with two shades of rich brownish purple. Two specimens in the Collection have the markings evenly distributed over the shell; a third has them grouped chiefly at the broad end. They measure respectively: .95 by .62; .89 by .67; .9 by .66.

2. Brazil, 24th Oct.

Crowley Bequest.

1. Rio de Janeiro (*Nehrkorn Coll.*).

Crowley Bequest.

Thamnophilus major, Vieill.

(Plate III. fig. 1.)

Thamnophilus major, *Scl. & Huds. Argent. Orn.* i. p. 203 (1888); *Scl. Cat. Birds B. M.* xv. p. 186 (1890); *Nehr. Kat. Eiersamml.* p. 150 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 248 (1900); *Sharpe, Hand-l.* iii. p. 11 (1901).

The eggs of the Large Bush-bird are of an ordinary oval shape, and moderately glossy. They are white or cream-coloured, marked with blotches, spots, and lines of various shades of brownish-purple and lavender-grey. In one specimen the markings form a dense confluent cap at the broad end; in another they are sparingly distributed over the whole shell. Two examples measure respectively: 1.11 by .8; 1.11 by .8.

2. Argentine Republic.

Crowley Bequest.

Thamnophilus ruficollis, Spix.

(Plate III. fig. 2.)

Thamnophilus amazonicus, *Scl. Cat. Birds B. M.* xv. p. 199 (1890).

Thamnophilus ruficollis, *Sharpe, Hand-l.* iii. p. 14 (1901).

The eggs of the Red-necked Bush-bird in the Collection are of an extremely narrow oval form, and moderately glossy. They are creamy white, mottled, more densely at the broad end than elsewhere, with reddish brown and lilac. Two examples measure respectively: 1.04 by .65; 1.08 by .65.

2. British Guiana (*H. Whitely*).

Crowley Bequest.

Thamnophilus doliatus (Linn.).

Thamnophilus doliatus, *Thien. Fortpflanz. ges. Vög.* p. 321, tab. xxxi. fig. 13 (1845-54); *Scl. Cat. Birds B. M.* xv. p. 207 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 202 (1892); *Nehrk. Kat. Eiersamml.* p. 150 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 249 (1900); *Sharpe, Hand-l.* iii. p. 15 (1901).

The eggs of the Crafty Bush-bird are of a regular oval shape, and exhibit a small amount of gloss. They are creamy white in ground-colour, marked with rich brownish purple and lilac-red. In two specimens in the Collection the markings consist of distinct roundish spots, combined with some fine scrawls. In others they consist of streaky spots and blotches, combined with coarse scrawls and finer twisted lines. Five examples measure respectively: .94 by .67; 1 by .7; 1 by .7; .9 by .7; .9 by .69.

Genus DYSITHAMNUS, Cab.**Dysithamnus unicolor, Scl.**

Dysithamnus unicolor, *Scl. & Salv. P. Z. S.* 1879, p. 525, pl. xliii. fig. 9; *Scl. Cat. Birds B. M.* xv. p. 225 (1890); *Sharpe, Hand-l.* iii. p. 20 (1901).

An egg of the Colombian Plumbeous Bush-bird is of a regular oval shape, and possesses little gloss. It is creamy white, marked, chiefly round the middle portion of the shell, with rich brownish-purple and dark lavender spots and blotches. It measures .95 by .64.

1. Sta. Elena, Antioquia, U.S. Colombia Crowley Bequest.
(*T. K. Salmon*).

Genus **MYRMOTHERULA**, *Scl.*

Myrmotherula surinamensis (*Gm.*).

(Plate III. fig. 7.)

Myrmotherula surinamensis, *Scl. & Salv. P. Z. S.* 1879, p. 525; *Scl. Cat. Birds B. M.* xv. p. 231 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 209 (1892); *Sharpe, Hand-l.* iii. p. 20 (1901).

The eggs of the Surinam Bush-bird in the Collection are of a sharply pointed oval form and devoid of gloss. They are of an extremely pale green or greenish-white colour, and measure respectively: .78 by .63; .84 by .65.

2. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **CERCOMACRA**, *Scl.*

Cercomacra nigricans, *Scl.*

(Plate III. fig. 6.)

Cercomacra nigricans, *Scl. & Salv. P. Z. S.* 1879, p. 526; *Scl. Cat. Birds B. M.* xv. p. 267 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 215 (1892); *Sharpe, Hand-l.* iii. p. 29 (1901).

The eggs of Selater's Black Bush-bird in the Collection are of a blunt-oval shape and devoid of gloss. They are of a pink colour, mottled and blotched all over with dark purplish red and lavender. There are also some dark irregular lines scattered over the shell. Two specimens measure respectively: .85 by .6; .84 by .6.

2. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **PYRIGLENA**, *Cab.*

Pyriglena leucoptera (*Vieill.*).

(Plate III. fig. 4.)

Pyriglena leucoptera, *Scl. Cat. Birds B. M.* xv. p. 269 (1890); *Nehrk. Kat. Eiersamml.* p. 151 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 250 (1900); *Sharpe, Hand-l.* iii. p. 29 (1901).

Eggs of the White-winged Bush-bird in the Collection are of a

creamy-white colour, marked all over, but more densely at the broad end than elsewhere, with spots, blotches, and fine twisted lines of deep brownish purple and lilac-red. Two examples measure respectively : .99 by .73 ; 1.05 by .75.

2. Iguapé, Brazil, 25th Oct.

Crowley Bequest.

Genus **GRALLARIA**, *Vieill.*

Grallaria ruficeps, *Scl.*

Grallaria ruficeps, *Scl. & Salv. P. Z. S.* 1879, p. 526, pl. xliii. fig. 5 ; *Scl. Cat. Birds B. M.* xv. p. 317 (1890) ; *Sharpe, Hand-l.* iii. p. 42 (1901).

Eggs of the Red-headed Brown Ant-bird in the Collection are of an elliptical shape and slightly glossy. They are of a deep blue colour. Two examples measure respectively : 1.45 by 1.1 ; 1.43 by 1.06.

2. Medellin, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Grallaria ruficapilla, *Lafr.*

Grallaria ruficapilla, *Scl. & Salv. P. Z. S.* 1879, p. 527, pl. xliii. fig. 6 ; *Scl. Cat. Birds B. M.* xv. p. 320 (1890) ; *Sharpe, Hand-l.* iii. p. 43 (1901).

Eggs of the Chestnut-headed Ant-bird in the Collection are spheroidal in shape, almost devoid of all gloss, and of a dull green colour. They measure respectively : 1.18 by 1 ; 1.22 by 1.03.

2. Concordia, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **GRALLARICULA**, *Scl.*

Grallaricula cucullata (*Scl.*).

(Plate III. fig. 8.)

Grallaricula cucullata, *Scl. & Salv. P. Z. S.* 1879, p. 527 ; *Scl. Cat. Birds B. M.* xv. p. 327 (1890) ; *Sharpe, Hand-l.* iii. p. 45 (1901).

An egg of the Little Hooded Ant-bird in the Collection is spheroidal in shape and but slightly glossy. It is of a buff colour, marked with large confluent blotches of very deep reddish brown at the broad end, and with rufous and lavender specks and spots elsewhere. It measures .8 by .63.

1. Sta. Elena, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Family DENDROCOLAPTIDÆ.

The eggs of the species of Dendrocolaptidæ represented in the Collection are all unmarked, and vary in colour from white, through greenish white and pale greenish blue, to deep blue.

Sub-Family FURNARIINÆ.

The eggs of the birds of this sub-family are white and moderately glossy.

Genus **GEOSITTA**, *Swains.*

Geositta cunicularia (*Vieill.*).

Geositta cunicularia, *Scl. & Huds. Argent. Orn.* i. p. 165 (1888); *Scl. Cat. Birds B. M.* xv. p. 5 (1890); *Holland, Ibis*, 1892, p. 201; *Nehrke. Kat. Eiersamml.* p. 148 (1899); *Sharpe, Hand-l.* iii. p. 45 (1901).

The eggs of the Common Miner are of a somewhat pointed oval form, and measure from .92 to 1.02 in length, and from .72 to .75 in breadth.

6. Argentine Republic, Nov.

A. H. Holland, Esq. [C.].

Genus **FURNARIUS**, *Vieill.*

Furnarius rufus (*Gm.*).

Furnarius rufus, *Dalgleish, Proc. R. Phys. Soc. Edinb.* vi. p. 242 (1880-81); x. p. 79 (1888-90); *Scl. & Huds. Argent. Orn.* i. p. 167 (1888); *Scl. Cat. Birds B. M.* xv. p. 11 (1890); *Holland, Ibis*, 1892, p. 201; *Aplin, Ibis*, 1894, p. 181; *Nehrke. Kat. Eiersamml.* p. 148 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 241 (1900); *Sharpe, Hand-l.* iii. p. 46 (1901).

The eggs of the Red Oven-bird are of a regular oval shape, and measure from 1.06 to 1.21 in length, and from .8 to .87 in breadth.

5. Argentine Republic, Nov.

A. H. Holland, Esq. [C.].

Automolus ignobilis, *Scl. & Salv.*

Automolus ignobilis, *Scl. & Salv. P. Z. S.* 1879, p. 522; *Scl. Cat. Birds B. M.* xv. p. 89 (1890); *Sharpe, Hand-l.* iii. p. 65 (1901).

The egg of the Obscure Automolus in the Collection measures 1.16 by .86.

1. Frontino, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Automolus leucophthalmus (Wied).

Automolus leucophthalmus, *Scl. Cat. Birds B. M.* xv. p. 95 (1890)
von Ihering, Rev. Mus. Paulista, iv. p. 247 (1900); *Sharpe, Hand-l.*
 iii. p. 67 (1901).

An egg in the Crowley Bequest, on which the words "*Anabates sulphurascens*" are pencilled, appears to be referable to the White-eyed Automolus. It measures 1.2 by .82.

1. [Brazil.] Crowley Bequest.

Genus **THRIPADECTES**, *Scl.*

Thripadectes flammulatus (*Eyton*).

Thripadectes flammulatus, *Scl. & Salv. P. Z. S.* 1879, p. 521; *Scl. Cat. Birds B. M.* xv. p. 102 (1890); *Sharpe, Hand-l.* iii. p. 69 (1901).

The egg of the Flammulated Worm-eater in the Collection measures 1·3 by ·88.

1. Frontino, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Sub-Family SCLERURINÆ.

Genus **SCLERURUS**, *Swains.***Sclerurus umbretta** (*Licht.*).

Sclerurus umbretta, *Scl. Cat. Birds B. M.* xv. p. 114 (1890); *Goëldi, Ibis*, 1896, p. 305, figs. 3 & 4; *Nehrke. Kat. Eiersamml.* p. 149 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 247 (1900); *Sharpe, Hand-l.* iii. p. 72 (1901).

The eggs of the Brazilian Leaf-turner in the Collection are of an elliptical shape and devoid of gloss. They measure respectively: 1.06 by .78; 1.1 by .82.

2. Colonia Alpina, Rio de Janeiro, Dr. E. A. Goëldi [P.].
19th Dec.

Sub-Family MARGARORNITHINÆ.

The birds of this sub-family lay plain white eggs.

Genus **MARGARORNIS**, *Reichenb.***Margarornis perlata** (*Less.*).

Margarornis perlata, *Scl. & Salv. P. Z. S.* 1879, p. 523; *Scl. Cat. Birds B. M.* xv. p. 121 (1890); *Nehrke. Kat. Eiersamml.* p. 149 (1899); *Sharpe, Hand-l.* iii. p. 73 (1901).

The eggs of the Spotted Wood-hewer are of a sharply-pointed oval shape and slightly glossy. Two examples measure respectively: .75 by .51; .75 by .52.

2. Sta. Elena, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **PREMNOPLEX**, *Cherrie.***Premnoplex brunnescens** (*Scl.*).

Margarornis brunnescens, *Scl. Cat. Birds B. M.* xv. p. 123 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 170 (1891).
Premnoplex brunnescens, *Sharpe, Hand-l.* iii. p. 74 (1901).

An egg of the Brownish Wood-hewer in the Collection is closely elliptical in shape and devoid of gloss. It measures .85 by .66.

1. U.S. Colombia. Crowley Bequest.

Genus **PYGARRHICUS**, *Burm.***Pygarrhicus albigularis** (*King*).

Pygarrhicus albigularis, *Scl. Cat. Birds B. M.* xv. p. 126 (1890); *James, New List Chilean Birds*, p. 4 (1892); *Sharpe, Hand-l.* iii. p. 74 (1901).

The eggs of the White-throated Wood-hewer are of a pointed oval shape and moderately glossy. Three examples measure respectively: .85 by .67; .86 by .67; .87 by .66.

3. Central Chile, Nov.

Berkeley James Coll.

Sub-Family GLYPHORHYNCHINÆ.

The eggs of the birds of this sub-family are plain white.

Genus **GLYPHORHYNCHUS**, *Wied.*

Glyphorhynchus cuneatus (*Licht.*).

Glyphorhynchus castelnandi (*nec Des Murs*), *Scl. P. Z. S.* 1859, p. 141.
Glyphorhynchus cuneatus, *Scl. Cat. Birds B. M.* xv. p. 124 (1890);
Salv. & Godm. Biol. Centr.-Amer., Aves, ii. p. 175 (1891); *Sharpe, Hand-l.* iii. p. 74 (1901).

The eggs of the Wedge-billed Wood-hewer in the Collection are of a regular broad oval shape, and quite devoid of all gloss. They measure respectively: .8 by .5; .77 by .5.

2. Pallatanga, Ecuador, Dec.
 (*L. Fraser*).

Salvin-Godman Coll.

Genus **DENDROCICHLA**, *Gray.*

Dendrocichla anabatina, *Scl.*

Dendrocichla anabatina, *Scl. Cat. Birds B. M.* xv. p. 162 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 172 (1891); *Nehrk. Kat. Eiersamm.* p. 150 (1899).
Dendrocichla anabatina, *Sharpe, Hand-l.* iii. p. 74 (1901).

An egg of Sclater's Wood-hewer in the Collection is of an elliptical shape and slightly glossy. It measures 1.07 by .79.

1. Central America (*Nehrkorn Coll.*). Crowley Bequest.

Sub-Family DENDROCOLAPTINÆ.

The eggs of the species of *Dendrocolaptes* are plain white.

Genus **PICOLAPTES**, *Less.*

Picolaptes lacrymiger (*Des Murs*).

Picolaptes lacrymiger, *Scl. & Salv. P. Z. S.* 1879, p. 524; *Scl. Cat. Birds B. M.* xv. p. 148 (1890); *Sharpe, Hand-l.* iii. p. 83 (1901).

The egg of Des Murs's Wood-hewer in the Collection is elliptical in form, and exhibits a slight amount of gloss. It measures 1.02 by .77.

1. Frontino, Antioquia, U.S. Colombia
 (*T. K. Salmon*).

Salvin-Godman Coll.

Picolaptes angustirostris (*Vieill.*).

Picolaptes angustirostris, *Scl. & Huds. Argent. Orn.* i. p. 201 (1888); *Scl. Cat. Birds B. M.* xv. p. 155 (1890); *Nehr. Kat. Eiersamml.* p. 150 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 247 (1900); *Sharpe, Hand-l.* iii. p. 85 (1901).

The eggs of the Narrow-billed Wood-hewer are of a blunt oval form, and almost devoid of all gloss. Three examples measure respectively: 1.01 by .75; 1 by .74; 1.04 by .78.

3. Argentine Republic.

Crowley Bequest.

Genus **DRYMORNIS**, *Eyton*.**Drymornis bridgesi** (*Eyton*).

Drymornis bridgesi, *Scl. & Huds. Argent. Orn.* i. p. 199 (1888); *Scl. Cat. Birds B. M.* xv. p. 157 (1890); *Nehr. Kat. Eiersamml.* p. 150 (1899); *Sharpe, Hand-l.* iii. p. 85 (1901).

The egg of Bridges' Wood-hewer in the Collection is of an ordinary oval form and moderately glossy. It measures 1.22 by .92.

1. [Argentine Republic.]

Crowley Bequest.

Genus **XIPHORHYNCHUS**, *Swains.***Xiphorhynchus trochilirostris** (*Licht.*).

Xiphorhynchus trochilirostris, *Scl. & Salv. P. Z. S.* 1879, p. 524; *Scl. Cat. Birds B. M.* xv. p. 159 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 188 (1891); *Sharpe, Hand-l.* iii. p. 86 (1901).

The egg of the Slender-billed Wood-hewer in the Collection is spheroidal in shape, and exhibits a small amount of gloss. It measures .92 by .82.

1. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **DENDROCOLAPTES**, *Herm.***Dendrocolaptes validus**, *Tsch.*

Dendrocolaptes validus, *Scl. & Salv. P. Z. S.* 1879, p. 523; *Scl. Cat. Birds B. M.* xv. p. 172 (1890); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 191 (1891); *Sharpe, Hand-l.* iii. p. 87 (1901).

The egg of the Black-spotted Wood-hewer in the Collection is elliptical in shape and devoid of gloss. It measures 1.13 by .81.

1. Frontino, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Division OLIGOMYODÆ.

Family TYRANNIDÆ.

Genus AGRIORNIS, Gould.

Agriornis livida (Kittl.).

(Plate III. fig. 19.)

Agriornis livida, *Scl. Cat. Birds B. M.* xiv. p. 4 (1888); *James, New List Chilean Birds*, p. 3 (1892); *Sharpe, Hand-l.* iii. p. 88 (1901).

The egg of the Livid Tyrant-bird in the Collection is spheroidal in shape and slightly glossy. It is of a pale green colour, marked all over, but more densely at the broad end than elsewhere, with spots and small blotches of reddish brown and pale lavender. It measures 1.12 by .91.

1. Central Chile (*Paulsen*).

Berkeley James Coll.

Agriornis solitaria, *Scl.*

(Plate III. fig. 17.)

Agriornis solitaria, *Scl. P. Z. S.* 1860, p. 78; *id. Cat. Birds B. M.* xiv. p. 7 (1888); *Sharpe, Hand-l.* iii. p. 89 (1901).

The eggs of the Solitary Tyrant-bird are of a somewhat narrow oval shape and devoid of gloss. They are cream-coloured, marked with specks and small spots of lilac-red and lavender. Five examples measure from 1.16 to 1.3 in length, and from .85 to .9 in breadth.

5. Quito (*L. Fraser*).

Salvin-Godman Coll.

Genus TÆNIOPTERA, *Bp.**Tænioptera nengeta* (*Linn.*).

Tænioptera nengeta, *Dalyleish, Proc. R. Phys. Soc. Edin.* vi. p. 243, pl. vii. fig. 1 (1880-81); *Scl. Cat. Birds B. M.* xiv. p. 11 (1888); *id. & Huds. Argent. Orn.* i. p. 114 (1888); *Aplin, Ibis*, 1894, p. 175, pl. v. figs. 3 & 4; *von Ihering, Rev. Mus. Paulista*, iv. p. 223 (1900); *Sharpe, Hand-l.* iii. p. 89 (1901).

The eggs of the Pepoaza Tyrant-bird are of a regular oval shape and moderately glossy. They are of a pinkish-white colour, sparingly spotted, almost entirely at the broad end, with lilac-red, deep purplish red, and lavender. Four examples measure respectively: 1.15 by .8; 1.05 by .8; 1.1 by .8; 1.08 by .8.

2. Uruguay, 8th Nov.
2. Argentine Republic.

O. V. Aplin, Esq. [P].
Crowley Bequest.

Tænioptera irupero (Vieill.).

(Plate III. fig. 15.)

Tænioptera irupero, *Dalgleish, Proc. R. Phys. Soc. Edin.* vi. p. 244, pl. vii. fig. 2 (1880-81); *Scl. Cat. Birds B. M.* xiv. p. 13 (1888); *id. & Huds. Argent. Orn.* i. p. 118 (1888); *Aplin, Ibis*, 1894, p. 176; *Nehrke. Kat. Eiersamml.* p. 136 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 223 (1900); *Sharpe, Hand-l.* iii. p. 90 (1901).

The eggs of the Argentine Tyrant-bird are moderately glossy, and appear to be of two types. Two specimens in the Collection are of a plain cream-colour. Another is white, rather densely speckled, especially at the broad end, with lilac-red and lavender. They measure respectively: .85 by .67; .88 by .7; .98 by .7.

| 3. Central Chile, Oct. | Berkeley James Coll. |

Genus **PLATYRHYNCHUS**, *Desm.*

Platyrhynchus cancrominus, *Sci. & Salv.*

(Plate IV. fig. 10.)

Platyrhynchus cancrominus, *Sci. Cat. Birds B. M.* xiv. p. 66 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 5 (1888); *Sharpe, Hand-l.* iii. p. 100 (1901).

An egg of the Boat-billed Tyrant-bird is of a broad oval form and devoid of gloss. It is of a pinkish-white colour, marked round the broad end with a zone of more or less confluent spots and specks of pale lilac-red and lavender. A few specks of the same colours are scattered over the remainder of the shell. It measures .66 by .51.

1. British Honduras (*F. Blancaneaux*). Salvin-Godman Coll.

Genus **RHYNCHOCYCLUS**, *Cab. & Heine*.

Rhynchocyclus fulvipectus (*ScL.*).

(Plate IV. fig. 9.)

Rhynchocyclus fulvipectus, *ScL. & Salv. P. Z. S.* 1879, p. 513; *ScL. Cat. Birds B. M.* xiv. p. 167 (1888); *Sharpe, Hand-l.* iii. p. 101 (1901).

The eggs of the Fulvous-breasted Tyrant-bird are of an elongated blunt oval form and but slightly glossy. They are white, freckled with minute yellowish-brown specks, chiefly disposed round the broad end. They measure respectively: .96 by .66; .94 by .67.

2. Frontino, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Rhynchocyclus cinereiceps (*ScL.*).

(Plate IV. fig. 13.)

Rhynchocyclus cinereiceps, *Nehr. J. f. O.* 1879, p. 356; *id. Kat. Eiersamml.* p. 140 (1899); *ScL. Cat. Birds B. M.* xiv. p. 169 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 10 (1888); *Sharpe, Hand-l.* iii. p. 102 (1901).

The eggs of the Grey-headed Tyrant-bird are of a pointed oval shape and devoid of gloss. They appear to be variable in coloration. Examples taken by Blancaneaux are white, very sparingly marked with dark reddish-brown or black specks. A specimen from the Nehr Korn Collection is cream-coloured, marked with a broad zone of lilac-red spots round the larger end. Five eggs measure respectively: .8 by .56; .82 by .54; .8 by .57; .8 by .56; .82 by .58.

4. British Honduras (*F. Blancaneaux*). Salvin-Godman Coll.
1. Veragua (*Nehr Korn Coll.*). Crowley Bequest.

Genus **TODIROSTRUM**, *Less.*

Todirostrum cinereum (*Linn.*).

Todirostrum cinereum, *ScL. & Salv. P. Z. S.* 1879, p. 512; *ScL. Cat. Birds B. M.* xiv. p. 69 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 12 (1888); *Nehr. Kat. Eiersamml.* p. 138 (1899); *von Thering, Rev. Mus. Paulista*, iv. p. 227 (1900); *Sharpe, Hand-l.* iii. p. 103 (1901).

The eggs of the Cinereous Tyrant-bird are of a pointed oval shape, devoid of gloss, and of a plain white colour. They measure from .64 to .67 in length, and .41 to .47 in breadth. Other specimens from the Crowley Collection are white, speckled with very pale rufous at the broad end.

Genus **EUSCARTHMUS**, *Wied.***Euscarthmus gularis** (*Temm.*).

(Plate IV. fig. 15.)

Euscarthmus gularis, *Scl. & Huds. Argent. Orn.* i. p. 136 (1888); *Scl. Cat. Birds B. M.* xiv. p. 81 (1888); *Nehrck. Kat. Eiersamml.* p. 138 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 228 (1900); *Sharpe, Hand-l.* iii. p. 105 (1901).

The eggs of the Red-throated Tyrant-bird in the Collection are of a regular oval shape and devoid of gloss. They are white, marked with spots and small blotches of dull chestnut and lilac-red. They measure respectively: .68 by .49; .7 by .5.

2. Ararangua, Sta. Catharina, Brazil, Crowley Bequest.
4th Dec.

Euscarthmus granadensis (*Hartl.*).

Euscarthmus granadensis, *Scl. Cat. Birds B. M.* xiv. p. 82 (1888); *Sharpe, Hand-l.* iii. p. 106 (1901).

The eggs of the Colombian Tyrant-bird are of an elliptical shape, moderately glossy, and of a pale yellowish-white colour. Two examples measure respectively: .74 by .59; .71 by .53.

2. New Granada. Crowley Bequest.

Genus **HAPALOCERCUS**, *Cab.***Hapalocercus flaviventris** (*d'Orb. & Lafr.*).

Hapalocercus flaviventris, *Scl. & Huds. Argent. Orn.* i. p. 137 (1888); *Scl. Cat. Birds B. M.* xiv. p. 94 (1888); *James, New List Chilean Birds*, p. 3 (1892); *von Ihering, Rev. Mus. Paulista*, iv. p. 229 (1900); *Sharpe, Hand-l.* iii. p. 109 (1901).

The eggs of the Reed Tyrant-bird are of a regular oval shape and slightly glossy. They are of a dark cream-colour without markings. Four examples measure respectively: .68 by .49; .66 by .5; .68 by .49; .64 by .5.

4. Central Chile (*Landbeck*). Berkeley James Coll.

Hapalocercus hollandi, *Scl.*

Hapalocercus hollandi, *Scl. Ibis*, 1896, p. 316; *Holland, Ibis*, 1897, p. 167; *Sharpe, Hand-l.* iii. p. 110 (1901).

The eggs of Holland's Tyrant-bird are of a regular oval shape, almost devoid of all gloss, and of a pale creamy-white colour. They measure respectively: .62 by .5; .64 by .46.

2. Argentine Republic, Jan. A. H. Holland, Esq. [C.]
VOL. III. o

Genus **HABRURA**, *Cab. & Heine*.**Habrura pectoralis** (*Vieill.*).

Habrura pectoralis, *Scl. Cat. Birds B. M.* xiv. p. 96 (1888); *id. & Huds. Argent. Orn.* i. p. 138 (1888); *Holland, Ibis*, 1893, p. 486; *Sharpe, Hand-l.* iii. p. 110 (1901).

The eggs of the Narrow-tailed Tyrant-bird are of a pointed oval shape, almost devoid of gloss, and of a pale cream-colour. They measure from .63 to .66 in length, and from .43 to .49 in breadth.

Genus **MIONECTES**, *Cab.***Mionectes striaticollis** (*d'Orb. & Lafr.*).

Mionectes striaticollis, *Scl. & Salv. P. Z. S.* 1879, p. 512; *Scl. Cat. Birds B. M.* xiv. p. 111 (1888); *Sharpe, Hand-l.* iii. p. 113 (1901).

Two eggs of the Stripe-necked Tyrant-bird in the Collection are of a regular oval shape, slightly glossy, and of a plain white colour. They measure respectively: .81 by .55; .8 by .56.

2. Sta. Elena, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **MYIOPAGIS**, *Salv. & Godm.***Myiopagis placens**, *Scl.*

(Plate IV. fig. 16.)

Elainea placens, *Scl. Cat. Birds B. M.* xiv. p. 148 (1888); *Nehrke, Kat. Eiersamml.* p. 139 (1899).

Myiopagis placens, *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 26 (1888); *Sharpe, Hand-l.* iii. p. 116 (1901).

The eggs of Scater's Tyrant-bird in the Collection are of a regular oval shape and devoid of gloss. They are cream-coloured, streaked and spotted, more densely at the broad end where the markings form a wide zone, with purplish brown and deep lavender. They measure respectively: .71 by .54; .72 by .51.

2. British Honduras, May (*F. Blacaneaux*). Salvin-Godman Coll.

Genus **ELAINEA**, *Sundev.***Elainea pagana** (*Licht.*).

(Plate IV. fig. 17.)

Elainea pagana, *Scl. & Salv. P. Z. S.* 1879, p. 513; *Scl. Cat. Birds B. M.* xiv. p. 137 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 34 (1888); *Nehrke, Kat. Eiersamml.* p. 139 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 230 (1900); *Sharpe, Hand-l.* iii. p. 122 (1901).

The eggs of the Rustic Tyrant-bird are of a broad oval shape and exhibit but little gloss. They are of a pinkish cream-colour, speckled and spotted, almost entirely at the broad end where the markings form a cap or interrupted zone, with purplish red or lilac-red and lavender. They vary much in size, measuring from .7 to .84 in length, and from .56 to .65 in breadth.

Genus **MYIOZETETES**, *Scl.*

Myiozetetes cayennensis (*Linn.*).

(Plate IV. fig. 21.)

Myiozetetes texensis (*nee Giraud*), *Scl. & Salv. P. Z. S.* 1879, p. 513.
Myiozetetes cayennensis, *Scl. Cat. Birds B. M.* xiv. p. 160 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 40 (1888); *Nehr. Kat. Eiersamml.* p. 139 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 233 (1900); *Sharpe, Hand-l.* iii. p. 126 (1901).

The eggs of the Cayenne Tyrant-bird are of a regular oval shape and devoid of gloss. They are of a white colour, spotted and blotched with chocolate-brown and lilac-grey, the markings being denser at the broad end than elsewhere. Four examples measure respectively: .8 by .61; .82 by .62; .96 by .67; .97 by .66.

2. Medellin, Antioquia, U.S. Co- Salvin-Godman Coll.
lombia (*T. K. Salmon*).
2. Venezuela (*Nehr. Coll.*). Crowley Bequest.

Myiozetetes similis (*Spix*).

Myiozetetes texensis, *Scl. & Salv. Ibis*, 1859, p. 123, pl. v. fig. 5; *Owen, Ibis*, 1861, p. 64; *Scl. Cat. Birds B. M.* xiv. p. 162 (1888); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 254, pl. i. fig. 22 (1895); *Nehr. Kat. Eiersamml.* p. 139 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 233 (1900).

Myiozetetes similis, *Scl. Cat. Birds B. M.* xiv. p. 161 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 41 (1889); *Nehr. Kat. Eiersamml.* p. 139 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 233 (1900); *Sharpe, Hand-l.* iii. p. 126 (1901).

The eggs of Giraud's Tyrant-bird are normally of a narrow oval shape and exhibit a varying amount of gloss. They are white, marked with spots and small blotches of purplish red, lilac-red, and lavender. In the majority of specimens, the markings are more dense at the broad end and form an irregular cap, but in others they are evenly distributed over the entire shell. Examples measure from .85 to 1.02 in length, and from .67 to .71 in breadth.

Genus **PITANGUS**, *Swains.*

Pitangus derbianus (*Kaup*).

Pitangus derbianus, *Scl. & Salv. Ibis*, 1859, p. 120, pl. v. fig. 3; *Owen, Ibis*, 1861, p. 63; *Scl. Cat. Birds B. M.* xiv. p. 175 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 43 (1889); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 251, pl. i. figs. 20 & 21 (1895); *Nehr. Kat. Eiersamml.* p. 140 (1899); *Sharpe, Hand-l.* iii. p. 127 (1901).

The eggs of Lord Derby's Tyrant-bird are of a broad, pointed oval shape, and slightly glossy. They are cream-coloured, and while some are marked with spots and small blotches of dark umber-brown and lavender, others are marked with huge confluent blotches of light reddish brown together with spots of dark reddish brown and lavender most densely at the broad end, where the markings often form a cap. Specimens measure from 1.06 to 1.25 in length, and from .81 to .9 in breadth.

Pitangus sulphuratus (Linn.).

Pitangus sulphuratus, *Sclater, Cat. Birds B. M.* xiv. p. 177 (1888), part.;
Sharpe, Hand-l. iii. p. 127 (1901).

An egg of the Amazonian Sulphur-breasted Tyrant-bird in the Collection is of a regular oval form, with no gloss, and is cream-coloured, with a few dark umber and lavender blotches or spots, which are almost confined to the broader end. The measurements are 1·08 by ·79 inch.

1. British Guiana.

W. Radcliffe Saunders, Esq.
 [P.].

Pitangus maximiliani (Cub. & Heine).

(Plate V. fig. 1.)

Tyrannus sulphuratus, *d'Orb. Voy., Ois.* pl. 39. fig. 3, & pl. 49. fig. 3 (1835-44).

Pitangus sulphuratus, *Scl. Cat. Birds B. M.* xiv. p. 176, part. (1888);
Nehrke, Kat. Eiersamml. p. 140 (1899).

Pitangus sulphuratus maximiliani, *von Ihering, Rev. Mus. Paulista*, iv. p. 234 (1900).

Pitangus maximiliani, *Sharpe, Hand-l.* iii. p. 127 (1901).

The eggs of Maximilian's Tyrant-bird in the Collection are of a regular oval shape, slightly glossy and cream-coloured, spotted with dark umber-brown and lavender. They measure respectively: 1·08 by ·8; 1·12 by ·83; 1·12 by ·85; 1·1 by ·85; 1·1 by ·8.

Pitangus bellicosus, *Dalgleish; Proc. R. Phys. Soc. Edin.* vi. p. 247, pl. viii. fig. 1 (1880-1).

Pitangus bolivianus, *Scl. Cat. Birds B. M.* xiv. p. 177 (1888); *id. & Huds. Argent. Orn.* i. p. 147 (1888); *Holland, Ibis*, 1892, p. 200; *Aplin, Ibis*, 1894, p. 179; *Nehrke, Kat. Eiersamml.* p. 140 (1899); *Sharpe, Hand-l.* iii. p. 127 (1901).

Pitangus sulphuratus bolivianus, *von Ihering, Rev. Mus. Paulista*, iv. p. 234 (1900).

The eggs of the Bienteveo Tyrant-bird are of a somewhat pointed oval shape and but very slightly glossy. They vary from cream-colour to pale buff, spotted, blotched, and otherwise marked with chocolate-brown and lavender. The markings are almost entirely confined to the broad end. Specimens measure from 1·1 to 1·2 in length, and from ·77 to ·87 in breadth.

Genus **MEGARHYNCHUS**, *Thunb.***Megarhynchus pitangua** (*Linn.*).

(Plate V. fig. 4.)

Megarhynchus pitangua, *Sci. Cat. Birds B. M.* xiv. p. 189 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 51 (1889); *Nehr. Cat. Eiersamml.* p. 140 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 235 (1900); *Sharpe, Hand-l.* iii. p. 130 (1901).

The eggs of the Pitangua Tyrant-bird in the Collection are of a regular oval shape, slightly glossy and cream-coloured, densely speckled, spotted, and blotched with reddish brown and lavender. The markings are more dense at the broad end than elsewhere, forming at that part an irregular cap. Two examples measure respectively: 1·15 by ·82; 1·11 by ·82.

4. Costa Rica, 14th May.

C. F. Underwood, Esq. [C.].

Megarhynchus chrysocephalus (*Tschudi*).

Myiodynastes chrysocephalus, *Sci. Cat. Birds B. M.* xiv. p. 187 (1888).
Megarhynchus chrysocephalus, *Sharpe, Hand-l.* iii. p. 130 (1901).

Of the eggs of the Golden-headed Tyrant-bird in the Collection, two specimens are inseparable from those of *Myiodynastes luteiventris*, and two very closely resemble the eggs of *Pitangus caudifasciatus*. Four examples measure respectively: 1·1 by ·71; 1·03 by ·73; 1·03 by ·72; 1·05 by ·71.

4. Venezuela (*Gugenheimer*).

Crowley Bequest.

Genus **ONYCHORHYNCHUS**, *Fischer*.**Onychorhynchus mexicanus** (*Sci.*).

(Plate V. fig. 12.)

Muscivora mexicana, *Sci. Cat. Birds B. M.* xiv. p. 193 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 53 (1889); *Nehr. Kat. Eiersamml.* p. 141 (1899).
Onychorhynchus mexicanus, *Sharpe, Hand-l.* iii. p. 130 (1901).

The eggs of the Fan-crested Tyrant-bird are of a regular oval shape and devoid of gloss. They are of a pinkish cream-colour, very thickly streaked and smeared with deep vinous brown, to such an extent in some specimens that little of the ground-colour remains visible. Four examples measure respectively: ·8 by ·58; ·81 by ·56; ·85 by ·55; ·84 by ·55.

4. Panama (*McLeannan*).

Salvin-Godman Coll.

Genus **MYIOBIUS**, Gray.**Myiobius barbatus** (Gm.).

Myiobius barbatus, *Scl. Cat. Birds B. M.* xiv. p. 199 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 56 (1889); *von Ihering, Rev. Mus. Paulista*, iv. p. 236 (1900); *Sharpe, Hand-l.* iii. p. 131 (1901).

Two eggs of the Yellow-rumped Tyrant-bird in the Collection appear to be quite indistinguishable from those of the next species. One example measures .7 by .55.

2. Rio Janeiro.

Alexander Fry, Esq. [P.].

Myiobius navius (Bodd.).

(Plate V. fig. 6.)

Myiobius navius, *Scl. & Salv. P. Z. S.* 1879, p. 514; *Scl. Cat. Birds B. M.* xiv. p. 209 (1888); *id. & Huds. Argent. Orn.* i. p. 151 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 58 (1889); *Nehrke. Kat. Eiersamml.* p. 141 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 236 (1900); *Sharpe, Hand-l.* iii. p. 133 (1901).

The eggs of the Little Brown Tyrant-bird are of a pointed oval shape and almost devoid of gloss. They are of a rich cream-colour, spotted and blotched, chiefly over the larger half of the egg, with reddish brown, lilac-red, and lavender. They measure from .65 to .7 in length, and from .5 to .52 in breadth.

Genus **PYROCEPHALUS**, Gould.**Pyrocephalus rubineus** (Bodd.).

(Plate V. fig. 5.)

Pyrocephalus rubineus, *Huds. P. Z. S.* 1872, p. 808; *Tacz. P. Z. S.* 1877, p. 752; *Scl. & Salv. P. Z. S.* 1879, p. 515; *Dalgleish, Proc. R. Phys. Soc. Edin.* viii. p. 82 (1883-5); *Scl. Cat. Birds B. M.* xiv. p. 211 (1888); *id. & Huds. Argent. Orn.* i. p. 152 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 60 (1889); *Nehrke. Kat. Eiersamml.* p. 141 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 236 (1900); *Sharpe, Hand-l.* iii. p. 134 (1901).

The eggs of the Scarlet Tyrant-bird are of a pointed oval shape and devoid of gloss. They are cream-coloured, spotted and blotched with sepia-brown and deep lavender-grey, the markings being often disposed most densely round the larger end or the middle of the egg, where they form a very broad but irregular zone. They measure from .65 to .7 in length, and from .5 to .57 in breadth.

Empidonax flavescens, Lawr.

(Plate V. fig. 9.)

Empidonax flavescens, *Scl. Cat. Birds B. M.* xiv. p. 231 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 75 (1889); *Sharpe, Hand-l.* iii. p. 139 (1901).

The eggs of the Yellow Tyrant-bird in the Collection are of a blunt oval shape, devoid of gloss, and of a pinkish cream-colour, boldly spotted and blotched, especially at the broad end, with chestnut, lilac-red, and lavender. There are also a few black specks at the broad end. Two examples measure respectively: .69 by .55; .7 by .58.

2. Costa Rica, 4th June (C. F. Crowley Bequest.
Underwood).

Empidonax hammondi (De Vesey).

Empidonax hammondi, *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 383 (1888); *Scl. Cat. Birds B. M.* xiv. p. 232 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 76 (1889); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 315, pl. ii. fig. 32 (1895); *Nehr. Kat. Eiersamml.* p. 142 (1899); *Sharpe, Hand-l.* iii. p. 139 (1901).

An egg of Hammond's Tyrant-bird in the Collection is of a regular oval shape, moderately glossy, and plain white. It measures .65 by .5.

1. North America (*Nehrkorn Coll.*). Crowley Bequest.

Genus HORIZOPUS, Oberh.**Horizopus virens (Linn.).**

Contopus virens, *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 357 (1874); *Scl. Cat. Birds B. M.* xiv. p. 238 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 84 (1889); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 288, pl. ii. figs. 18 & 19 (1895); *Nehr. Kat. Eiersamml.* p. 142 (1899).

Horizopus virens, *Sharpe, Hand-l.* iii. p. 141 (1901).

The eggs of the Wood Pewee are of a pointed oval shape, and almost devoid of gloss. They are cream-coloured, spotted and blotched, chiefly in the form of a band round the broad end, with rich purplish brown and deep lavender-grey. On some specimens the markings are dense and more or less confluent; on others sparse and detached from each other. Examples measure from .7 to .75 in length, and from .52 to .55 in breadth.

Genus **MYIARCHUS**, *Cab.***Myiarchus crinitus** (*Linn.*).

Myiarchus crinitus, *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 334 (1874); *Scl. Cat. Birds B. M.* xiv. p. 247 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 87 (1889); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 259, pl. ii. figs. 8 & 9 (1895); *Nehrck. Kat. Eiersamml.* p. 142 (1899); *Sharpe, Hand-l.* iii. p. 144 (1901).

The eggs of the Great Crested Tyrant-bird vary from an oval to a spheroidal shape, and are slightly glossy. The ground-colour ranges from cream-colour to pale buff, and the egg is more or less densely marked with blotches, longitudinal streaks and scratches, and intricate tangles of lines of umber-brown, purple, and lavender-grey. On some examples lines preponderate, on others streaks and blotches. Specimens measure from .84 to .94 in length, and from .67 to .69 in breadth.

- Myiarchus oberi*, *Hartert, Ibis*, 1893, p. 298; *Sharpe, Hand-l.* iii. p. 145 (1901).

The eggs of Ober's Tyrant-bird are inseparable from those of *M. tyrannulus*. Four examples measure respectively: .9 by .73; .95 by .72; .94 by .71; .9 by .73.

4. Grenada, W. Indies (*J. G. Wells*). Crowley Bequest.

Myiarchus ferox (*Gm.*).

- Myiarchus ferox*, *Scl. Cat. Birds B. M.* xiv. p. 253 (1888); *id. & Huds. Argent. Orn.* i. p. 156 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*,

ii. p. 92 (1889); *Nehr. Kat. Eiersamml.* p. 142 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 237 (1900); *Sharpe, Hand-l.* iii. p. 145 (1901).

An egg of the Fierce Tyrant-bird in the Collection resembles many of the eggs of *M. crinitus*, and measures .93 by .67.

1. Argentine Republic.

Crowley Bequest.

***Myiarchus lawrencei* (Giraud).**

Myiarchus lawrencei, *Scl. Cat. Birds B. M.* xiv. p. 256 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 94 (1889, part.); *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 270 (1895); *Nehr. Kat. Eiersamml.* p. 142 (1899); *Sharpe, Hand-l.* iii. p. 146 (1901).

The eggs of Lawrence's Tyrant-bird resemble those of *M. crinitus*. Two examples measure respectively: .8 by .65; .82 by .68.

2. North America.

Crowley Bequest.

***Myiarchus nigricapillus*, Ridgw.**

(Plate V. fig. 11.)

Myiarchus nigricapillus, *Scl. Cat. Birds B. M.* xiv. p. 257 (1888); *Sharpe, Hand-l.* iii. p. 146 (1901).

Myiarchus lawrencii, *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 94 (1889, part.).

The eggs of the Black-capped Tyrant-bird resemble in general character those of *M. crinitus* and the other species of the genus already described, but the markings are denser and on the whole smaller and more delicate. Three examples measure respectively: .8 by .62; .82 by .62; .8 by .61.

3. Costa Rica, 15th May.

C. F. Underwood, Esq. [C.].

***Myiarchus stolidus* (Gosse).**

(Plate V. fig. 13.)

Myiobius stolidus, *Gosse, Birds Jamaica*, p. 168 (1847).

Myiarchus stolidus, *Scl. Cat. Birds B. M.* xiv. p. 260 (1888); *Nehr. Kat. Eiersamml.* p. 142 (1899); *Sharpe, Hand-l.* iii. p. 147 (1901).

The eggs of the Foolish Tyrant-bird resemble those of *M. crinitus*. Three specimens measure respectively: .92 by .65; .79 by .61; .85 by .67.

3. Jamaica.

Salvin-Godman Coll.

***Myiarchus barbirostris* (Swains.).**

(Plate V. fig. 7.)

Myiobius tristis, *Gosse, Birds Jamaica*, p. 167 (1847).

Blacicus barbirostris, *Scl. Cat. Birds B. M.* xiv. p. 244 (1888).

Myiarchus barbirostris, *Sharpe, Hand-l.* iii. p. 147 (1901).

The eggs of the Black-billed Tyrant-bird are of a regular oval shape, and almost devoid of gloss. They are of a creamy-white colour, spotted, chiefly round the broad end, with rusty brown and lilac-grey. Two examples measure respectively: .7 by .52; .72 by .53.

2. Jamaica.

Crowley Bequest.

Genus **EMPIDONOMUS**, *Cab. & Heine*.

Empidonomus varius (*Vieill.*).

(Plate V. fig. 16.)

Empidonomus varius, *Scl. Cat. Birds B. M.* xiv. p. 265 (1888); *Nehrk. Kat. Eiersamml.* p. 143 (1889); *von Ihering, Rev. Mus. Paulista*, iv. p. 237 (1900); *Sharpe, Hand-l.* iii. p. 148 (1901).

The eggs of the Striated Tyrant-bird in the Collection are of a blunt oval form, and almost devoid of all gloss. They are cream-coloured, marked with more or less confluent streaks and blotches of rich umber-brown, purple, and lavender-grey. They measure respectively: .83 by .63; .82 by .62.

2. Iguapé, Brazil, 11th Oct.

Crowley Bequest.

Empidonomus inca (*Scl.*).

(Plate V. figs. 14 & 15.)

Empidonomus aurantio-atro-cristatus, *Scl. Cat. Birds B. M.* xiv. p. 266 (1888); *id. & Huds. Argent. Orn.* i. p. 157 (1888); *Nehrk. Kat. Eiersamml.* p. 143 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 237 (1900).

Empidonomus inca, *Sharpe, Hand-l.* iii. p. 148 (1901).

Two eggs, said to be those of the Black-and-Yellow-crested Tyrant-bird, differ from each other. One is of a narrow oval form and of a pinkish cream-colour, marked round the broad end with a wide band of confluent smears and spots of pale rusty, purplish brown, and lavender-grey. The second is of a broad oval shape and cream-coloured, marked, chiefly at the broad end, with well-defined spots of blackish brown and lavender-grey. They measure respectively: .86 by .59; .88 by .66.

2. Argentine Republic.

Genus **TYRANNUS**, *Cuv.*

Tyrannus tyrannus (*Linn.*).

Tyrannus carolinensis, *Lord, Proc. R. A. Inst., Woolwich*, iv. p. 338 (1865); *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 316 (1874). *Tyrannus pipiri*, *Scl. Cat. Birds B. M.* xiv. p. 267 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 97 (1889); *Nehrk. Kat. Eiersamml.* p. 143 (1899).

Tyrannus tyrannus, *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 236, pl. i. figs. 14 & 15 (1895); *Sharpe, Hand-l.* iii. p. 148 (1901).

The eggs of the King-bird are of a regular oval shape, and exhibit a considerable amount of gloss. They are of a creamy-white colour, blotched and spotted with blackish brown and lavender-grey, and occasionally with ochraceous brown. The markings are larger and more numerous at the broad end than elsewhere. Specimens measure from .9 to 1.05 in length, and from .65 to .75 in breadth.

Genus **MUSCIVORA**, *Cuv.*

Muscivora tyrannus (*Linn.*).

Tyrannus savanha, *d'Orb. Voy., Ois.* pl. 44. fig. 3 (1835-44).

Milvulus tyrannus, *Baird, Brewer & Ridgw. N. Amer. Birds*, ii. p. 309 (1874); *Sci. & Salv. P. Z. S.* 1879, p. 516; *Dalgleish, Proc. Roy. Phys. Soc. Edin.* vi. p. 243, pl. viii. fig. 2 (1880-1); *Sci. Cat. Birds B. M.* xiv. p. 277 (1888); *id. & Huds. Argent. Orn.* i. p. 160 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 104 (1889); *Holland, Ibis*, 1892, p. 201; *Bendire, Life-Hist. N. Amer. Birds*, ii. p. 231 (1895); *Nehrke. Kat. Eiersamml.* p. 143 (1899).

Muscivora tyrannus, *Sharpe, Hand-l.* iii. p. 150 (1901).

The eggs of the Fork-tailed Tyrant-bird are of a very regular oval shape, and exhibit a small amount of gloss. They are of a creamy-white colour, spotted and blotched with lavender-grey and rich purplish or reddish brown. The markings often form a zone round the broad end. Specimens measure from .82 to .9 in length, and from .61 to .66 in breadth.

Family PIPRIDÆ.**Sub-Family PIPRINÆ.****Genus MACHÆROPTERUS, Bp.****Machæropterus regulus (Hahn & Küster).**

(Plate VI. fig. 1.)

Machæropterus regulus, *Scl. Cat. Birds B. M.* xiv. p. 304 (1888); *Sharpe, Hand-l.* iii. p. 156 (1901).

An egg of the Striped Manikin in the Collection is of a blunt oval form, devoid of gloss, and cream-coloured, streaked and mottled with pale umber-brown and lavender. It measures .7 by .52.

1. Rio Janeiro.

Alexander Fry, Esq. [P.]

Genus CHIROXIPHIA, Cab.**Chiroxiphia caudata (Shaw).**

(Plate VI. fig. 3.)

Pipra caudata, *Euler, J. f. O.* 1867, p. 223.

Chiroxiphia caudata, *Scl. Cat. Birds B. M.* xiv. p. 310 (1888); *id. & Huds. Argent. Orn.* i. p. 161 (1888); *Nehrck. Kat. Eiersamml.* p. 144 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 238 (1900); *Sharpe, Hand-l.* iii. p. 156 (1901).

An egg of the Long-tailed Manikin is of a narrow oval shape, devoid of gloss, and of a light ochre-colour, streaked and blotched, chiefly round the broad end, with brown and lavender. It measures 1 by .65.

1. Iguapé, Brazil, 23rd Nov.

Crowley Bequest.

Genus **MANACUS**, *Briss.***Manacus manacus** (*Linn.*).

- Chiromachæris manacus*, *Scl. & Salv. P. Z. S.* 1879, p. 517, pl. xlii. fig. 11;
Scl. Cat. Birds B. M. xiv. p. 313 (1888); *Nehrke. Kat. Eiersamml.*
 p. 144, taf. iv. fig. 38 (1899); *von Ihering, Rev. Mus. Paulista*, iv.
 p. 238 (1900).
Manacus manacus, *Sharpe, Hand-l.* iii. p. 157 (1901).

The eggs of the White-bellied Manikin in the Collection are of a blunt oval form and exhibit no gloss. They are of a light ochre-colour, marked all over with streaks and blotches of umber-brown and lavender, the markings being confluent and forming a zone round the broad end. They measure respectively: .81 by .57; .76 by .57.

2. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
 (*T. K. Salmon*).

Manacus gutturosus (*Desm.*).

(Plate VI. fig. 2.)

- Pipra manacus* (*nec Linn.*), *Euler, J. f. O.* 1867, p. 223.
Chiromachæris gutturosa, *Scl. Cat. Birds B. M.* xiv. p. 313 (1888); *von*
Ihering, Rev. Mus. Paulista, iv. p. 238 (1900).
Manacus gutturosus, *Sharpe, Hand-l.* iii. p. 158 (1901).

The eggs of the Black-headed Manikin in the Collection resemble those of *Machæropterus regulus* and *Manacus manacus* very closely in coloration. They measure respectively: .82 by .6; .8 by .6; .8 by .6.

2. Rio Janeiro. Alexander Fry, Esq. [P].
 1. Iguapé, Brazil, 14th Nov. Crowley Bequest.

Manacus vitellinus (*Gould*).

- Chiromachæris vitellina*, *Scl. & Salv. P. Z. S.* p. 517, pl. xlii. fig. 10;
Scl. Cat. Birds B. M. xiv. p. 315 (1888); *Salv. & Godm. Biol. Centr.-*
Amer., Aves, ii. p. 114 (1890).
Manacus vitellinus, *Sharpe, Hand-l.* iii. p. 158 (1901).

The eggs of the Yellow-throated Manikin in the Collection are of the same character as those of *M. manacus*. Two are cream-coloured, marked with confluent streaks of umber-brown and lavender, chiefly round the broad end. The other two are of a light ochre-colour, densely smeared over the broader half with umber-brown, pale brown, and lavender. They measure respectively: .79 by .6; .86 by .6; .87 by .61; .83 by .61.

2. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
 (*T. K. Salmon*).
 2. U.S. Colombia. Crowley Bequest.

Family COTINGIDÆ.

Sub-Family TITYRINÆ.

Genus **TITYRA**, Vieill.**Tityra semifasciata** (Spix).

Tityra personata, *Scl. & Salv. P. Z. S.* 1879, p. 517.

Tityra semifasciata, *Scl. Cat. Birds B. M.* xiv. p. 330 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 118 (1890); *Sharpe, Hand-l.* iii. p. 161 (1901).

The eggs of the Masked Becard are elliptical in shape, moderately glossy, and plain white. Two examples measure respectively: .95 by .77; 1.01 by .77.

2. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Genus **PLATYPSARIS**, *Scl.***Platypsaris atricapillus** (Vieill.).

(Plate VI. figs. 6 & 7.)

Hadrostomus atricapillus, *Scl. Cat. Birds B. M.* xiv. p. 333 (1888); *Nehrke. Kat. Eiersamml.* p. 144 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 239 (1900).

Platypsaris atricapillus, *Sharpe, Hand-l.* iii. p. 163 (1901).

The eggs of the Black-headed Becard in the Collection are of a blunt oval form and exhibit no gloss. One is cream-coloured, blotched chiefly at the broad end with pale ochre and lavender. The other is similarly marked with lilac-grey and lavender on a white ground. They measure respectively: 1.03 by .72; 1 by .76.

2. Iguapé, Brazil, 20th Oct. Crowley Bequest.

Platypsaris homochrous (Scl.).

Hadrostomus homochrous, *Scl. & Salv. P. Z. S.* 1879, p. 517, pl. xlii. fig. 12; *Scl. Cat. Birds B. M.* xiv. p. 334 (1888); *Salv. & Godm. Biol. Centr.-Amer., Aves*, ii. p. 124 (1890).

Platypsaris homochrous, *Sharpe, Hand-l.* iii. p. 163 (1901).

An egg of Selater's Becard is of a regular oval form, devoid of gloss, and of a pinkish buff-colour, marked with a zone of small specks and indistinct lines of pale rufous round the broad end. It measures .9 by .63.

1. Remedios, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Platypsaris albiventris, Lawr.

(Plate VI. fig. 4.)

Hadrostomus albiventris, *Scl. Cat. Birds B. M.* xiv. p. 335 (1888);
Nehr. Kat. Eiersamml. p. 144 (1899).

Platypsaris albiventris, *Sharpe, Hand-l.* iii. p. 163 (1901).

The eggs of Xantus's Becard in the Collection are of a somewhat pointed oval shape, and exhibit a slight amount of gloss. They are of a pinkish-buff colour, marked chiefly about the broad end with rich umber-brown. In one specimen the markings consist of confluent streaks and blotches; in the other they form a dense cap. They measure respectively: .88 by .64; .88 by .63.

2. Mazatlan, Mexico (*A. Forrer*). Crowley Bequest.

Platypsaris aglaiaë (Lafr.).

(Plate VI. figs. 9 & 10.)

Pachyrhamphus aglaiaë, *Owen, Ibis*, 1861, p. 64, pl. ii. fig. 4.

Hadrostomus aglaiaë, *Scl. Cat. Birds B. M.* xiv. p. 335 (1888); *Salv. & Godm. Centr.-Amer., Aves*, ii. p. 121 (1890); *Nehr. Kat. Eiersamml.* p. 144 (1899).

Platypsaris aglaiaë, *Sharpe, Hand-l.* iii. p. 163 (1901)

The eggs of the Rose-throated Becard in the Collection vary from a narrow to a broad oval shape, are devoid of gloss, and are of three types of coloration. Those of one type resemble the egg described and figured by Owen (*l. c.*), which is cream-coloured, densely marked with lines, scrawls, and spots of purplish-pink and clouds of lilac. Of a second type are eggs of a pinkish-buff ground-colour, marked, chiefly at the broad end, with blotches, scrawls, and spots of umber-brown and purplish grey. Eggs of the third type are of a pale creamy-buff colour, sparingly spotted all over with pale greyish brown. Specimens measure from .91 to .96 in length, and from .65 to .7 in breadth.

Genus **PACHYRHAMPHUS**, *Gray*.**Pachyrhamphus viridis (Vieill.).**

(Plate VI. fig. 5.)

Pachyrhamphus viridis, *Scl. Cat. Birds B. M.* xiv. p. 338 (1888); *Nehr. Kat. Eiersamml.* p. 144 (1899); *von Ihering, Rev. Mus. Paulista*, iv. p. 239 (1900); *Sharpe, Hand-l.* iii. p. 164 (1901).

An egg of Vieillot's Becard is of an ordinary oval shape and

devoid of gloss. It is of a pale buff-colour, densely smeared and streaked with umber-brown and lavender. It measures .88 by .64.

1. Iguapé, Brazil, Sept.

Crowley Bequest.

Pachyrhamphus rufus (Bodd.).

(Plate VI. fig. 8.)

Pachyrhamphus rufus, *Scl. Cat. Birds B. M.* xiv. p. 343 (1888); *Sharpe, Hand-l.* iii. p. 165 (1901).

Two eggs of the Chestnut Becard are of a blunt oval shape, and exhibit a small amount of gloss. They are white, marked with spots and small blotches of rich purplish-red, lilac, and dark brown or black. They measure respectively: .9 by .65; .95 by .7.

2. Rio Janeiro.

Alexander Fry, Esq. [P.].

Sub-Family RUPICOLINÆ.

Genus RUPICOLA, *Briss.*

Rupicola rupicola (Linn.).

(Plate VI. fig. 18.)

Rupicola crocea, *Scl. Cat. Birds B. M.* xiv. p. 369 (1888); *Lloyd, Ibis*, 1896, p. 429; *von Ihering, Rev. Mus. Paulista*, iv. p. 240 (1900).
Rupicola rupicola, *Sharpe, Hand-l.* iii. p. 171 (1901).

An egg of the Demerara Cock-of-the-Rock from the Tristram Collection differs considerably from those of the next species. It is of an elliptical shape, almost devoid of all gloss, and of a creamy-buff colour, thickly marked with lines, scrawls, spots, and small blotches of dark brown, pale umber, and dark lavender. It measures 1.8 by 1.32.

1. [Brazil (*Tristram Coll.*).]

Crowley Bequest.

Rupicola sanguinolenta, Gould.

(Plate VI. fig. 19.)

Rupicola sanguinolenta, *Scl. & Salv. P. Z. S.* 1879, p. 519; *Scl. Cat. Birds B. M.* xiv. p. 371 (1888); *Nehrk. Kat. Eiersamml.* p. 145 (1899); *Sharpe, Hand-l.* iii. p. 171 (1901).

The eggs of the Colombian Cock-of-the-Rock are of a broad oval shape, and exhibit a moderate amount of gloss. They are

of a pale buff-colour, spotted and blotched, chiefly at the broad end, with dark umber-brown, deep grey, and lavender. Three examples measure respectively: 1·75 by 1·34; 1·85 by 1·3; 1·87 by 1·21.

2. Frontino, Antioquia, U.S. Colombia Crowley Bequest.
 (*T. K. Salmon*).

Sub-Family COTINGINÆ.

Genus **PHIBALURA**, *Vieill.*

Phibalura flavirostris, *Vieill.*

(Plate VI. fig. 11.)

Phibalura flavirostris, *Scl. Cat. Birds B. M.* xiv. p. 372 (1888); *Goëldi, Ibis*, 1894, p. 484, fig. 1; *von Ihering, Rev. Mus. Paulista*, iv. p. 240 (1900); *Sharpe, Hand-l.* iii. p. 171 (1901).

The eggs of the Crested Shortbill presented by Dr. Goëldi approach the spheroidal in shape and are quite devoid of all gloss. They are of a pale green colour, spotted and blotched, chiefly on the broader half, with very dark brown or black, deep grey, and lavender. They measure respectively: ·9 by ·75; ·9 by ·72.

2. Colonia Alpina, Rio Janeiro, 17th Dr. E. A. Goëldi [P.].
 Nov.

Genus **PIPREOLA**, *Swains.*

Pipreola riefferi (*Boiss.*).

Pipreola riefferi, *Scl. & Salv. P. Z. S.* 1879, p. 519, pl. xliii. fig. 8; *Scl. Cat. Birds B. M.* xiv. p. 377 (1888); *Sharpe, Hand-l.* iii. p. 172 (1901).

The eggs of Rieffer's Pipreole are of a regular oval shape, and exhibit a moderate amount of gloss. They are of a white or pinkish cream-colour, sparingly marked with small round spots of rich purplish red. On one of the examples in the Collection there is, in addition to the small spots, a large blotch which is blurred at the edges and runs into the surrounding ground-colour. Five specimens measure respectively: ·99 by ·8; 1·06 by ·8; 1 by ·74; 1·04 by ·72; 1·07 by ·8.

Sub-Family GYMNODERINÆ.

Genus **PYRODERUS**, *Gray*.**Pyroderus granadensis** (*Lafr.*).

Pyroderus granadensis, *Scl. Cat. Birds B. M.* xiv. p. 398 (1888); *Sharpe, Hand-l.* iii. p. 176 (1901).

An egg of the Colombian Fruit-Crow in the Collection resembles those of *Rupicola sanguinolenta*. It measures 1·83 by 1·31.

1. U.S. Colombia. Crowley Bequest.

Pyroderus orenocensis (*Lafr.*).

Pyroderus orenocensis, *Scl. & Salv. P. Z. S.* 1879, p. 520, pl. xliii. fig. 7; *Scl. Cat. Birds B. M.* xiv. p. 398 (1888); *Nehrk. Kat. Eiersamml.* p. 145 (1899); *Sharpe, Hand-l.* iii. p. 177 (1901).

The eggs of the Orinoco Fruit-Crow are inseparable from those of *P. granadensis* and *Rupicola sanguinolenta*. Two examples measure respectively: 1·87 by 1·3; 1·8 by 1·3.

2. Frontino, Antioquia, U.S. Colombia Salvin-Godman Coll.
(*T. K. Salmon*).

Family PHYTOTOMIDÆ.

Genus **PHYTOTOMA**, *Molina*.**Phytotoma rara**, *Molina*.

(Plate VI. fig. 13.)

Phytotoma rara, *Scl. Cat. Birds B. M.* xiv. p. 403 (1888); *James, New List Chilian Birds*, p. 3 (1892); *Lane, Ibis*, 1897, p. 35; *Nehrk. Kat. Eiersamml.* p. 145 (1899); *Sharpe, Hand-l.* iii. p. 178 (1901).

The eggs of the Chilian Plant-cutter are of a pointed oval form and very glossy. They are of a greenish-blue colour, speckled and spotted, chiefly at the broad end, with very dark chocolate-brown or black, and occasionally with lilac also. They measure from ·95 to 1·12 in length, and from ·7 to ·76 in breadth.

Genus PITTA, Vieill.

Pitta cyanea, Blyth.

Pitta cyanea, *Scl. Cat. Birds B. M.* xiv. p. 417 (1888); *Oates, Fauna Brit. Ind., Birds*, ii. p. 391 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 282 (1890); *Sharpe, Hand-l.* iii. p. 179 (1901).

The eggs of the Blue Pitta are creamy-white, pretty densely marked with spots, streaks, and fine angular lines of dark purplish-brown or black and grey. On some specimens the markings are very coarse, on others very delicate and fine. Specimens measure from 1.05 to 1.09 in length, and from .82 to .86 in breadth.

4. Kaukarit, Tenasserim, 23rd May Hume Coll.
(*C. T. Bingham*).
5. Kaukarit, 26th May (*C. T. B.*). Hume Coll.

Pitta cyanoptera, Temm.

(Plate VI. fig. 16.)

Pitta moluccensis, *Oates, Birds Brit. Burmah*, i. p. 415 (1883).

Pitta cyanoptera, *Scl. Cat. Birds B. M.* xiv. p. 420 (1888); *Oates, Fauna Brit. Ind., Birds*, ii. p. 392 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 283 (1890); *Nehrke, Kat. Eiersamml.* p. 146 (1899); *Sharpe, Hand-l.* iii. p. 180 (1901).

The eggs of the Lesser Blue-winged Pitta are of two very distinct types. In one, they are creamy-white, thickly marked with spots, blotches, streaks, and occasional lines of purplish brown and grey. In the second (a specimen of which is figured), they are very beautifully clouded with lilac-grey and marked with fine lines and scrawls of purple. Examples measure from .95 to 1.15 in length, and from .78 to .9 in breadth.

Pitta megarhyncha, Schl.

Pitta megarhyncha, *Scl. Cat. Birds B. M.* xiv. p. 421 (1888); *Oates, Fauna Brit. Ind., Birds*, ii. p. 393 (1890); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 285 (1890); *Sharpe, Hand-l.* iii. p. 180 (1901).

A single egg of the Larger Blue-winged Pitta in the Collection is very imperfect, but appears to be similar to the eggs of *P. cyanoptera* of the first type described above, and of about the same size.

Genus **PTYNOPROGNE**, *Reichenb.*

The eggs of the Rock-Martins are all of the same type and hardly separable from one another. They are of a somewhat lengthened oval shape, and exhibit a moderate amount of gloss. The ground-colour is white, speckled and spotted, and at times blotched, with brownish red or chestnut and underlying grey or lavender. The markings are almost invariably dense and more or less confluent at the broad end, where they form an irregular zone or imperfect cap.

Ptyonoprogne rupestris (*Scop.*).

| 3. Madagascar. | Crowley Bequest. |
| 2. Madagascar, May (<i>Tristram Coll.</i>). | Crowley Bequest. |

Genus *HIRUNDO*, Schaeffer.

The eggs of the true Swallows are usually of a regular oval shape, but sometimes they are somewhat sharply pointed, and they exhibit only a small amount of gloss. They are of two types of coloration, some species laying plain white eggs, while in others the eggs are white or pinkish-white, speckled and spotted with umber-

brown, ochre, or reddish brown, and underlying lavender or lilac. The markings consist of specks, spots, and blotches in various combinations, and the most frequent types are shown by the specimens figured (Plate VII. figs. 1-5). The eggs of the different species of Swallows laying the same type of egg (plain or spotted) cannot be separated from each other.

Hirundo rustica, Linn.

Hirundo rustica, *Thien. Fortpflanz. ges. Vög.* tab. xlii. fig. 11, *a-e* (1845-54); *Baedeker, Eier Eur. Vög.* tab. 52. fig. 17 (1855-63); *Hewitson, Eggs of Brit. Birds*, i. p. 257, pl. lxxv. figs. iii & iv (1856); *Dresser, Birds Eur.* iii. p. 477 (1875); *Seebohm, Brit. Birds*, ii. p. 171, pl. 17 (1884); *Sharpe, Cat. Birds B. M.* x. p. 128 (1885); *id. & Wyatt, Mon. Hirundinidæ*, i. p. 213 (1885-94); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 184 (1890); *Seebohm, Eggs of Brit. Birds*, p. 269, pl. 58 A. figs. 17 & 20 (1896); *Sharpe, Hand-l.* iii. p. 192 (1901).

Hirundo cahirica, *Tristram, Ibis*, 1867, p. 361.

The eggs of the Chimney-Swallow are of the spotted type. They measure from .7 to .9 in length, and from .5 to .58 in breadth.

Atticora pileata, Gould.

Atticora pileata, *Salv. & Godm. Biol. Centr.-Amer., Aves*, i. p. 230 (1883); *Sharpe, Cat. Birds B. M.* x. p. 188 (1885); *id. & Wyatt, Mon. Hirundinidæ*, ii. p. 513 (1885-94); *Nehr. Kat. Eiersamml.* p. 86 (1899); *Sharpe, Hand-l.* iii. p. 200 (1901).

Four eggs said to be those of the Guatemalan Swallow, taken in Venezuela, measure respectively: .68 by .51; .64 by .5; .67 by .5; .62 by .5.

4. Venezuela (*Gugenheimer*).

Crowley Bequest.

Atticora fucata (*Temm.*).

Atticora fucata, *Sharpe, Cat. Birds B. M.* x. p. 188 (1885); *id. & Wyatt, Mon. Hirundinidæ*, ii. p. 515 (1885-94); *Scl. & Huds. Argent. Orn.* i. p. 35 (1888); *Aplin, Ibis*, 1894, p. 167, pl. v. fig. 2; *von Ihering, Rev. Mus. Paulista*, iv. p. 207 (1900); *Sharpe, Hand-l.* iii. p. 200 (1901).

An egg of the Tawny-headed Swallow in the Collection measures .76 by .5.

3. Uruguay, 19th Nov.

O. V. Aplin Esq. [P.].

Genus **PETROCHELIDON**, *Cab.*

The eggs of the Swallows of this genus are of a regular oval shape, and they exhibit a small amount of gloss. Those of some species are plain white, those of others spotted.

Petrochelidon nigricans (*Vieill.*).

Hylochelidon nigricans, *Gould, Handb. Birds Austr.* i. p. 111 (1865).
Petrochelidon nigricans, *Sharpe, Cat. Birds B. M.* x. p. 190 (1885); *id.* & *Wyatt, Mon. Hirundinidæ*, ii. p. 525 (1885-94); *North, Nests & Eggs Austr. Birds*, p. 32, pl. xiii. fig. 14 (1889); *Nehrke, Kat. Eiersamml.* p. 86 (1899); *Campbell, Nests & Eggs Austr. Birds*, i. p. 456, pl. 15 (1901); *Sharpe, Hand-l.* iii. p. 200 (1901).

The eggs of the White-rumped Cliff-Swallow are of a white colour, minutely speckled, chiefly at the broad end, with rufous and lavender. They measure from .64 to .72 in length, and from .5 to .57 in breadth.

Family MUSCICAPIDÆ.

Genus **HEMICHELIDON**, *Hodgs.***Hemichelidon sibirica** (*Gm.*).

Butalis sibirica, *Tacz. J. f. O.* 1872, p. 446, taf. i. fig. 15.
Hemichelidon sibirica, *Sharpe, Cat. Birds B. M.* iv. p. 120 (1879); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 1 (1890); *Tacz. Faune Orn. Sibér. Orient.* p. 475 (1891); *Nehr. Kat. Eiersamml.* p. 23 (1899); *Sharpe, Hand-l.* iii. p. 204 (1901).

The eggs of the Sooty Flycatcher in the Collection are of a pointed oval form, and exhibit a slight amount of gloss. They are of a very pale green colour, densely mottled with extremely pale reddish brown. They measure respectively: .71 by .5; .7 by .5.

2. Lake Baikal, Siberia (*Dybowski*: Crowley Bequest.
Tristram Coll.).

Genus **MICRÆCA**, *Gould.***Microeca fascinans** (*Lath.*).

Microeca fascinans, *Gould, Handb. Birds Austr.* i. p. 258 (1865); *Sharpe, Cat. Birds B. M.* iv. p. 123 (1879); *North, Nests & Eggs Austr. Birds*, p. 95 (1889); *Nehr. Kat. Eiersamml.* p. 24 (1899); *Campbell, Nests & Eggs Austr. Birds*, i. p. 105, pl. 7 (1901); *Sharpe, Hand-l.* iii. p. 205 (1901).
Microeca macroptera, *Ramsay, Trans. Phil. Soc. N.S.W.* 1865, p. 328, pl. i. figs. 9, 10.

The eggs of the Australian Brown Flycatcher are of a blunt oval form and slightly glossy. They are of a pale bluish-green colour, marked with specks and blotches of chestnut-brown and underlying lavender-grey. The markings are most numerous on the broader half, where they are often confluent and form an irregular zone. Specimens measure from .68 to .76 in length, and from .52 to .55 in breadth.

Muscicapa latirostris, *Seeböhm, Birds Japan. Emp.* p. 62 (1890).

The eggs of the Siberian Brown Flycatcher in the Collection are of a blunt oval form and moderately glossy. They are of a very pale green colour, and whereas two specimens are quite plain, two others are mottled, chiefly round the broad end, with pale rufous, while in four others the mottling is scarcely visible. They measure respectively: .68 by .5; .67 by .5; .7 by .56; .69 by .55; .61 by .5; .63 by .5; .61 by .5; .61 by .49.

Bradyornis silens (*Shaw*).

(Plate VII. fig. 7.)

Bradyornis silens, *Sharpe, ed. Layard's Birds S. Africa*, p. 404 (1875-84); *Sharpe, Cat. Birds B. M.* iii. p. 313 (1877); *Nehrke, Kat. Eiersamml.* p. 22 (1899); *Sharpe, Hand-l.* iii. p. 209 (1901).
Tarsiger silens, *Stark & Selater, Fauna S. Africa, Birds*, ii. p. 219 (1901).

The eggs of the Pied Wood-Shrike in the Collection are almost elliptical in shape, the two ends being closely alike, and they exhibit a faint gloss. The ground-colour is pale greyish green, and while one example is very indistinctly mottled with very pale brown, the other is densely mottled with greyish brown. They measure respectively: .8 by .61; .81 by .59.

2. South Africa.

E. L. Layard, Esq. [P.].

Genus **NEWTONIA**, *Schl. & Poll.***Newtonia brunneicauda** (*A. Newton*).

(Plate VII. fig. 8.)

Newtonia brunneicauda, *Sharpe, Cat. Birds B. M.* iv. p. 148 (1879); *Cowan, Proc. R. Phys. Soc. Edinb.* vii. p. 148 (1882); *Milne-Edwards & Grandidier, Hist. Nat. Madag., Ois.* ii. p. 382 (1885); *Nehrke, Kat. Eiersamml.* p. 24 (1899); *Sharpe, Hand-l.* iii. p. 210 (1901).

The eggs of the Madagascar Flycatcher are of a broad oval form and very slightly glossy. They are of a dull white colour, thickly speckled, spotted, or blotched with reddish brown or purplish brown and underlying pale lavender. The markings are very dense at the broad end, where they form a more or less distinct cap. Five specimens measure from .66 to .77 in length, and from .55 to .58 in breadth.

5. Betsileo, Madagascar.

Rev. W. Deans Cowan [P.].

Genus **MUSCICAPA**, *Linn.***Muscicapa grisola**, *Linn.*

Muscicapa grisola, *Thien. Fortpflanz. ges. Vög.* p. 300, tab. xxix. fig. 7, *a-e* (1845-54); *Hewitson, Eggs of Brit. Birds*, i. p. 74, pl. xxi. fig. i (1856); *Dresser, Birds Eur.* iii. p. 447 (1875); *Sharpe, Cat. Birds B. M.* iv. p. 151 (1879); *Seebohm, Brit. Birds*, i. p. 323, pl. 9 (1893); *Oates, Fauna Brit. Ind., Birds*, ii. p. 4 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 1 (1890); *Seebohm, Eggs of Brit. Birds*, p. 191, pl. 51. figs. 17 & 20 (1896); *Sharpe, Hand-l.* iii. p. 211 (1901).
Butalis grisola, *Baedeker, Eier Eur. Vög.* tab. 52. fig. 11 (1855-63); *Tristram, Ibis*, 1867, p. 361; *Saunders, Ibis*, 1871, p. 206; *Wardlaw-Ramsay, Ibis*, 1880, p. 53.

The eggs of the Spotted Flycatcher vary from a narrow to a broad oval shape, and are moderately glossy. The ground-colour ranges from cream-colour to bluish white, pale blue or greenish blue, and this is spotted, blotched, and clouded with various shades of reddish brown and underlying grey or lavender. Some examples are marked with distinct, well-defined blotches; others with confluent markings which nearly entirely hide the ground-colour. In most cases the markings are dense at the broad end, where they often form a cap or very irregular zone. Specimens measure from .67 to .8 in length, and from .52 to .6 in breadth.

Birds*, p. 192, pl. 52. fig. 2 (1896).

Muscicapa luctuosa, *Salvin, Ibis*, 1859, p. 311.

Hedymela atricapilla, *Sharpe, Hand-l.* iii. p. 213 (1901).

The eggs of the Pied Flycatcher are of an oval form, with the smaller end generally very sharply pointed, and they are usually extremely glossy. They vary in colour from a very delicate pale blue to a fairly dark blue. It is stated that some eggs are occasionally speckled with pale reddish brown, but all the specimens in the National Collection are quite plain. They measure from .63 to .78 in length, and from .47 to .57 in breadth. A small specimen from Norway measures only .61 by .41, but another from Algeria, the largest in the series, measures .78 by .6.

Genus **SIPHIA**, *Hodgs.*

Siphia parva (Bechst.).

Muscicapa parva, *Thien. Fortpflanz. ges. Vög.* p. 301, tab. xxix. fig. 8, *a-c* (1845-54); *Bree, Birds Eur.* i. p. 179, pl. — (1866); *Dresser, Birds Eur.* iii. p. 465 (1875); *Sharpe, Cat. Birds B. M.* iv. p. 161 (1879); *Seebohm, Brit. Birds*, i. p. 332, pl. 9, part. (1883); *id. Eggs of Brit. Birds*, p. 193, pl. 52. fig. 3 (1896).

Erythrosterna parva, *Baedecker, Eier Eur. Vög.* tab. 52. fig. 10 (1855-63).

Siphia parva, *Oates, Fauna Brit. Ind., Birds*, ii. p. 9 (1890); *Sharpe, Hand-l.* iii. p. 213 (1901).

The eggs of the European Red-breasted Flycatcher are of an oval form, the smaller end being frequently pointed, and they are very glossy. They are of a very pale bluish or greenish white, speckled and mottled with pale reddish brown and underlying lavender. The markings are fine and usually dense, in some cases so dense that little of the ground-colour is visible. In a few examples the markings form a very distinct zone round the larger end. Specimens measure from .6 to .71 in length, and from .5 to .55 in breadth.

Genus **CYORNIS**, *Blyth*.**Cyornis rubeculoides** (*Vig.*).

Siphia rubeculoides, *Sharpe, Cat. Birds B. M.* iv. p. 445 (1879); *Legge, Birds Ceylon*, p. 424 (1879); *Nehrk. Kat. Eiersamml.* p. 30 (1899).
Cyornis rubeculoides, *Oates, Fauna Brit. Ind., Birds*, ii. p. 23 (1890);
Oates ed. Hume, Nests & Eggs Ind. Birds, ii. p. 5 (1890); *Sharpe, Hand-l.* iii. p. 215 (1901).

The eggs of the Blue-throated Flycatcher are of a regular oval shape, but vary considerably in breadth. Many specimens are glossy; others are devoid of gloss. They are of several types of coloration. Some examples are of a greenish stone-colour, often plain, sometimes marked round the broader end with an indistinct pale brownish-pink zone. Other specimens are of a pinkish cream-colour, densely mottled with pale rufous or pale brown. They measure from .7 to .77 in length, and from .53 to .58 in breadth.

Cyornis tickelliae, *Sharpe, Hand-l.* iii. p. 215 (1901).

The eggs of Mrs. Tickell's Blue Flycatcher present as many types of coloration as those of the Blue-throated Flycatcher, and resemble them in general appearance. Many of the specimens are of a brown colour, some plain and others marked with a faint trace of some darker mottling. Others are cream-coloured, densely mottled with various shades of pale rufous, and others are stone-coloured, faintly mottled with pale brown. Specimens measure from .68 to .78 in length, and from .52 to .58 in breadth.

Niltava macgrigorïæ (*Burton*).

(Plate VII. fig. 10.)

Niltava macgrigorïæ, *Sharpe, Cat. Birds B. M.* iv. p. 465 (1879); *Oates, Fauna Brit. Ind., Birds*, ii. p. 42 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 21 (1890); *Nehrke. Kat. Eiersamml.* p. 31 (1899); *Sharpe, Hand-l.* iii. p. 220 (1901).

The eggs of the Small *Niltava* are of a somewhat elongated, narrow oval, form, and they exhibit a considerable amount of gloss. The ground-colour varies from a pale cream to a light fawn, while some specimens are so indistinctly mottled that they appear at first sight to be quite plain, others are distinctly marked with freckles and blotches of brownish pink and pale lavender, which are often confluent at the larger end and form an irregular cap. Specimens measure from .72 to .88 in length, and from .5 to .6 in breadth.

Genus **PETRŒCA**, *Swains.*

Petrœca leggei, *Sharpe.*

Petroica multicolor, *Gould, Handb. Birds Austr.* i. p. 279 (1865).

Petrœca leggei, *Sharpe, Cat. Birds B. M.* iv. p. 165 (1879); *North, Nests & Eggs Austr. Birds*, p. 102 (1889); *Nehrke. Kat. Eiersamml.* p. 24 (1899); *Campbell, Nests & Eggs Austr. Birds*, i. p. 134, pl. 8 (1901); *Sharpe, Hand-l.* iii. p. 220 (1901).

The eggs of the Scarlet-breasted Robin are of a broad oval form, occasionally approaching the spherical, and they have a faint gloss. They are of a greenish-white colour, marked with umber-brown, yellowish brown, and underlying lavender. The markings vary in size from specks to small blotches, and they are dense at the broad end, where they often form a cap or irregular zone. Examples measure from .69 to .74 in length, and from .55 to .6 in breadth.

***Petræca rhodinogaster* (Drap.).**

(Plate VII. fig. 13.)

Erythrodryas rhodinogaster, Gould, *Handb. Birds Austr.* i. p. 276 (1865); *North, Nests & Eggs Austr. Birds*, p. 101 (1889).

Petræca rhodinogastra, Sharpe, *Cat. Birds B. M.* iv. p. 170 (1879); *Nehrke. Kat. Eiersamml.* p. 24 (1899); *Campbell, Nests & Eggs Austr. Birds*, i. p. 138 (1901); *Sharpe, Hand-l.* iii. p. 221 (1901).

The egg of the Pink-breasted Robin in the Gould Collection resembles the eggs of *P. leggei* and *P. phænicea*. It is probably one of the specimens of which Gould wrote (*l. c.*):—"The eggs are three in number, of a greenish white, thickly sprinkled with light chestnut and purplish brown; eight lines and a half long by six and a half broad." It is now fractured, and cannot be measured accurately.

Two other examples are similar in colour, and measure respectively: .72 by .58; .78 by .53.

1. Tasmania (*Wilson*).

2. Tasmania (*E. D. Atkinson*).

Crowley Bequest.

***Petræca rosea*, Gould.**

Erythrodryas rosea, Gould, *Handb. Birds Austr.* i. p. 277 (1865).

Petræca rosea, Sharpe, *Cat. Birds B. M.* iv. p. 170 (1879); *Campbell, Nests & Eggs Austr. Birds*, i. p. 139, pl. 8 (1901); *Sharpe, Hand-l.* iii. p. 221 (1901).

The eggs of the Rose-breasted Robin in the Collection are of two types. Three examples, forming a clutch, are of an elongated oval form and moderately glossy. They are white, speckled and blotched, mostly at the broad end, with pale brown and lavender-grey. They measure respectively: .65 by .48; .67 by .47; .65 by .48. A fourth example is of a broad oval shape and moderately glossy. It is white, profusely speckled all over with reddish-brown and lavender, and measures .68 by .52.

(Plate VII. fig. 15.)

Petrœca toitoi, *Potts, Trans. N.Z. Inst.* ii. p. 60 (1869); *Sharpe, Cat. Birds B. M.* iv. p. 174 (1879); *id. Hand-l.* iii. p. 221 (1901).

Myiomoira toitoi, *Buller, Birds New Zeal.* 2nd ed. i. p. 39 (1888).

An egg of the New Zealand North-Island Robin is of a regular oval shape, devoid of gloss and of a creamy-white colour, speckled with brownish pink and lilac. It measures .7 by .5. The dimensions of an egg of this species given by Sir Walter Buller (*l. c.*) are .85 by .8, which would render the specimen nearly spherical in

shape and of a size quite out of proportion to the size of the bird, which has the wing only 2·7 inches in length.

Genus **MUSCICAPULA**, *Blyth*.

Muscicapula superciliaris (*Jerd.*).

(Plate VII. fig. 19.)

Muscicapula superciliaris, *Sharpe, Cat. Birds B. M.* iv. p. 204 (1879); *Nehrk. Kat. Eiersamml.* p. 25 (1899); *Sharpe, Hand-l.* iii. p. 223 (1901).

Cyornis superciliaris, *Oates, Fauna Brit. Ind., Birds*, ii. p. 17 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, 2nd ed. ii. p. 4 (1890).

The eggs of the White-browed Blue Flycatcher are of a broad oval form, and exhibit a considerable amount of gloss. At first sight, they appear to be of one uniform colour, either fawn-coloured or of a pale stone-colour, but when closely looked at, they will be found to be mottled or speckled with a somewhat darker shade of colour than the ground-colour itself. They measure from .59 to .68 in length, and from .5 to .54 in breadth.

(Plate VII. fig. 20.)

Muscicapula westermanni, *Sharpe*, *Ibis*, 1889, p. 196; *id.* *Hand-l.* iii. p. 224 (1901).

An egg of Westermann's Flycatcher taken by Mr. Whitehead is of a regular oval shape, almost devoid of all gloss, and fawn-coloured. It measures $\cdot 6$ by $\cdot 47$.

1. Mt. Kina Balu, Borneo, 25th Crowley Bequest.
March (*J. Whitehead*).

Genus **SMICRORNIS**, *Gould*.

Smicrornis brevirostris, *Gould*.

Smicrornis brevirostris, *Gould*, *Handb. Birds Austr.* i. p. 273 (1865); *Sharpe*, *Cat. Birds B. M.* iv. p. 209 (1879); *North*, *Nests & Eggs Austr. Birds*, p. 100 (1889); *Nehrke*, *Kat. Eiersamml.* p. 25 (1899); *Campbell*, *Nests & Eggs Austr. Birds*, i. p. 153, pl. 8 (1901); *Sharpe*, *Hand-l.* iii. p. 225 (1901).

The eggs of the Short-billed Flycatcher are of a narrow oval shape, and exhibit a small amount of gloss. They are of a brownish-pink colour, marked, chiefly at the broad end, with brown and lavender. On one specimen in the Collection the markings are few and scattered; in another they form a cap; and on a third a zone round the broad end. Three examples measure respectively : $\cdot 58$ by $\cdot 4$; $\cdot 61$ by $\cdot 43$; $\cdot 56$ by $\cdot 43$.

1. West Australia (*Wilson*). Gould Coll.
2. New South Wales (*Wilson*). Gould Coll.

Genus **GERYGONE**, *Gould*.

Gerygone albigularis (*Gould*).

Gerygone albigularis, *Gould*, *Handb. Birds Austr.* i. p. 266 (1865); *Ramsay*, *P. Z. S.* 1866, p. 576.
Gerygone albigularis, *Sharpe*, *Cat. Birds B. M.* iv. p. 212 (1879); *North*, *Nests & Eggs Austr. Birds*, p. 97 (1889); *Nehrke*, *Kat. Eiersamml.* p. 25 (1899); *Campbell*, *Nests & Eggs Austr. Birds*, i. p. 155, pl. 8 (1901); *Sharpe*, *Hand-l.* iii. p. 225 (1901).

The eggs of the Australian White-throated Flycatcher are of a

regular oval shape, and but very slightly glossy. They are white, speckled and blotched with chestnut and pale lavender. The markings vary from mere specks in some specimens to small blotches in others, and they are often confluent at the broad end, forming a zone. Examples measure from .63 to .72 in length, and from .49 to .52 in breadth.

- Siphia nigrorufa*, *Sharpe, Cat. Birds B. M.* iv. p. 455 (1879); *Legge, Birds Ceylon*, p. 425 (1879).
Ochromela nigrirufa, *Oates, Fauna Brit. Ind., Birds*, ii. p. 37 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 14 (1890); *Sharpe, Hand-l.* iii. p. 238 (1901).

The eggs of the Black-and-Orange Flycatcher are of an oval form, and generally exhibit some small amount of gloss. They are greyish white, speckled and mottled with dull reddish brown. The markings are usually very dense at the large end, where, in most cases, they form a confluent and well-defined cap. Two examples in the Collection are of a pale stone-colour, mottled with a slightly darker shade of the same. Seven specimens measure from .66 to .72 in length, and from .53 to .56 in breadth.

(Plate VIII. fig. 10.)

Tarsiger chrysæus, *Sharpe, Cat. Birds B. M.* iv. p. 260 (1879); *Oates, Fauna Brit. Ind., Birds*, ii. p. 104 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 67 (1890); *Osmaston, Journ. Bomb. Nat. Hist. Soc.* xi. p. 66 (1897); *Sharpe, Hand-l.* iii. p. 238 (1901).

The egg of the Golden Bush-Robin in the Collection is of an elongated oval form, nearly equally pointed at both ends, and exhibits a considerable amount of gloss. It is of a plain deep blue colour, and measures .79 by .56.

1. Native Sikhim, 27th June.

Hume Coll.

Genus **POLIOPTILA**, *Sclater.*

The eggs of the Gnatcatchers are all very similar one to another and cannot be separated. They are of a rather broad oval shape and exhibit but little gloss. The ground-colour is white, bluish-white or very pale blue, and the whole shell is thickly speckled and spotted with deep chestnut, reddish brown, and lavender or lilac. The markings are frequently more dense and of larger size at the broad end than elsewhere, and form an imperfect cap.

Polioptila cærulea (*Linn.*).

Polioptila cærulea, *Baird, Brewer & Ridgw. N. Amer. Birds*, i. p. 78 (1874); *Sharpe, Cat. Birds B. M.* x. p. 442 (1885); *Nehrsk. Kat. Eiersamml.* p. 27 (1899); *Sharpe, Hand-l.* iii. p. 240 (1901).

Three eggs of the Blue-grey Gnatcatcher measure respectively: .58 by .46; .57 by .46; .59 by .48.

 (1901).
Pachyprora capensis, *Stark & Selater, Fauna S. Africa, Birds*, ii. p. 254
 (1901).

An egg of the Cape Flycatcher in the Collection is of a very broad oval form and very glossy. It is of a very pale pinkish-white colour, rather heavily spotted and blotched round the middle portion of the egg with chestnut and grey. The two ends of the shell are merely lightly speckled. This example measures .69 by .55.

1. Natal.

T. Ayres, Esq. [C.]

Genus **HYPOTHYMIS**, *Boie*.**Hypothymis azurea** (*Bodd.*).

- Hypothymis azurea*, *Sharpe, Cat. Birds B. M.* iv. p. 274 (1879); *Barnes, Journ. Bomb. Nat. Hist. Soc.* iv. p. 96, pl.—, fig. 290 (1889); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 27 (1890); *id. Fauna Brit. Ind., Birds*, ii. p. 49 (1890); *Nehrke. Kat. Eiersamml.* p. 27 (1899); *Sharpe, Hand-l.* iii. p. 248 (1901).

The eggs of the Indian Black-naped Flycatcher are usually of a regular oval form, but some are somewhat sharply pointed at the smaller end. They exhibit a considerable amount of gloss, and vary in ground-colour from creamy-white to pale salmon-pink. The markings consist of specks and small spots of chestnut and lavender or lilac, and these are generally densely set round the larger end, where they coalesce and form a broad zone. The smaller half of the egg is comparatively free from markings. Specimens vary from .68 to .76 in length, and from .5 to .55 in breadth.

Hypothymis occipitalis, *Sharpe, P. Z. S.* 1879, p. 337; *id. Cat. Birds B. M.* iv. p. 275 (1879); *Nehr. Kat. Eiersamml.* p. 27, taf. i. fig. 6 (1899); *Sharpe, Hand-l.* iii. p. 248 (1901).

Hypothymis azurea, *Grant & Whitehead, Ibis*, 1898, p. 237.

The eggs of the Malayan Black-naped Flycatcher resemble those of *H. azurea* in general character. Those, however, collected in the Malay Peninsula and Borneo are very heavily marked, while those from Formosa are very feebly speckled. Two specimens brought by Whitehead from Luzon differ remarkably in having a pure white ground, delicately speckled all over with reddish brown and lilac, without any indication of the zone round the broad end which characterizes the eggs of most of the Flycatchers of this genus. Specimens measure from .68 to .81 in length, and from .5 to .55 in breadth.

Tchitrea borbonica, *E. Newton, Ibis*, 1861, p. 271.*Trochocercus borbonicus*, *Sharpe, Cat. Birds B. M.* iv. p. 302 (1879).*Trochocercus bourbonensis*, *Sharpe, Hand-l.* iii. p. 251 (1901).

The sole egg of the Bourbon Flycatcher in the Collection is of a broad oval shape and devoid of gloss. It is cream-coloured, blotched, almost entirely at the broad end, with lilac-red and lilac-grey. It measures .77 by .59.

1. Mauritius, 10th Dec. (*E. Newton*). Crowley Bequest.

Genus **RHIPIDURA**, *Vig. & Horsf.*

The eggs of the different species of Fantail Flycatchers, although varying individually, are of much the same general character throughout.

They are of a somewhat pointed oval shape and exhibit little or no gloss. The ground-colour varies from pure white to creamy white and yellowish buff, and the markings, consisting of specks, spots and small blotches, are of a greyish brown, olive, pale rufous, and lavender colour. In the great majority of specimens, the markings are chiefly confined to a well-defined zone round the broad end and they are very sparse elsewhere, and in many respects the eggs resemble those of many species of Shrikes. In a comparatively small number of specimens the zone is imperfect or ill-defined, the markings being spread over the whole shell. The specimens figured (Plate VIII.) indicate some of the types of coloration amongst the eggs of these Flycatchers.

Rhipidura flabellifera (*Gm.*).

Rhipidura flabellifera, *Potts, Trans. New Zeal. Inst.* ii. p. 63 (1869): iii. p. 77 (1870); *Sharpe, Cat. Birds B. Genus **TERPSIPHONE**, *Gloger*.**Terpsiphone paradisi** (*Linn.*).

(Plate VIII. fig. 21.)

Terpsiphone paradisi, *Sharpe, Cat. Birds B. M.* iv. p. 346 (1879); *Legge, Birds Ceylon*, p. 404 (1879); *Oates, Fauna Brit. Ind., Birds*, ii. p. 45 (1890); *id. ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 22 (1890); *Nehr. Kat. Eiersamml.* p. 29 (1899); *Sharpe, Hand-l.* iii. p. 263 (1901).

The eggs of the Indian Paradise Flycatcher are of a pointed oval form and exhibit a considerable amount of gloss. The ground-colour varies from pinkish white to salmon-pink, and this is spotted and speckled with chestnut, lilac and lavender. The markings, as a rule, are dense at the broad end and sparse elsewhere, but a few specimens are well marked even at the small end. The spots at the broad end often form an irregular zone.

Four examples from Delhi differ from the above in being white, with markings of very dark purplish brown, chocolate and lavender.

Specimens measure from .75 to .88 in length, and from .57 to .65 in breadth.

Genus *RHINOMYIAS*, Sharpe.

Rhinomyias pectoralis (Salvad.).

(Plate IX. fig. 2.)

Rhinomyias pectoralis, Sharpe, *Cat. Birds B. M.* iv. p. 368 (1879); *id.* *Ibis*, 1889, p. 201; *id.* *Hand-l.* iii. p. 266 (1901).

The eggs of the Pectoral Flycatcher are of a broad oval form and moderately glossy. They are of a pale greyish-green colour, densely mottled all over with pale rufous grey and lavender. Three examples measure respectively : .72 by .55; .67 by .55; .71 by .55.

3. Mt. Kina Balu, Borneo, Feb. (J. Crowley Bequest.
Whitehead).

Rhinomyias albigularis, Bourns & Worcester.

Rhinomyias albigularis, Bourns & Worcester, *Occ. Papers Minn. Acad. Nat. Sci.* i. p. 27 (1894); Grant & Whitehead, *Ibis*, 1898, p. 237, pl. v. fig. 3; Sharpe, *Hand-l.* iii. p. 267 (1901).

One of the eggs of the White-throated Flycatcher in the Collection is of an elliptical, the other of a blunt oval form, and both are glossy. The ground, hardly any of which is distinctly visible, appears to be of a reddish cream-colour, and it is very thickly mottled and clouded all over with reddish brown. The two specimens measure respectively : .89 by .65; .87 by .65.

2. Canloan Volcano, Central Negros, J. Whitehead, Esq. [C].
Philippines, 21st March.

Rhinomyias gularis, Sharpe.

(Plate IX. fig. 1.)

Rhinomyias gularis, Sharpe, *Ibis*, 1888, p. 385; 1889, p. 201; *id.* *Hand-l.* iii. p. 267 (1901).

The eggs of the White-throated Flycatcher in the Collection are of a blunt oval form and slightly glossy. They are of a pale greyish-green colour, freckled all over with pale brownish chestnut, the markings also forming an indistinct band of brighter colour round

the broad end. Two examples measure respectively: .9 by .62; .9 by .65.

2. Mt. Kina Balu, Borneo, 13th March Crowley Bequest.
(*J. Whitehead*).

Genus **CULICICAPA**, *Swinh.*

Culicicapa ceylonensis (*Swains.*).

(Plate IX. fig. 6.)

Culicicapa ceylonensis, *Sharpe, Cat. Birds B. M.* iv. p. 369 (1879); *id. Ibis*, 1889, p. 202; *Legge, Birds Ceylon*, p. 410 (1879); *Oates ed. Hume, Nests & Eggs Ind. Birds*, ii. p. 16 (1890); *Sharpe, Hand-l.* iii. p. 268 (1901).

The eggs of the Grey-headed Flycatcher are of a broad oval form and moderately glossy. They are cream-coloured, blotched and clouded with pale brown and dark lavender-grey, densely over the larger half of the egg where the markings assume the form of a broad and more or less well-defined zone, and sparingly elsewhere. On the whole, they resemble the common type of egg of the *Rhipidura* group. They measure from .58 to .65 in length, and from .46 to .5 in breadth.

Genus **ABRORNIS**, *Hodgs.*

The eggs of the Flycatchers of this genus are of a broad oval shape and exhibit but little gloss. They are pinkish white in some cases, greenish white in others, and they are densely mottled and blotched with chestnut and lilac, especially at the broad end, where the markings are often confluent and form an imperfect cap or zone. The eggs of the different species are closely alike.

Abrornis schisticeps, *Hodgs.*

Piezorhynchus nigrimentum (Gray).

Piezorhynchus nigrimentum, *Sharpe, Cat. Birds B. M.* iv. p. 418 (1879); *Nehrsk. Kat. Eiersamml.* p. 30, taf. ii. fig. 11 (1899); *Sharpe, Hand-l.* iii. p. 279 (1901).

The eggs of the Black-chinned Flycatcher and those of the following four species of this genus (*P. gouldi*, *P. verticalis*, *P. guttulatus*, *P. loricatus*) resemble each other closely and cannot be separated by any character. They are of a regular oval shape and almost devoid of all gloss. The ground-colour is white or pinkish white, and this is very thickly speckled, especially at the broad end, with bright chestnut and lavender. In many examples the markings form a well-marked zone round the broad end. Two eggs of the present species measure respectively: .85 by .62; .85 by .61.

The eggs of the Black-faced Flycatcher in the Collection resemble those of *Piezorhynchus nigrimentum*. Two examples measure respectively; $\cdot 84$ by $\cdot 58$; 73 by 58 .

2. Australia, 14th Jan. Crowley Bequest.

Genus **STOPAROLA**, *Blyth.*

The eggs of the Flycatchers of this genus are of a broad oval shape, more or less pointed at the smaller end, and they exhibit a considerable amount of gloss. They vary in ground-colour from pure white to pinkish white and pale salmon-pink. Some few examples are quite devoid of markings; others are freckled with very pale rufous; and others, the majority, have a clouded zone or cap of chestnut specks at the broad end. The eggs of the various species resemble each other closely.

Graucalus macei, Less.

(Plate IX. fig. 12.)

Graucalus macei, Sharpe, *Cat. Birds B. M.* iv. p. 34 (1879); Legge, *Birds Ceylon*, p. 360 (1879); Oates *Fauna Brit. Ind., Birds*, i. p. 496 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 348 (1889); Nehrke, *Kat. Eiersamml.* p. 22 (1899); Sharpe, *Hand-l.* iii. p. 292 (1901).

The eggs of the Indian Cuckoo-Shrike are mostly of a lengthened and pointed oval form, and they have a considerable amount of gloss.

The coloration is of two distinct types. In one the ground is fawn-coloured, thickly spotted, streaked and blotched, pretty evenly all over, with brown, light chestnut and grey. In the second the ground is of a pale green colour, marked with clouds, small blotches and streaky spots of dark brown, yellowish-brown, and lavender. Specimens measure from 1.11 to 1.35 in length, and from .8 to .91 in breadth.

Graucalus lineatus, *Sharpe, Cat. Birds B. M.* iv. p. 40 (1879); *Campbell, Nests & Eggs Austr. Birds*, i. p. 99, pl. 7 (1901); *Sharpe, Hand-l.* iii. p. 293 (1901).

An egg of the Barred Cuckoo-Shrike in the Collection is of a regular oval shape and almost devoid of all gloss. It is of a white colour, thickly spotted, in the form of a broad zone round the larger end of the egg, with umber-brown and lavender. The markings are small, round and well-defined. This specimen measures 1·13 by ·81.

1. New South Wales. Gould Coll.

Genus **EDOLIISOMA**, *Jacq. & Pucher.***Edoliisoma cærulescens** (*Blyth*).

Edoliisoma cærulescens, *Sharpe, Cat. Birds B. M.* iv. p. 44 (1879); *Grant & Whitehead, Ibis*, 1898, p. 235, pl. vi. fig. 3; *Sharpe, Hand-l.* iii. p. 294 (1901).

An egg of the Luzon Cuckoo-Shrike in the Collection is of a regular oval shape and almost entirely devoid of gloss. It is of a pale blue colour, speckled and dotted with dark umber-brown and underlying pale grey. The markings are very evenly distributed over the entire shell. It measures: 1·11 by ·81.

1. Benguet District, North-west J. Whitehead, Esq. [C.]
 Luzon, 14th March.

Genus **VOLVOCIVORA**, *Hodgs.***Volvocivora lugubris** (*Sundev.*).

(Plate IX. fig. 16.)

Campophaga lugubris, *Sharpe, Cat. Birds B. M.* iv. p. 65 (1879); *Nehrke, Kat. Eiersamml.* p. 23 (1899).

Campophaga melanoschista, *Oates, Fauna Brit. Ind., Birds*, i. p. 491 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 345 (1889).

Volvocivora lugubris, *Sharpe, Hand-l.* iii. p. 298 (1901).

The eggs of the Dark-grey Cuckoo-Shrike are of a regular oval shape and moderately glossy. They are of a white or greenish-white colour, very thickly streaked and blotched with dark brown and lavender-grey. They measure from .9 to 1.02 in length, and from .65 to .71 in breadth.

2. Jerripani, Mussoori (*T. Hutton*). Hume Coll.

Volvocivora melanoptera (*Rüpp.*).

Campophaga melanoptera, *Sharpe, Cat. Birds B. M.* iv. p. 67 (1879); *Oates, Fauna Brit. Ind., Birds*, i. p. 492 (1889).

Volvocivora melanoptera, *Sharpe, Hand-l.* iii. p. 299 (1901).

The eggs of the Pale-grey Cuckoo-Shrike appear to be inseparable from those of *V. lugubris*. Three examples measure respectively: .97 by .69; .95 by .69; .98 by .7.

3. Foochow, China, 11th June.

C. B. Rickett, Esq. [P.].

Genus **PERICROCOTUS**, *Boie.***Pericrocotus speciosus** (*Lath.*).

(Plate IX. fig. 14.)

Pericrocotus speciosus, *Sharpe, Cat. Birds B. M.* iv. p. 71 (1879); *Oates, Fauna Brit. Ind., Birds*, i. p. 479 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 335 (1889); *Sharpe, Hand-l.* iii. p. 299 (1901).

The eggs of the Indian Scarlet Minivet are of an extremely broad oval form and almost devoid of all gloss. They are greyish white, speckled and spotted with pale brown and lavender, chiefly at the broad end, where the markings are larger and more or less confluent. Four examples measure respectively: .88 by .71; .94 by .66; .86 by .68; .85 by .67.

3. Jerripani, Mussoori (*T. Hutton*). Hume Coll.

1. Dehra Dhoon, N.W. Provinces, (T. H.). Hume Coll.

Pericrocotus flammeus (Forst.).

Pericrocotus flammeus, Legge, *Birds Ceylon*, p. 363 (1879); Sharpe, *Cat. Birds B. M.* iv. p. 75 (1879); Oates, *Fauna Brit. Ind., Birds*, p. 482 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 336 (1889); Sharpe, *Hand-l.* iii. p. 300 (1901).

An egg of the Orange Minivet in the Collection closely resembles the eggs of *P. speciosus*. The markings, however, are slightly coarser, and they are evenly distributed over the whole shell. This specimen measures .84 by .65.

1. Neddivatam, Nilghiris, 5th Sept. Hume Coll.
(J. Darling).

Pericrocotus peregrinus (Linn.).

Pericrocotus peregrinus, Legge, *Birds Ceylon*, p. 366 (1879); Sharpe, *Cat. Birds B. M.* iv. p. 76 (1879); Oates, *Fauna Brit. Ind., Birds*, i. p. 487 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 339 (1889); Nehrke, *Kat. Eiersamml.* p. 23 (1899); Sharpe, *Hand-l.* iii. p. 301 (1901).

The eggs of the Small Minivet are typically of a broad oval form, and they exhibit a small amount of gloss. They are of a very pale greenish white colour, spotted and blotched with rich chestnut-brown and lavender. The markings are larger and more numerous over the broader half of the shell, where they are frequently confluent and form an irregular cap. The eggs measure from .6 to .75 in length, and from .5 to .55 in breadth.

Family PYCNONOTIDÆ.

Genus *ÆGITHINA*, Vieill.*Ægithina tiphia* (Linn.).

(Plate X, fig. 2.)

Iora typhia, Legge, *Birds Ceylon*, p. 490 (1880).*Ægithina tiphia*, Sharpe, *Cat. Birds B. M.* vi. p. 7 (1881); Oates, *Fauna Brit. Ind., Birds*, i. p. 230 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 151 (1889); *Nehr. Kat. Eiersamml.* p. 42 (1899); Sharpe, *Hand-l.* iii. p. 306 (1901).

The eggs of the Common Iora are of a broad oval form, and while some exhibit a small amount of gloss, others are without a trace of it. They are white, occasionally tinged with pink, and are streaked with lavender, pale brown, lilac-red, or pinkish-brown. The streaks are generally broad and confluent round the broad end of the egg, and form a well-marked zone or, in some cases, a cap. A few specimens are merely spotted with grey. They measure from .63 to .76 in length, and from .51 to .57 in breadth.

The eggs of the Indian Fairy Blue-bird are of a pointed oval shape and extremely glossy. They appear to vary much in colour. Of the specimens in the Collection, three are cream-coloured, very densely mottled with umber-brown and with traces of lavender beneath. Two are greyish-white, densely mottled with pale brown and grey. Other two examples are greenish white, with a broad confluent zone round the larger end, deep chestnut-brown in one egg, slaty grey in the other. Seven specimens measure from 1.05 to 1.2 in length, and from .77 to .84 in breadth.

Genus **HYPSSIPETES**, *Vig.***Hypsipetes psaroides**, *Vig.*

(Plate X. fig. 5.)

Hypsipetes psaroides, *Sharpe, Cat. Birds B. M.* vi. p. 36 (1881); *Oates, Fauna Brit. Ind., Birds*, i. p. 260 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 164 (1889); *Nehr. Kat. Eiersamml.* p. 42 (1899); *Sharpe, Hand-l.* iii. p. 309 (1901).

The eggs of the Himalayan Black Bulbul are of an oval form, but vary considerably in breadth. Some are very highly glossy, others are almost devoid of all gloss. The coloration is also very variable. The eggs of one clutch in the Collection are rich salmon-pink, spotted, streaked and blotched with rich reddish purple and lavender. Those of another clutch are pinkish white, marked with deep reddish brown and pale lavender. The eggs of the other clutches are somewhat intermediate between the above in coloration. The markings are generally dense, and while in some eggs they are all small, in others they consist of bold blotches forming a confluent cap at the broad end. Specimens measure from .85 to 1.15 in length, and from .65 to .75 in breadth.

Hypsipetes ganeesa, *Sykes*.

Hypsipetes ganeesa, *Legge, Birds Ceylon*, p. 469 (1879); *Sharpe, Cat. Birds B. M.* vi. p. 39 (1881); *Oates, Fauna Brit. Ind., Birds*, i. p. 262 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 167 (1889); *Sharpe, Hand-l.* iii. p. 310 (1901).

The eggs of the Southern-Indian Black Bulbul are of a narrow pointed oval form, and are slightly glossy. They are pinkish white, speckled, spotted and, less frequently, blotched with pale purple and deep reddish brown. The markings are dense at the broad end of the egg, where they are frequently confluent and form an ill-defined cap or zone. Specimens measure from .96 to 1.15 in length, and from .7 to .78 in breadth.

The eggs of the White-headed Black Bulbul are of a somewhat narrow oval shape and moderately glossy. They are pinkish white, densely spotted and streaked with purplish red, reddish brown, and lavender. Many of the specimens in the Collection are inseparable from eggs of *H. psaroides*. They measure from 1 to 1.07 in length, and from .7 to .76 in breadth.

Genus **CRINIGER**, Temm.

Criniger flaveolus (*Gould*).

(Plate X. fig. 8.)

Criniger flaveolus, Sharpe, *Cat. Birds B. M.* vi. p. 77 (1881); Oates, *Fauna Brit. Ind., Birds*, i. p. 255 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 163 (1889); *Nehr. Kat. Eiersamml.* p. 43 (1899); *Sharpe, Hand-l.* iii. p. 316 (1901).

The eggs of the White-throated Bulbul are of a broad oval shape, with the smaller end somewhat pointed. They are excessively glossy, and of a beautiful salmon-pink colour, spotted, streaked, blotched and clouded with purplish red, chestnut, and lavender or lilac. The markings are more numerous at the broad end of the egg than elsewhere. They vary in character, some being cloudy and hazy, and others firm and distinct. Four examples measure respectively: .89 by .7; .98 by .7; .98 by .74; .99 by .73.

Two eggs of this species from the Crowley Collection are much smaller, have a greyish-pink ground-colour, and are marked with rich brownish purple and lavender. They measure respectively: .89 by .66; .88 by .66.

Pycnonotus pygæus, Beavan, *P. Z. S.* 1864, p. 376.

Molpastes hæmorrhous, Oates, *Fauna Brit. Ind., Birds*, i. p. 268 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 169 (1889).

Molpastes fuscus (P. L. S. Müll.), Sharpe, *Hand-l.* iii. p. 328 (1901).

The eggs of the Madras Red-vented Bulbul are of an oval form, sometimes considerably pointed at one end, at others blunt and rounded. They have a considerable amount of gloss.

Few eggs vary so much in coloration as do the eggs of this Bulbul. Mr. Hume has described them well and I cannot do better than reproduce his notes:—"The ground is universally pinkish or reddish white (in old eggs which have been kept a long time a sort of dull French white) of which more or less is seen according to the extent of the markings. These markings take almost every conceivable form, defined and undefined—specks, spots, blotches, streaks, smudges, and clouds; their combinations are as varied as their colours, which embrace every shade of red, brownish, and purplish red. As a rule, besides the primary markings, feeble secondary markings of pale inky purple are exhibited, often only perceptible when the egg is closely examined, sometimes so numerous as to give the ground-colour of the egg a universal purple tint. In about half the eggs there is a tendency to exhibit, more or less, an irregular zone or

cap at the large end, but solitary eggs occur in which there is a cap at the small end. Three fairly well marked types may be separately described. First, an egg thickly mottled and streaked all over with deep blood-red, which is entirely confluent over one-third of the surface, namely at the large end, and leaves less than a third of the ground-colour visible as a paler mottling over the rest of the surface. Then there is another type with a very delicate pure pink ground, and with a few large, bold, deep red blotches, chiefly at the large end, where they are intermingled with a few small pale inky-purple clouds, and with only a few spots and specks of the former colour scattered over the rest of the surface. Lastly, there is a pale dingy pink ground, speckled almost uniformly, but only moderately thickly, over the whole surface, with minute specks and spots of blood-red and pale inky purple." These three main types indicated by Mr. Hume are now figured (Pl. X. figs. 15, 16, 17).

In size, the eggs also vary exceedingly, ranging in length from .72 to 1, and in breadth from .57 to .68.

Molpastes burmanicus (*Sharpe*).

(Plate X. fig. 18.)

Pycnonotus burmanicus, *Sharpe, Cat. Birds B. M.* vi. p. 125 (1881); *Nehrk. Kat. Eiersamml.* p. 44 (1899).

Molpastes burmanicus, *Oates, Fauna Brit. Ind., Birds*, i. p. 269 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 173 (1889); *Sharpe, Hand-l.* iii. p. 328 (1901).

The eggs of the Burmese Red-vented Bulbul are of a broad oval form, sometimes approaching the spherical, and they exhibit a considerable amount of gloss. They differ from those of *M. fuscus* in having the ground of a greyish-pink colour, marked with roundish spots and blotches of deep purplish red, chocolate-brown and lavender grey, which have a tendency to form an irregular cap or zone at the broader end. The markings are often blurred at the edges, and the underlying lavender-grey is frequently disposed in large smears and clouds. Specimens measure from .75 to .96 in length, and from .65 to .68 in breadth.

Pycnonotus atricapillus, *Sharpe, Cat. Birds B. M.* vi. p. 127 (1881).

Molpastes atricapillus, *Oates, Fauna Brit. Ind., Birds*, i. p. 270 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 173 (1889); *Sharpe, Hand-l.* iii. p. 328 (1901).

The eggs of the Chinese Red-vented Bulbul are of a broad oval form, and have a moderate amount of gloss. They are of a pinkish-white colour, thickly speckled and dotted all over with rich reddish

brown and lavender-grey. Four examples measure respectively :
 ·73 by ·57; ·77 by ·6; ·77 by ·6; ·76 by ·6.

4. Tavoy, Tenasserim, 16th March Hume Coll.
 (*J. Darling*).

Molpastes pygæus, *Hodys*.

Pycnonotus pygæus, *Beavan*, *P. Z. S.* 1864, p. 376; *Godw.-Aust. J. A.*
S. B. xliii. pt. ii. p. 178 (1874); *Sharpe, Cat. Birds B. M.* vi. p. 128
 (1881).

Molpastes bengalensis, *Oates, Fauna Brit. Ind., Birds*, i. p. 271 (1889);
id. ed. Hume, Nests & Eggs Ind. Birds, i. p. 174 (1889).

Molpastes pygæus, *Sharpe, Hand-l.* iii. p. 329 (1901).

The eggs of the Bengal Red-vented Bulbul in no way differ from
 those of *M. fuscus*, except in being slightly larger. They measure
 from ·88 to 1·05 in length, and from ·67 to ·75 in breadth.

Genus PYCNONOTUS, *Boie*.

The eggs of the Bulbuls of this genus resemble those of the
 Bulbuls of the genus *Molpastes*, and, whenever the series of eggs of
 any species is tolerably large, appear to be of as many types of
 coloration as the eggs of *M. fuscus*.

Pycnonotus capensis (Linn.).

Ixos capensis, *Thien. Fortpflanz. ges. Vög.* tab. xxvii. figs. 13, *a, b, c* (1845-54).

Pycnonotus capensis, *Sharpe, ed. Layard's Birds S. Africa*, p. 207 (1875-84); *Dresser, Birds Eur.* iii. p. 361 (1875); *Sharpe, Cat. Birds B. M.* vi. p. 130 (1881); *Nehrk. Kat. Eiersamml.* p. 44 (1899); *Sharpe, Hand-l.* iii. p. 329 (1901); *Stark, Birds S. Africa*, ii. p. 61 (1901).

The eggs of the Cape Yellow-vented Bulbul in the Collection are of various types, and measure from .8 to .92 in length, and from .62 to .7 in breadth.

Pycnonotus plumosus, *Blyth*.

Pycnonotus plumosus, *Sharpe, Cat. Birds B. M.* vi. p. 152 (1881); *Oates, Fauna Brit. Ind., Birds*, i. p. 292 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 191, footnote (1889); *Nehrke, Kat. Eiersamml.* p. 45 (1899); *Sharpe, Hand-l.* iii. p. 332 (1901).

The egg of the Large Olive Bulbul in the Collection is of a pinkish-white colour, speckled all over and marked round the broad end

with a zone of confluent blotches of deep chestnut. It measures .89 by .65.

1. Kussom, Malay Peninsula, Hume Coll.
4th June (*W. Davison*).

***Pycnonotus simplex*, Less.**

Pycnonotus simplex, *Sharpe, Cat. Birds B. M.* vi. p. 153 (1881); *Oates, Fauna Brit. Ind., Birds*, i. p. 292 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 192, footnote (1889); *Sharpe, Hand-l.* iii. p. 332 (1901).

The eggs of Moore's Olive Bulbul in the Collection are densely mottled with rich reddish brown and lavender. They measure respectively: .9 by .63; .86 by .64.

2. Klang, Malay Peninsula, 23rd April Hume Coll.
(*W. Davison*).

Genus **XANTHIXUS**, *Oates*.

***Xanthixus flavescens* (Blyth).**

Pycnonotus flavescens, *Sharpe, Cat. Birds B. M.* vi. p. 143 (1881).
Xanthixus flavescens, *Oates, Fauna Brit. Ind., Birds*, i. p. 275 (1889);
Stuart Baker, Journ. Bombay Nat. Hist. Soc. viii. p. 211 (1893);
Sharpe, Hand-l. iii. p. 332 (1901).

Eggs of Blyth's Bulbul are of an oval form with a small amount of gloss. The ground-colour is pink, and is thickly spotted with purplish-red and lavender. Two specimens measure respectively: .88 by .69; .89 by .66.

2. N. Cachar, 3rd June. E. C. Stuart Baker, Esq. [P.].

Genus **OTOCOMPSA**, *Cab.*

The eggs of the Bulbuls of this genus cannot be separated by any character from those of the species of *Molpastes* and *Pycnonotus*.

***Otocompsa emeria* (Linn.).**

Otocompsa jocosa, *Sharpe, Cat. Birds B. M.* vi. p. 157 (1881); *Nehrke, Kat. Eiersamml.* p. 45 (1899).
Otocompsa emeria, *Oates, Fauna Brit., Ind. Birds*, i. p. 276 (1889);
id. ed. Hume, Nests & Eggs Ind. Birds, i. p. 178 (1889); *Sharpe, Hand-l.* iii. p. 333 (1901).

The eggs of the Bengal Red-whiskered Bulbul vary from specimens which are sparsely speckled on a white ground, to those which are boldly blotched on a pinkish-white ground-colour. They measure from .72 to .95 in length, and from .56 to .7 in breadth.

Otocompsa leucogenys (Gr. & Hardw.).

Otocompsa leucogenys, Sharpe, *Cat. Birds B. M.* vi. p. 160 (1881); *Nehrke. Kat. Eiersamml.* p. 45 (1899); *Sharpe, Hand-l.* iii. p. 333 (1901).

Molpastes leucogenys, Oates, *Fauna Brit. Ind., Birds*, i. p. 272 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 175 (1889).

The eggs of the White-cheeked Bulbul pass through the same variations as those of *Molpastes fuscus* and allied species. They measure from ·83 to ·9 in length, and from ·57 to ·68 in breadth.

Otocompsa leucotis (*Gould*).

- Pycnonotus leucotis*, *Sharpe, Cat. Birds B. M.* vi. p. 136 (1881); *id.*
Ibis, 1891, p. 110; *Nehr. Kat. Fiersanml.* p. 44 (1899).
Molpastes leucotis, *Oates, Fauna Brit. Ind., Birds*, i. p. 273 (1889); *id.*
ed. Hume, Nests & Eggs Ind. Birds, i. p. 177 (1889).
Otocompsa leucotis, *Sharpe, Hand-l.* iii. p. 333 (1901).

The eggs of the White-eared Bulbul, of which there is a very large series in the Collection, are almost entirely of the speckled type of egg of *Molpastes fuscus*, the absence of all blotches and coarse markings being very noticeable. They measure from ·66 to ·9 in length, and from ·53 to ·65 in breadth.

Otocompsa flaviventris (*Tickell*).

Otocompsa flaviventris, *Sharpe, Cat. Birds B. M.* vi. p. 161 (1881); *Oates, Fauna Brit. Ind., Birds*, i. p. 278 (1889); *id. ed. Hume, Nests & Eggs Ind. Birds*, i. p. 183 (1889); *Nehrke, Kat. Eiersamm.* p. 45 (1899); *Sharpe, Hand-l.* iii. p. 333 (1901).

The egg of the Black-crested Yellow Bulbul in the Collection is of a creamy-white colour, thickly mottled and speckled with red and lavender. It measures .85 by .6.

1. Thoungyin River, Tenasserim, 14th Hume Coll.
April (*C. T. Bingham*).

Genus **SPIZIXUS**, *Blyth*.**Spizixus cinereicapillus**, *Swinh.*

(Plate X. fig. 20.)

Spizixus cinereicapillus, *Swinhoe, P. Z. S.* 1871, p. 370; *Sharpe, Cat. Birds B. M.* vi. p. 173 (1881); *id. Hand-l.* iii. p. 335 (1901).

An egg which is said to be that of the Formosan Finch-billed Bulbul is of an extremely broad oval form, and nearly devoid of all gloss. It is of a pale pink colour, very densely mottled all over with purplish red and lilac. It measures .9 by .7.

1. Formosa (*R. Swinhoe: Tristram Crowley Bequest.*

EXPLANATION OF THE PLATES.

PLATE I.

- Fig. 1. } *Caprimulgus albinotatus*.
2. }
3. ,, *clarus*.
4. ,, *ambiguus*.
5. *Chordeiles rupestris*.
6. } *Upupa indica*.
7. }
8. *Caprimulgus macrurus*.
9. ,, *manillensis*.
10. ,, *unwini*.
11. ,, *andamanicus*.
12. *Nyctidromus albicollis*.
13. *Nyctibius jamaicensis*.
14. *Caprimulgus jotaka*.
15. *Lyncornis cerviniceps*.

PLATE II.

- Fig. 1. *Pyrotrogon orescius*.
2. *Penthoceryx sonnerati*.
3. *Ouculus poliocephalus*.
4. *Coccytes coromandus*.
5. *Chalcococcyx lucidus*.

- Fig. 6. *Coccytes jacobinus*.
 7. *Hierococcyx varius*.
 8. *Chalcococcyx maculatus*.
 9. *Cacemantis insperatus*.
 10. „ *passerinus*.
 11. *Pharomacrus auriceps*.
 12. *Guira guira*.
 13. } *Serilophus lunatus*.
 14. }
 15. *Coccyzus melanocoryphus*.
 16. *Psarisomus dalhousie*.
 17. } *Eurylemus javanicus*.
 18. }
 19. *Cymborhynchus macrorhynchus*.

PLATE III.

- Fig. 1. *Thamnophilus major*.
 2. „ *ruficollis*.
 3. „ *multistriatus*.
 4. *Pyriglena leucoptera*.
 5. *Thamnophilus palliatus*.
 6. *Cercomacra nigricans*.
 7. *Myrmotherula surinamensis*.
 8. *Grallaricula cucullata*.
 9. *Thamnophilus guttatus*.
 10. *Synallaxis pudica*.
 11. „ *albescens*.
 12. *Conopophaga lineata*.
 13. *Ochthoeca fumicolor*.
 14. *Phlæocryptes melanops*.
 15. *Tenioptera irupero*.
 16. „ *pyrope*.
 17. *Agriornis solitaria*.
 18. *Menura victorice*.
 19. *Agriornis livida*.

PLATE IV.

- Fig. 1. *Oclthæca cinnamomeiventris*.
 2. *Mecocerculus leucophrys*.
 3. *Fluvicola albiventris*.
 4. *Sisopygis icterophrys*.
 5. *Machetornis rixosa*.
 6. *Lichenops perspicillata*.
 7. *Muscisaxicola maculirostris*.
 8. *Centrites niger*.
 9. *Rhynchocyclus fulvipectus*.
 10. *Platyrhynchus cancrorninus*.
 11. *Todirostrum ruficeps*.
 12. „ *poliocephalum*.
 13. *Rhynchocyclus cinereiceps*.
 14. *Todirostrum schistaceiceps*.
 15. *Euscarthmus gularis*.
 16. *Myiopagis placens*.
 17. *Elainea pagana*.
 18. „ *martinica*.
 19. „ *frantzii*.
 20. *Legatus albicollis*.
 21. *Myiozetetes cayennensis*.

PLATE V.

- Fig. 1. *Pitangus maximiliani*.
 2. „ *lictor*.
 3. „ *caudifasciatus*.
 4. *Megarhynchus pitangua*.
 5. *Pyrocephalus rubineus*.
 6. *Myiobius nævius*.
 7. *Myiarchus barbirostris*.
 8. *Empidochanes fuscatus*.
 9. *Empidonax flavescens*.
 10. *Myiarchus tyrannulus*.
 11. „ *nigricapillus*.

- Fig. 12. *Onychorhynchus mexicanus*.
 13. *Myiarchus stolidus*.
 14. } *Empidonomus inca*.
 15. }
 16. ,, *varius*.
 17. } *Tyrannus rostratus*.
 18. }
 19. }
 20. } ,, *niveigularis*.
 21. ,, *crassirostris*.

PLATE VI.

- Fig. 1. *Macheropterus regulus*.
 2. *Manacus gutturosus*.
 3. *Chiroxiphia caudata*.
 4. *Platypsaris albiventris*.
 5. *Pachyrhamphus viridis*.
 6. } *Platypsaris atricapillus*.
 7. }
 8. *Pachyrhamphus rufus*.
 9. } *Platypsaris aglaiae*.
 10. }
 11. *Phibalura flavirostris*.
 12. *Phytotoma rutila*.
 13. ,, *rara*.
 14. *Anthocincla phayrei*.
 15. *Hydromis nipalensis*.
 16. *Pitta cyanopectera*.
 17. *Rupicola rupicola*.
 18. *Pitta mülleri*.
 19. *Rupicola sanguinolenta*.

PLATE VII.

- Fig. 1. *Ptyonoprogne fuligula*.
 2. ,, *obsoleta*.

- Fig. 3. *Hirundo savignii*.
 4. „ *tahitica*.
 5. *Petrochelidon fulva*.
 6. *Bradyornis infuscatus*.
 7. „ *silens*.
 8. *Newtonia brunneicauda*.
 9. *Niltava grandis*.
 10. „ *macgrigorae*.
 11. *Petroeca phoenicea*.
 12. „ *multicolor*.
 13. „ *rhodinogaster*.
 14. „ *goodenovii*.
 15. „ *toitoi*.
 16. „ *macrocephala*.
 17. } „ *vittata*.
 18. }
 19. *Muscicapula superciliaris*.
 20. „ *westermanni*.

PLATE VIII.

- Fig. 1. *Pseudogerygone albifrontata*.
 2. „ *magnirostris*.
 3. „ *flavilateralis*.
 4. *Muscylva lessoni*.
 5. *Miro albifrons*.
 6. *Pecilodryas subcyana*.
 7. „ *capito*.
 8. *Xanthopygia xanthopygia*.
 9. *Ochromela nigrirufa*.
 10. *Tarsiger chrysceus*.
 11. *Parisoma subcaeruleum*.
 12. *Polioptila dumicola*.
 13. *Batis capensis*.
 14. *Hypothymis tyleri*.
 15. *Trochocercus bourbonnensis*.
 16. *Todopsis cyanocephala*.

- Fig. 17. *Rhipidura cyaniceps*.
 18. „ *javanica*.
 19. „ *nigritorquis*.
 20. „ *tricolor*.
 21. *Terpsiphone paradisi*.

PLATE IX.

- Fig. 1. *Rhinomyias gularis*.
 2. „ *pectoralis*.
 3. *Myiagra vanicorensis*.
 4. „ *pluto*.
 5. „ *oceanica*.
 6. *Culicicapa ceylonensis*.
 7. *Abrornis schisticeps*.
 8. *Piezorhynchus chalybeocephalus*.
 9. *Graucalus parvirostris*.
 10. *Piezorhynchus verticalis*.
 11. *Stoparola albicaudata*.
 12. *Graucalus macei*.
 13. „ *mentalis*.
 14. *Pericrocotus speciosus*.
 15. „ *roseus*.
 16. *Volvocivora lugubris*.
 17. *Lalage sykesi*.
 18. *Pericrocotus erythropygius*.
 19. „ *cinereus*.
 20. *Lalage pacifica*.

PLATE X.

- Figs. 1 & 4. *Irena puella*.
 2. *Ægithina tiphia*.
 3. *Chloropsis jerdoni*.
 5. *Hypsipetes psaroides*.
 6. „ *leucocephalus*.
 7. *Iole maclellandi*.

- Fig. 8. *Criniger flaveolus*.
9. *Poliolophus urostictus*.
10. *Criniger salangæ*.
11. *Alophoixus phæocephalus*.
12. *Bleda icterica*.
13. *Andropadus importunus*.
14. „ *flavescens*.
15. }
16. } *Molpastes fuscus*.
17. }
18. „ *burmanicus*.
19. *Pycnonotus xanthopygius*.
20. *Spizicus cinereicapillus*.

LIST OF THE CURRENT
NATURAL HISTORY PUBLICATIONS
OF THE TRUSTEES OF THE
BRITISH MUSEUM.

The following publications can be purchased through the Agency of *Messrs. LONGMANS & CO.*, 39, *Paternoster Row*; *Mr. QUARITCH*, 15, *Piccadilly*; *Messrs. KEGAN PAUL, TRENCH, TRÜBNER & CO.*, *Paternoster House, Charing Cross Road*; and *Messrs. DULAU & CO.*, 37, *Soho Square*; or at the NATURAL HISTORY MUSEUM, *Cromwell Road, London, S.W.*

Catalogue of the Specimens and Drawings of Mammals, Birds, Reptiles, and Fishes of Nepal and Tibet. Presented by B. H. Hodgson, Esq., to the British Museum. 2nd edition. By John Edward Gray. Pp. xii., 90. [With an account of the Collection by Mr. Hodgson.] 1863, 12mo. 2s. 3d.

Catalogue of the Mammalia and Birds of New Guinea in the Collection of the British Museum. [With list of Species of New Guinea Birds, and those of the neighbouring Localities.] By John Edward Gray, Ph.D., F.R.S., and George Robert Gray, F.L.S., &c. Pp. 63. Woodcuts. 1859, 8vo. 1s. 6d.

Report on the Zoological Collections made in the Indo-Pacific Ocean during the voyage of H.M.S. "Alert," 1881-2. Pp. xxv., 684. 54 Plates. 1884, 8vo.

Summary of the Voyage	...	By Dr. R. W. Coppinger.
Mammalia	„ O. Thomas.
Aves	„ R. B. Sharpe.
Reptilia, Batrachia, Pisces	„ A. Günther.
Mollusca	„ E. A. Smith.
Echinodermata	„ F. J. Bell.
Crustacea	„ E. J. Miers.
Coleoptera	„ C. O. Waterhouse.
Lepidoptera	„ A. G. Butler.
Alcyonaria and Spongiida	„ S. O. Ridley.

1l. 10s.

A Monograph of Christmas Island (Indian Ocean) : Physical Features and Geology by C. W. Andrews, B.A., B.Sc., F.G.S., with descriptions of the Fauna and Flora by numerous contributors. Pp. xv., 337: 22 plates (7 coloured), a map, and 27 illustrations in text. [With Index.] 1900, 8vo. 20s.

Report on the Collections of Natural History made in the Antarctic Regions during the Voyage of the "Southern Cross." Pp. ix., 344. 53 Plates. 1902, Royal 8vo. 2l.

Mammalia By Capt. G. E. H. Barrett-Hamilton.

Notes on Antarctic Seals " E. A. Wilson, M.B.

Extracts from the "Diary"
of the late Nicolai Hanson.

Aves " Dr. R. Bowdler Sharpe.

Pisces... .. " G. A. Boulenger, F.R.S.

Tunicata " Prof. W. A. Herdman, F.R.S.

Mollusca " E. A. Smith.

Echinodermata " Prof. F. J. Bell.

Insecta " G. H. Carpenter and Hon. N. C. Rothschild.

Arachnida " Dr. E. L. Trouessart.

Crustacea " T. V. Hodgson.

Hydrozoa " E. T. Browne.

Cryptogamia, " A. Gepp, V. H. Blackman, and Miss E. S. Barton.

Rock Specimens " G. T. Prior.

Handbook of Instructions for Collectors, issued by the British Museum (Natural History). With Illustrations. Pp. 137. Index. 1902, 8vo. 2s. 6d.

The same, in ten parts, viz.:—Mammals; Birds; Reptiles, Batrachians, and Fishes; Insects; Diptera (Two-winged Flies); Mosquitoes (Culicidæ); Arachnida (Spiders, &c.), Myriopoda, and Peripatus; Soft-Bodied Invertebrates and Shells; Plants; Fossils and Minerals. 1900–1903, 8vo. 4d. each.

MAMMALS.

Catalogue of the Bones of Mammalia in the Collection of the British Museum. By Edward Gerrard. Pp. iv., 296. 1862, 8vo. 5s.

Catalogue of Monkeys, Lemurs, and Fruit-eating Bats in the Collection of the British Museum. By Dr. J. E. Gray, F.R.S., &c. Pp. viii., 137. 21 Woodcuts. 1870, 8vo. 4s.

Catalogue of Carnivorous, Pachydermatous, and Edentate Mammalia in the British Museum. By John Edward Gray, F.R.S., &c. Pp. vii., 398. 47 Woodcuts. 1869, 8vo. 6s. 6d.

Catalogue of Seals and Whales in the British Museum. By John Edward Gray, F.R.S., &c. 2nd Edition. Pp. vii., 402. 101 Woodcuts. 1866, 8vo. 8s.

—Supplement. By John Edward Gray, F.R.S., &c. Pp. vi., 103. 11 Woodcuts. 1871, 8vo. 2s. 6d.

List of the Specimens of Cetacea in the Zoological Department of the British Museum. By William Henry Flower, LL.D., F.R.S., &c. [With Systematic and Alphabetical Indexes.] Pp. iv., 36. 1885, 8vo. 1s. 6d.

Catalogue of Ruminant Mammalia (*Pecora*, Linnæus) in the British Museum. By John Edward Gray, F.R.S., &c. Pp. viii., 102. 4 Plates. 1872, 8vo. 3s. 6d.

Catalogue of the Marsupialia and Monotremata in the Collection of the British Museum. By Oldfield Thomas. Pp. xiii., 401. 4 Coloured and 24 plain Plates. [With Systematic and Alphabetical Indexes.] 1888, 8vo. 1l. 8s.

BIRDS.

Catalogue of the Birds in the British Museum :—

Vol. VI. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Cichlomorphæ* : Part III., containing the first portion of the family Timeliidæ (Babbling Thrushes). By R. Bowdler Sharpe. Pp. xiii., 420. Woodcuts and 18 coloured Plates. [With Systematic and Alphabetical Indexes.] 1881, 8vo. 1l.

Vol. VII. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Cichlomorphæ* : Part IV., containing the concluding portion of the family Timeliidæ (Babbling Thrushes). By R. Bowdler Sharpe. Pp. xvi., 698. Woodcuts and 15 coloured Plates. [With Systematic and Alphabetical Indexes.] 1883, 8vo. 1l. 6s.

Vol. VIII. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Cichlomorphæ* : Part V., containing the families Paridæ and Laniidæ (Titmice and Shrikes); and *Certhiomorphæ* (Creepers and Nuthatches). By Hans Gadow, M.A., Ph.D. Pp. xiii., 386. Woodcuts and 9 coloured Plates. [With Systematic and Alphabetical Indexes.] 1883, 8vo. 17s.

Vol. IX. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Cinnyrimorphæ*, containing the families Nectariniidæ and Meliphagidæ (Sun Birds and Honey-eaters). By Hans Gadow, M.A., Ph.D. Pp. xii., 310. Woodcuts and 7 coloured Plates. [With Systematic and Alphabetical Indexes.] 1884, 8vo. 14s.

Catalogue of the Birds in the British Museum—*continued*.

- Vol. X. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Fringilliformes*: Part I., containing the families Dicæidæ, Hirundinidæ, Ampelidæ, Mniotiltidæ, and Motacillidæ. By R. Bowdler Sharpe. Pp. xiii., 682. Woodcuts and 12 coloured Plates. [With Systematic and Alphabetical Indexes.] 1885, 8vo. 1*l.* 2*s.*
- Vol. XI. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Fringilliformes*: Part II., containing the families Cœrebidæ, Tanagridæ, and Icteridæ. By Philip Lutley Selater, M.A., F.R.S. Pp. xvii., 431. [With Systematic and Alphabetical Indexes.] Woodcuts and 18 coloured Plates. 1886, 8vo. 1*l.*
- Vol. XII. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Fringilliformes*: Part III., containing the family Fringillidæ. By R. Bowdler Sharpe. Pp. xv., 871. Woodcuts and 16 coloured Plates. [With Systematic and Alphabetical Indexes.] 1888, 8vo. 1*l.* 8*s.*
- Vol. XIII. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Sturniformes*, containing the families Artamidæ, Sturnidæ, Ploceidæ, and Alaudidæ. Also the families Atrichiidæ and Menuridæ. By R. Bowdler Sharpe. Pp. xvi., 701. Woodcuts and 15 coloured Plates. [With Systematic and Alphabetical Indexes.] 1890, 8vo. 1*l.* 8*s.*
- Vol. XIV. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Oligomyodæ*, or the families Tyrannidæ, Oxyrhamphidæ, Pipridæ, Cotingidæ, Phytotomidæ, Philepittidæ, Pittidæ, Xenicidæ, and Eurylæmidæ. By Philip Lutley Selater, M.A., F.R.S. Pp. xix., 494. Woodcuts and 26 coloured Plates. [With Systematic and Alphabetical Indexes.] 1888, 8vo. 1*l.* 4*s.*
- Vol. XV. Catalogue of the Passeriformes, or Perching Birds, in the Collection of the British Museum. *Tracheophonæ*, or the families Dendrocolaptidæ, Formicariidæ, Conopophagidæ, and Pteroptochidæ. By Philip Lutley Selater, M.A., F.R.S. Pp. xvii., 371. Woodcuts and 20 coloured Plates. [With Systematic and Alphabetical Indexes.] 1890, 8vo. 1*l.*
- Vol. XVI. Catalogue of the Picariæ in the Collection of the British Museum. *Upupæ* and *Trochili*, by Osbert Salvin. *Coraciæ*, of the families Cypselidæ, Caprimulgidæ, Podargidæ, and Steatornithidæ, by Ernst

Catalogue of the Birds in the British Museum—*continued*.

- Hartert. Pp. xvi., 703. Woodcuts and 14 coloured Plates. [With Systematic and Alphabetical Indexes.] 1892, 8vo. 1*l.* 16*s.*
- Vol. XVII. Catalogue of the Picariæ in the Collection of the British Museum. *Coraciæ* (contin.) and *Halcyones*, with the families Leptosomatidæ, Coraciidæ, Meropidæ, Alcedinidæ, Momotidæ, Totidæ and Coliidæ, by R. Bowdler Sharpe. *Bucerotes* and *Trogones* by W. R. Ogilvie Grant. Pp. xi., 522. Woodcuts and 17 coloured Plates. [With Systematic and Alphabetical Indexes.] 1892, 8vo. 1*l.* 10*s.*
- Vol. XVIII. Catalogue of the Picariæ in the Collection of the British Museum. *Scansores*, containing the family Picidæ. By Edward Hargitt. Pp. xv., 597. Woodcuts and 15 coloured Plates. [With Systematic and Alphabetical Indexes.] 1890, 8vo. 1*l.* 6*s.*
- Vol. XIX. Catalogue of the Picariæ in the Collection of the British Museum. *Scansores* and *Coccyges*: containing the families Rhamphastidæ, Galbulidæ, and Bucconidæ, by P. L. Selater; and the families Indicatoridæ, Capitonidæ, Cuculidæ, and Musophagidæ, by G. E. Shelley. Pp. xii., 484: 13 coloured Plates. [With Systematic and Alphabetical Indexes.] 1891, 8vo. 1*l.* 5*s.*
- Vol. XX. Catalogue of the Psittaci, or Parrots, in the Collection of the British Museum. By T. Salvadori. Pp. xvii., 658. Woodcuts and 18 coloured Plates. [With Systematic and Alphabetical Indexes.] 1891, 8vo. 1*l.* 10*s.*
- Vol. XXI. Catalogue of the Columbæ, or Pigeons, in the Collection of the British Museum. By T. Salvadori. Pp. xvii., 676. 15 coloured Plates. [With Systematic and Alphabetical Indexes.] 1893, 8vo. 1*l.* 10*s.*
- Vol. XXII. Catalogue of the Game Birds (*Pterocletes*, *Gallinæ*, *Opisthocomi*, *Hemipodii*) in the Collection of the British Museum. By W. R. Ogilvie Grant. Pp. xvi., 585. 8 coloured Plates. [With Systematic and Alphabetical Indexes.] 1893, 8vo. 1*l.* 6*s.*
- Vol. XXIII. Catalogue of the Fulicariæ (Rallidæ and Heliornithidæ) and Alectorides (Aramidæ, Eurypygidæ, Mesitidæ, Rhinocetidæ, Gruidæ, Psophiidæ, and Otididæ) in the Collection of the British Museum. By R. Bowdler Sharpe. Pp. xiii., 353. 9 coloured Plates. [With Systematic and Alphabetical Indexes.] 1894, 8vo. 20*s.*

Catalogue of the Birds in the British Museum—*continued*.

Vol. XXIV. Catalogue of the Limicolæ in the Collection of the British Museum. By R. Bowdler Sharpe. Pp. xii., 794. Woodcuts and 7 coloured Plates. [With Systematic and Alphabetical Indexes.] 1896, 8vo. 1*l.* 5*s.*

Vol. XXV. Catalogue of the Gaviæ and Tubinares in the Collection of the British Museum. Gaviæ (Terns, Gulls, and Skuas), by Howard Saunders. Tubinares (Petrels and Albatrosses), by Osbert Salvin. Pp. xv., 475. Woodcuts and 8 coloured Plates. [With Systematic and Alphabetical Indexes.] 1896, 8vo. 1*l.* 1*s.*

Vol. XXVI. Catalogue of the Plataleæ, Herodiones, Steganopodes, Pygopodes, Alcæ, and Impennes in the Collection of the British Museum. Plataleæ (Ibises and Spoonbills) and Herodiones (Hérons and Storks), by R. Bowdler Sharpe. Steganopodes (Cormorants, Gannets, Frigate-birds, Tropic-birds, and Pelicans), Pygopodes (Divers and Grebes), Alcæ (Auks), and Impennes (Penguins), by W. R. Ogilvie-Grant. Pp. xvii., 687. Woodcuts and 14 coloured Plates. [With Systematic and Alphabetical Indexes.] 1898, 8vo. 1*l.* 5*s.*

Vol. XXVII. Catalogue of the Chenomorphæ (Palamedææ, Phoenicopteri, Anseres), Crypturi, and Ratitæ in the Collection of the British Museum. By T. Salvadori. Pp. xv., 636. 19 coloured Plates. [With Systematic and Alphabetical Indexes.] 1895, 8vo. 1*l.* 12*s.*

A Hand-list of the Genera and Species of Birds. [Nomenclator Avium tum Fossilium tum Viventium.] By R. Bowdler Sharpe, LL.D. :—

Vol. I. Pp. xxi., 303. [With Systematic Index.] 1899, 8vo. 10*s.*

Vol. II. Pp. xv., 312. [With Systematic Index, and an Alphabetical Index to Vols. I. and II.] 1900, 8vo. 10*s.*

Vol. III. Pp. xii., 367. [With Systematic and Alphabetical Indexes.] 1901, 8vo. 10*s.*

List of the Specimens of Birds in the Collection of the British Museum. By George Robert Gray :—

Part III., Section I. Ramphastidæ. Pp. 16. [With Index.] 1855, 12mo. 6*d.*

Part III., Section II. Psittacidæ. Pp. 110. [With Index.] 1859, 12mo. 2*s.*

Part III., Sections III. and IV. Capitonidæ and Picidæ. Pp. 137. [With Index.] 1868, 12mo. 1*s.* 6*d.*

Part IV. Columbæ. Pp. 73. [With Index.] 1856, 12mo. 1*s.* 9*d.*

Part V. Gallinæ. Pp. iv., 120. [With an Alphabetical Index.] 1867, 12mo. 1*s.* 6*d.*

Catalogue of the Birds of the Tropical Islands of the Pacific Ocean in the Collection of the British Museum. By George Robert Gray, F.L.S., &c. Pp. 72. [With an Alphabetical Index.] 1859, 8vo. 1s. 6d.

Catalogue of the Collection of Birds' Eggs in the British Museum (Natural History) :—

Vol. I. Ratitæ. Carinatae (Tinamiformes—Lapiformes). By Eugene W. Oates. Pp. xxiii., 252. 18 Coloured Plates. [With Systematic and Alphabetical Indexes.] 1901, 8vo. 1l. 10s.

Vol. II. Carinatae (Charadriiformes—Strigiformes). By Eugene W. Oates. Pp. xx., 400. 15 Coloured Plates [With Systematic and Alphabetical Indexes.] 1902 8vo. 30s.

REPTILES.

Catalogue of the Tortoises, Crocodiles, and Amphisbæniæ in the Collection of the British Museum. By Dr. J. E. Gray, F.R.S., &c. Pp. viii., 80. [With an Alphabetical Index.] 1844, 12mo. 1s.

Catalogue of Shield Reptiles in the Collection of the British Museum. By John Edward Gray, F.R.S., &c.:—
Appendix. Pp. 28. 1872, 4to. 2s. 6d.

Part II. Emydosaurians, Rhynchocephalia, and Amphisbæniæ. Pp. vi., 41. 25 Woodcuts. 1872, 4to. 3s. 6d.

Hand-List of the Specimens of Shield Reptiles in the British Museum. By Dr. J. E. Gray, F.R.S., F.L.S., &c. Pp. iv., 124. [With an Alphabetical Index.] 1873, 8vo. 4s.

Catalogue of the Chelonians, Rhynchocephalians, and Crocodiles in the British Museum (Natural History). New Edition. By George Albert Boulenger. Pp. x., 311. 73 Woodcuts and 6 Plates. [With Systematic and Alphabetical Indexes.] 1889, 8vo. 15s.

Catalogue of the Lizards in the British Museum (Natural History). Second Edition. By George Albert Boulenger :—

Vol. I. Geckonidæ, Eublepharidæ, Uroplatidæ, Pygopodidæ, Agamidæ. Pp. xii., 436. 32 Plates. [With Systematic and Alphabetical Indexes.] 1885, 8vo. 20s.

Vol. II. Iguanidæ, Xenosauridæ, Zonuridæ, Anguidæ, Anniellidæ, Helodermatidæ, Varanidæ, Xantusiidæ, Teiidæ, Amphisbænidæ. Pp. xiii., 497. 24 Plates. [With Systematic and Alphabetical Indexes.] 1885. 8vo. 20s.

Vol. III. Lacertidæ, Gerrhosauridæ, Scincidæ, Anelytropidæ, Dibamidæ, Chamæleontidæ. Pp. xii., 575. 40 Plates. [With a Systematic Index and an Alphabetical Index to the three volumes.] 1887, 8vo. 1l. 6s.

Catalogue of the Snakes in the British Museum (Natural History). By George Albert Boulenger, F.R.S. :—

Vol. I., containing the families Typhlopidae, Glauconiidae, Boidae, Ilysiidae, Uropeltidae, Xenopeltidae, and Colubridae aglyphae, part. Pp. xiii., 448 : 26 Woodcuts and 28 Plates. [With Systematic and Alphabetical Indexes.] 1893, 8vo. 17. 1s.

Vol. II., containing the conclusion of the Colubridae aglyphae. Pp. xi., 382 : 25 Woodcuts and 20 Plates. [With Systematic and Alphabetical Indexes.] 1894. 8vo. 17s. 6d.

Vol. III., containing the Colubridae (Opisthoglyphae and Proteroglyphae), Amblycephalidae, and Viperidae. Pp. xiv., 727 : 37 Woodcuts and 25 Plates. [With Systematic Index, and Alphabetical Index to the 3 volumes.] 1896, 8vo. 17. 6s.

Catalogue of Colubrine Snakes in the Collection of the British Museum. By Dr. Albert Günther. Pp. xvi., 281. [With Geographic, Systematic; and Alphabetical Indexes.] 1858, 12mo. 4s.

BATRACHIANS.

Catalogue of the Batrachia Salientia in the Collection of the British Museum. By Dr. Albert Günther. Pp. xvi., 160. 12 Plates. [With Systematic, Geographic, and Alphabetical Indexes.] 1858, 8vo. 6s.

FISHES.

Catalogue of the Fishes in the British Museum. Second edition. Vol. I. Catalogue of the Perciform Fishes in the British Museum. Vol. I. Containing the Centrarchidae, Percidae, and Serranidae (part). By George Albert Boulenger, F.R.S. Pp. xix., 394. Woodcuts and 15 Plates. [With Systematic and Alphabetical Indexes.] 1895, 8vo. 15s.

Catalogue of Fish collected and described by Laurence Theodore Gronow, now in the British Museum. Pp. vii., 196. [With a Systematic Index.] 1854, 12mo. 3s. 6d.

Catalogue of Apodal Fish in the Collection of the British Museum. By Dr. Kaup. Pp. viii., 163. 11 Woodcuts and 19 Plates. 1856, 8vo. 10s.

Catalogue of Lophobranchiate Fish in the Collection of the British Museum. By J. J. Kaup, Ph.D., &c. Pp. iv., 80. 4 Plates. [With an Alphabetical Index.] 1856, 12mo. 2s.

MOLLUSCA.

Guide to the Systematic Distribution of Mollusca in the British Museum. Part I. By John Edward Gray, Ph.D., F.R.S., &c. Pp. xii., 230. 121 Woodcuts. 1857, 8vo. 5s.

List of the Shells of the Canaries in the Collection of the British Museum, collected by MM. Webb and Berthelot. Described and figured by Prof. Alcide D'Orbigny in the "Histoire Naturelle des Iles Canaries." Pp. 32. 1854, 12mo. 1s.

List of the Shells of Cuba in the Collection of the British Museum collected by M. Ramon de la Sagra. Described by Prof. Alcide d'Orbigny in the "Histoire de l'Île de Cuba." Pp. 48. 1854, 12mo. 1s.

List of the Shells of South America in the Collection of the British Museum. Collected and described by M. Alcide D'Orbigny in the "Voyage dans l'Amérique Méridionale." Pp. 89. 1854, 12mo. 2s.

Catalogue of the Collection of Mazatlan Shells in the British Museum, collected by Frederick Reigen. Described by Philip P. Carpenter. Pp. xvi., 552. 1857, 12mo. 8s.

List of Mollusca and Shells in the Collection of the British Museum, collected and described by MM. Eydoux and Souleyet in the "Voyage autour du Monde, exécuté pendant les années 1836 et 1837, sur la Corvette 'La Bonite,'" and in the "Histoire naturelle des Mollusques 'Ptéropodes.'" Par MM. P. C. A. L. Rang et Souleyet. Pp. iv., 27. 1855, 12mo. 8d.

Catalogue of the Phaneropneumona, or Terrestrial Operculated Mollusca, in the Collection of the British Museum. By Dr. L. Pfeiffer. Pp. 324. [With an Alphabetical Index.] 1852, 12mo. 5s.

Catalogue of Pulmonata, or Air Breathing Mollusca, in the Collection of the British Museum. Part I. By Dr. Louis Pfeiffer. Pp. iv., 192. Woodcuts. 1855, 12mo. 2s. 6d.

Catalogue of the Auriculidæ, Proserpinidæ, and Truncatellidæ in the Collection of the British Museum. By Dr. Louis Pfeiffer. Pp. iv., 150. Woodcuts. 1857, 12mo. 1s. 9d.

List of the Mollusca in the Collection of the British Museum. By John Edward Gray, Ph.D., F.R.S., &c.

Part II. Olividæ. Pp. 41. 1865, 12mo. 1s.

Catalogue of the Conchifera, or Bivalve Shells, in the Collection of the British Museum. By M. Deshayes:—

Part I. Veneridæ, Cyprinidæ, Glauconomidæ, and Petricoladæ. Pp. iv., 216. 1853, 12mo. 3s.

Part II. Petricoladæ (concluded); Corbiculadæ. Pp. 217–292. [With an Alphabetical Index to the two parts.] 1854, 12mo. 6d.

BRACHIOPODA.

Catalogue of Brachiopoda Ancylopoda or Lamp Shells in the Collection of the British Museum. [*Issued as* "Catalogue of the Mollusca, Part IV."] Pp. iv., 128. 25 Woodcuts. [With an Alphabetical Index.] 1853, 12mo. 3s.

POLYZOA.

Catalogue of Marine Polyzoa in the Collection of the British Museum. Part III. Cyclostomata. By George Busk, F.R.S. Pp. viii., 39. 38 Plates. [With a Systematic Index.] 1875, 8vo. 5s.

CRUSTACEA.

Catalogue of the Specimens of Amphipodous Crustacea in the Collection of the British Museum. By C. Spence Bate, F.R.S., &c. Pp. iv., 399. 58 Plates. [With an Alphabetical Index.] 1862, 8vo. 1*l.* 5s.

ARACHNIDA.

Descriptive Catalogue of the Spiders of Burma, based upon the Collection made by Eugene W. Oates and preserved in the British Museum. By T. Thorell. Pp. xxxvi., 406. [With Systematic List and Alphabetical Index.] 1895, 8vo. 10s. 6*d.*

INSECTS.

Coleopterous Insects.

Nomenclature of Coleopterous Insects in the Collection of the British Museum :—

Part VI. Passalidæ. By Frederick Smith. Pp. iv., 23. 1 Plate. [With Index.] 1852, 12mo. 8*d.*

Part VII. Longicornia, I. By Adam White. Pp. iv., 174. 4 Plates. 1853, 12mo. 2s. 6*d.*

Part VIII. Longicornia, II. By Adam White. Pp. 237. 6 Plates. 1855, 12mo. 3s. 6*d.*

Part IX. Cassididæ. By Charles H. Boheman, Professor of Natural History, Stockholm. Pp. 225. [With Index.] 1856, 12mo. 3s.

Illustrations of Typical Specimens of Coleoptera in the Collection of the British Museum. Part I. Lycidæ. By Charles Owen Waterhouse. Pp. x., 83. 18 Coloured Plates. [With Systematic and Alphabetical Indexes.] 1879, 8vo. 16s.

Catalogue of the Coleopterous Insects of Madeira in the Collection of the British Museum. By T. Vernon Wollaston, M.A., F.L.S. Pp. xvi., 234 : 1 Plate. [With a Topographical Catalogue and an Alphabetical Index.] 1857, 8vo. 3s.

Catalogue of the Coleopterous Insects of the Canaries in the Collection of the British Museum. By T. Vernon Wollaston, M.A., F.L.S. Pp. xiii., 648. [With Topographical and Alphabetical Indexes.] 1864, 8vo. 10s. 6d.

Catalogue of Halticidæ in the Collection of the British Museum. By the Rev. Hamlet Clark, M.A., F.L.S. Physapodes and CEdipodes. Part I. Pp. xii., 301. Frontispiece and 9 Plates. 1860, 8vo. 7s.

Catalogue of Hispidæ in the Collection of the British Museum. By Joseph S. Baly, M.E.S., &c. Part I. Pp. x., 172. 9 Plates. [With an Alphabetical Index.] 1858, 8vo. 6s.

Hymenopterous Insects.

Catalogue of Hymenopterous Insects in the Collection of the British Museum. By Frederick Smith. 12mo. :—

Part I. Andrenidæ and Apidæ. Pp. 197. 6 Plates. 1853, 2s. 6d.

Part II. Apidæ. Pp. 199–465. 6 Plates. [With an Alphabetical Index.] 1854. 6s.

Part III. Mutillidæ and Pompilidæ. Pp. 206. 6 Plates. 1855. 6s.

Part IV. Sphegidæ, Larridæ, and Crabronidæ. Pp. 207–497. 6 Plates. [With an Alphabetical Index.] 1856. 6s.

Part V. Vespidæ. Pp. 147. 6 Plates. [With an Alphabetical Index.] 1857. 6s.

Part VI. Formicidæ. Pp. 216. 14 Plates. [With an Alphabetical Index.] 1858. 6s.

Part VII. Dorylidæ and Thynnidæ. Pp. 76. 3 Plates. [With an Alphabetical Index.] 1859. 2s.

List of Hymenoptera, with descriptions and figures of the Typical Specimens in the British Museum. Vol. I., Tenthredinidæ and Siricidæ. By W. F. Kirby. Pp. xxviii., 450. 16 Coloured Plates. [With Systematic and Alphabetical Indexes.] 1882, 8vo. 1l. 18s.

Dipterous Insects.

List of the Specimens of Dipterous Insects in the Collection of the British Museum. By Francis Walker, F.L.S.

Part VII. Supplement III. Asilidæ. Pp. ii., 507–775. 1855, 12mo. 3s. 6d.

- A Monograph of the Culicidæ, or Mosquitoes. Mainly compiled from the Collections received at the British Museum from various parts of the world in connection with the Investigation into the cause of Malaria conducted by the Colonial Office and the Royal Society. By Fred. V. Theobald, M.A., &c. 2 Vols. of text (pp. xviii., 424; viii., 391 : 318 woodcuts), and Atlas of 37 coloured and 5 collotype plates (pp. viii., with explanations of plates). 1901, 8vo. 3*l.* 3*s.*; or, on permanent linen paper, 3*l.* 15*s.*
- A Monograph of the Tsetse-Flies (Genus *Glossina*, Westwood), based on the Collection in the British Museum. By Ernest Edward Austen. With a chapter on Mouth-parts by H. J. Hansen, Phil. Doc. Pp. ix., 319 : 9 plates (7 coloured), 16 woodcuts, 1 map. 1903, Roy. 8vo. 15*s.*

Lepidopterous Insects.

Catalogue of the Lepidoptera Phalænæ in the British Museum. By Sir George F. Hampson, Bart. :—

Vol. I. Catalogue of the Syntomidæ in the Collection of the British Museum. Pp. xxi., 559 : 285 Woodcuts. [With Systematic and Alphabetical Indexes.] 1898, 8vo. 15*s.*

—Atlas of 17 Coloured Plates, 8vo. 15*s.*

Vol. II. Catalogue of the Arctiadæ (Nolinæ, Lithosianæ) in the Collection of the British Museum. Pp. xx., 589. 411 Woodcuts. [With Systematic and Alphabetical Indexes.] 1900, 8vo. 18*s.*

—Atlas of 18 Coloured Plates (xviii.—xxxv.), 8vo. 15*s.*

Vol. III. Catalogue of the Arctiadæ (Arctianæ) and Agaristidæ in the Collection of the British Museum. Pp. xix., 690. 294 woodcuts. [With Systematic and Alphabetical Indexes.] 1901, 8vo. 15*s.*

—Atlas of 19 Coloured Plates (xxxvi.—liv.), 8vo. 16*s.*

Illustrations of Typical Specimens of Lepidoptera Heterocera in the Collection of the British Museum :—

Part V. By Arthur Gardiner Butler. Pp. xii., 74. 78–100 Coloured Plates. [With a Systematic Index.] 1881, 4to. 2*l.* 10*s.*

Part VI. By Arthur Gardiner Butler. Pp. xv., 89. 101–120 Coloured Plates. [With a Systematic Index.] 1886, 4to. 2*l.* 4*s.*

Part VII. By Arthur Gardiner Butler. Pp. iv., 124. 121–138 Coloured Plates. [With a Systematic List.] 1889, 4to. 2*l.*

Part VIII. The Lepidoptera Heterocera of the Nilgiri District. By George Francis Hampson. Pp. iv., 144. 139–156 Coloured Plates. [With a Systematic List.] 1891, 4to. 2*l.*

Illustrations of Typical Specimens of Lepidoptera Heterocera
in the Collection of the British Museum—*continued*.

Part IX. The Macrolepidoptera Heterocera of Ceylon.

By George Francis Hampson. Pp. v., 182. 157-176
Coloured Plates. [With a General Systematic List of
Species collected in, or recorded from, Ceylon.] 1893.
4to. 2l. 2s.

Catalogue of the Collection of Palæarctic Butterflies formed
by the late John Henry Leech, and presented to the
Trustees of the British Museum by his Mother, Mrs. Eliza
Leech. By Richard South, F.E.S. Pp. vi., 228. 2 Coloured
Plates. With a Portrait and Biographical Memoir of Mr.
Leech. 1902, 4to. 1l.

Catalogue of Diurnal Lepidoptera described by Fabricius in
the Collection of the British Museum. By Arthur Gardiner
Butler, F.L.S., &c. Pp. iv., 303. 3 Plates. 1869, 8vo. 7s. 6d.

Specimen of a Catalogue of Lycænidae in the British Museum.
By W. C. Hewitson. Pp. 15. 8 Coloured Plates. 1862,
4to. 1l. 1s.

List of Lepidopterous Insects in the Collection of the British
Museum. Part I. Papilionidæ. By G. R. Gray, F.L.S.
Pp. 106. [With an Alphabetical Index.] 1856, 12mo. 2s.

List of the Specimens of Lepidopterous Insects in the
Collection of the British Museum. By Francis Walker.
12mo. :—

Part XXII. Geometrites. Pp. 499-755. 1861, 3s. 6d.

Part XXIII. ————— Pp. 756-1020. 1861, 3s. 6d.

Part XXIV. ————— Pp. 1021-1280. 1862, 3s. 6d.

Part XXV. ————— Pp. 1281-1477. 1862, 3s.

Part XXVI. ————— Pp. 1478-1796. [With an
Alphabetical Index to Parts XX.-XXVI.] 1862, 4s. 6d.

Part XXVII. Crambites and Tortricites. Pp. 1-286.
1863, 4s.

Part XXVIII. Tortricites and Tineites. Pp. 287-561.
1863, 4s.

Part XXIX. Tineites. Pp. 562-835. 1864, 4s.

Part XXX. ————— Pp. 836-1096. [With an Alpha-
betical Index to Parts XXVII.-XXX.] 1864, 4s.

Part XXXI. Supplement. Pp. 1-321. 1864, 5s.

Part XXXII. ————— Part 2. Pp. 322-706.
1865, 5s.

Part XXXIII. ————— Part 3. Pp. 707-1120.
1865, 6s.

Part XXXIV. ————— Part 4. Pp. 1121-1533.
1865, 5s. 6d.

Part XXXV. ————— Part 5. Pp. 1534-2040.
[With an Alphabetical Index to Parts XXXI.-
XXXV.] 1866, 7s.

Neuropterous Insects.

Catalogue of the Specimens of Neuropterous Insects in the Collection of the British Museum. By Francis Walker. 12mo. :—

Part II. Sialidæ—Nemopterides. Pp. ii., 193–476. 1853, 3s. 6d.

Part III. Termitidæ—Ephemeridæ. Pp. ii., 477–585. 1853, 1s. 6d.

Catalogue of the Specimens of Neuropterous Insects in the Collection of the British Museum. By Dr. H. Hagen. Part I. Termitina. Pp. 34. 1858, 12mo. 6d.

Orthopterous Insects.

Catalogue of Orthopterous Insects in the Collection of the British Museum. Part I. Phasmidæ. By John Obadiah Westwood, F.L.S., &c. Pp. 195. 48 Plates. [With an Alphabetical Index.] 1859, 4to. 3l.

Catalogue of the Specimens of Blattariæ in the Collection of the British Museum. By Francis Walker, F.L.S., &c. Pp. 239. [With an Alphabetical Index.] 1868, 8vo. 5s. 6d.

Catalogue of the Specimens of Dermaptera Saltatoria [Part I.] and Supplement to the Blattariæ in the Collection of the British Museum. Gryllidæ. Blattariæ. Locustidæ. By Francis Walker, F.L.S., &c. Pp. 224. [With an Alphabetical Index.] 1869, 8vo. 5s.

Catalogue of the Specimens of Dermaptera Saltatoria in the Collection of the British Museum. By Francis Walker, F.L.S., &c.—

Part II. Locustidæ (continued). Pp. 225–423. [With an Alphabetical Index.] 1869, 8vo. 4s. 6d.

Part III. Locustidæ (continued).—Acrididæ. Pp. 425–604. [With an Alphabetical Index.] 1870, 8vo. 4s.

Part IV. Acrididæ (continued). Pp. 605–809. [With an Alphabetical Index.] 1870, 8vo. 6s.

Part V. Tettigidæ.—Supplement to the Catalogue of Blattariæ.—Supplement to the Catalogue of Dermaptera Saltatoria (with remarks on the Geographical Distribution of Dermaptera). Pp. 811–850; 43; 116. [With Alphabetical Indexes.] 1870, 8vo. 6s.

Hemipterous Insects.

Catalogue of the Specimens of Heteropterous Hemiptera in the Collection of the British Museum. By Francis Walker, F.L.S., &c. 8vo. :—

- Part I. Scutata. Pp. 240. 1867. 5s.
- Part II. Scutata (continued). Pp. 241–417. 1867. 4s.
- Part III. Pp. 418–599. [With an Alphabetical Index to Parts I., II., III., and a Summary of Geographical Distribution of the Species mentioned.] 1868. 4s. 6d.
- Part IV. Pp. 211. [With Alphabetical Index.] 1871. 6s.
- Part V. Pp. 202. [With Alphabetical Index.] 1872. 5s.
- Part VI. Pp. 210. [With Alphabetical Index.] 1873. 5s.
- Part VII. Pp. 213. [With Alphabetical Index.] 1873. 6s.
- Part VIII. Pp. 220. [With Alphabetical Index.] 1873. [6s. 6d.]

VERMES.

Catalogue of the Species of Entozoa, or Intestinal Worms, contained in the Collection of the British Museum. By Dr. Baird. Pp. iv., 132. 2 Plates. [With an Index of the Animals in which the Entozoa mentioned in the Catalogue are found, and an Index of Genera and Species.] 1853, 12mo. 2s.

ANTHOZOA.

Catalogue of Sea-pens or Pennatulariidæ in the Collection of the British Museum. By J. E. Gray, F.R.S., &c. Pp. iv., 40. 2 Woodcuts. 1870, 8vo. 1s. 6d.

Catalogue of Lithophytes or Stony Corals in the Collection of the British Museum. By J. E. Gray, F.R.S., &c. Pp. iv., 51. 14 Woodcuts. 1870, 8vo. 3s.

Catalogue of the Madreporarian Corals in the British Museum (Natural History) :—

Vol. I. The Genus Madrepora. By George Brook. Pp. xi., 212. 35 Collotype Plates. [With Systematic and Alphabetical Indexes, and Explanation of the Plates.] 1893, 4to. 1l. 4s.

Vol. II. The Genus Turbinaria; the Genus Astræopora. By Henry M. Bernard, M.A. Cantab., F.L.S., F.Z.S. Pp. iv., 106. 30 Collotype and 3 Lithographic Plates. [With Index of Generic and Specific Names, and Explanation of the Plates.] 1896, 4to. 18s.

Vol. III. The Genus *Montipora*; the Genus *Anacropora*. By Henry M. Bernard, M.A. Pp. vii., 192. 30 Collotype and 4 Lithographic Plates. [With Systematic Index, Index of Generic and Specific Names, and Explanation of the Plates.] 1897, 4to. 1*l.* 4*s.*

Vol. IV. The Family Poritidæ. I.—The Genus *Goniopora*. By Henry M. Bernard, M.A. Pp. viii., 206. 12 Collotype and 4 Lithographic Plates. [With Index of Generic and Specific Names, and Explanation of the Plates.] 1903, 4to. 1*l.*

BRITISH ANIMALS.

Catalogue of British Birds in the Collection of the British Museum. By George Robert Gray, F.L.S., F.Z.S., &c. Pp. xii., 248. [With a List of Species.] 1863, 8vo. 3*s.* 6*d.*

Catalogue of British Hymenoptera in the Collection of the British Museum. Second edition. Part. I. Andrenidæ and Apidæ. By Frederick Smith, M.E.S. New Issue. Pp. xi., 236. 11 Plates. [With Systematic and Alphabetical Indexes.] 1891, 8vo. 6*s.*

Catalogue of British Fossorial Hymenoptera, Formicidæ, and Vespidæ in the Collection of the British Museum. By Frederick Smith, V.P.E.S. Pp. 236. 6 Plates. [With an Alphabetical Index.] 1858, 12mo. 6*s.*

A Catalogue of the British Non-parasitical Worms in the Collection of the British Museum. By George Johnston, M.D., Edin., F.R.C.L., Ed., LL.D., Marischal Coll., Aberdeen, &c. Pp. 365. Woodcuts and 24 Plates. [With an Alphabetical Index.] 1865, 8vo. 7*s.*

Catalogue of the British Echinoderms in the British Museum (Natural History). By F. Jeffrey Bell, M.A. Pp. xvii., 202. Woodcuts and 16 Plates (2 Coloured). [With Table of Contents, Tables of Distribution, Alphabetical Index, Description of the Plates, &c.] 1892, 8vo. 12*s.* 6*d.*

List of the Specimens of British Animals in the Collection of the British Museum; with Synonyma and References to figures. 12mo.:—

Part V. Lepidoptera. By J. F. Stephens. 2nd Edition. Revised by H. T. Stainton and E. Shepherd. Pp. iv., 224. 1856. 1*s.* 9*d.*

Part VI. Hymenoptera. By F. Smith. Pp. 134. 1851. 2*s.*

Part VII. Mollusca, Acephala and Brachiopoda. By Dr. J. E. Gray. Pp. iv., 167. 1851. 3*s.* 6*d.*

- Part VIII. Fish. By Adam White. Pp. xxiii., 164.
(With Index and List of Donors.) 1851. 3s. 6d.
- Part IX. Eggs of British Birds. By George Robert Gray. Pp. 143. 1852. 2s. 6d.
- Part XI. Anoplura, or Parasitic Insects. By H. Denny. Pp. iv., 51. 1852. 1s.
- Part XII. Lepidoptera (continued). By James F. Stephens. Pp. iv., 54. 1852. 9d.
- Part XIII. Nomenclature of Hymenoptera. By Frederick Smith. Pp. iv., 74. 1853, 1s. 4d.
- Part XIV. Nomenclature of Neuroptera. By Adam White. Pp. iv., 16. 1853, 6d.
- Part XV. Nomenclature of Diptera, I. By Adam White. Pp. iv., 42. 1853. 1s.
- Part XVI. Lepidoptera (completed). By H. T. Stainton. Pp. 199. [With an Index.] 1854. 3s.
- Part XVII. Nomenclature of Anoplura, Euplexoptera, and Orthoptera. By Adam White. Pp. iv., 17. 1855. 6d.

PLANTS.

Illustrations of the Botany of Captain Cook's Voyage Round the World in H.M.S. "Endeavour" in 1768-71. By the Right Hon. Sir Joseph Banks, Bart., K.B., P.R.S., and Dr. Daniel Solander, F.R.S. With Determinations by James Britten, F.L.S., Senior Assistant, Department of Botany, British Museum :—

Part I.—Australian Plants. 101 Copper-plates [after paintings by F. P. Nodder], with 31 pages of descriptive text. 1900, fol. 25s.

Part II.—Australian Plants, Pt. II. 142 Copper-plates (pls. 101-243) [after paintings by F. P. Nodder, James Miller, J. F. Miller, and John Cleveley], with 41 pages of descriptive text (pp. 35-75). 1901, fol. 35s.

Catalogue of the African Plants collected by Dr. Friedrich Welwitsch in 1853-61 :—

Vol. I. Dicotyledons. By William Philip Hiern, M.A., F.L.S., &c. :—

Part I. [Ranunculaceæ to Rhizophoraceæ.] Pp. xxvi., 336. [With Portrait of Dr. Welwitsch. Introduction, Bibliography, and Index of Genera.] 1896, 8vo. 7s. 6d.

Part II. Combretaceæ to Rubiaceæ. Pp. 337-510.
[With Index of Genera.] 1898, 8vo. 4s.

Part III. Dipsacæ to Scrophulariaceæ. Pp. 511-784. [With Index of Genera.] 1898, 8vo. 5s.

Part IV. Lentibulariaceæ to Ceratophylleæ. Pp. 785-1035. [With Index.] 1900, 8vo. 5s.

Vol II. Monocotyledons, Gymnosperms, and Cryptogams :—

Part I. Monocotyledons and Gymnosperms. By Alfred Barton Rendle, M.A., D.Sc. F.L.S., Assistant, Department of Botany. Pp. 260. [With Index of Genera.] 1899, 8vo. 6s.

Part II. Cryptogamia. Pp. 261-566. [With Table of Errata, and General Index to the whole work.] 1901, 8vo. 6s.

Vascular Cryptogams	...	By	William Carruthers, F.R.S.
Mosses	Antony Gepp, M.A., F.L.S.
Hepatics	F. Stephani.
Marine Algæ	Ethel S. Barton.
Freshwater Algæ	W. West, F.L.S., and G. S. West, B.A.
Diatomaceæ	Thomas Comber, F.L.S.
Lichenes	E. A. Wainio.
Fungi	Annie Lorrain Smith.
Mycetozoa	Arthur Lister, F.R.S.

A Monograph of Lichens found in Britain : being a Descriptive Catalogue of the Species in the Herbarium of the British Museum. By the Rev. James M. Crombie, M.A., F.L.S., F.G.S., &c. Part I. Pp. viii., 519 : 74 Woodcuts. [With Glossary, Synopsis, Tabular Conspectus, and Index.] 1894, 8vo. 16s.

A Monograph of the Mycetozoa : being a Descriptive Catalogue of the Species in the Herbarium of the British Museum. By Arthur Lister, F.L.S. Pp. 224. 78 Plates and 51 Woodcuts. [With Synopsis of Genera and List of Species, and Index.] 1894, 8vo. 15s.

List of British Diatomaceæ in the Collection of the British Museum. By the Rev. W. Smith, F.L.S., &c. Pp. iv., 55. 1859, 12mo. 1s.

FOSSILS.

Catalogue of the Fossil Mammalia in the British Museum (Natural History). By Richard Lydekker, B.A., F.G.S. :—

Part I. Containing the Orders Primates, Chiroptera, Insectivora, Carnivora, and Rodentia. Pp. xxx., 268. 33 Woodcuts. [With Systematic and Alphabetical Indexes.] 1885, 8vo. 5s.

Part II. Containing the Order Ungulata, Suborder Artiodactyla. Pp. xxii., 324. 39 Woodcuts. [With Systematic and Alphabetical Indexes.] 1885, 8vo. 6s.

Part III. Containing the Order Ungulata, Suborders Perissodactyla, Toxodontia, Condylarthra, and Amblypoda. Pp. xvi., 186. 30 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1886, 8vo. 4s.

Part IV. Containing the Order Ungulata, Suborder Proboscidea. Pp. xxiv., 235. 32 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1886, 8vo. 5s.

Part V. Containing the Group Tillodontia, the Orders Sirenia, Cetacea, Edentata, Marsupialia, Monotremata, and Supplement. Pp. xxxv., 345. 55 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1887, 8vo. 6s.

Catalogue of the Fossil Birds in the British Museum (Natural History). By Richard Lydekker, B.A. Pp. xxvii., 368. 75 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1891, 8vo. 10s. 6d.

Catalogue of the Fossil Reptilia and Amphibia in the British Museum (Natural History). By Richard Lydekker, B.A., F.G.S. :—

Part I. Containing the Orders Ornithosauria, Crocodilia, Dinosauria, Squamata, Rhynchocephalia, and Proterosauria. Pp. xxviii., 309. 69 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1888, 8vo. 7s. 6d.

Part II. Containing the Orders Ichthyopterygia and Sauropterygia. Pp. xxi., 307. 85 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1889, 8vo. 7s. 6d.

Part III. Containing the Order Chelonia. Pp. xviii., 239. 53 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1889, 8vo. 7s. 6d.

Part IV. Containing the Orders Anomodontia, Ecaudata, Caudata, and Labyrinthodontia; and Supplement. Pp. xxiii., 295. 66 Woodcuts. [With Systematic Index, Alphabetical Index of Genera and Species, including Synonyms, and Alphabetical Index of Genera and Species to the entire work.] 1890, 8vo. 7s. 6d.

Catalogue of the Fossil Fishes in the British Museum (Natural History). By Arthur Smith Woodward, LL.D., F.R.S., F.G.S., &c. :—

Part I. Containing the Elasmobranchii. Pp. xvii., 474. 13 Woodcuts and 17 Plates. [With Alphabetical Index, and Systematic Index of Genera and Species.] 1889, 8vo. 21s.

Part II. Containing the Elasmobranchii (Acanthodii), Holocephali, Ichthyodorulites, Ostracodermi, Dipnoi, and Teleostomi (Crossopterygii and Chondrosteian Actinopterygii). Pp. xlv., 567. 58 Woodcuts and 16 Plates. [With Alphabetical Index, and Systematic Index of Genera and Species.] 1891, 8vo. 21s.

Part III. Containing the Actinopterygian Teleostomi of the Orders Chondrostei (concluded), Protospondyli, Aethospondyli, and Isospondyli (in part). Pp. xlii., 544. 45 Woodcuts and 18 Plates. [With Alphabetical Index, and Systematic Index of Genera and Species.] 1895, 8vo. 21s.

Part IV. Containing the Actinopterygian Teleostomi of the Suborders Isospondyli (in part), Ostariophysi, Apodes, Percesoces, Hemibranchii, Acanthopterygii, and Anacanthini. Pp. xxxix., 636. 22 Woodcuts and 19 Plates. [With Alphabetical Index, and Systematic Index of Genera and Species.] 1901, 8vo. 21s.

Systematic List of the Edwards Collection of British Oligocene and Eocene Mollusca in the British Museum (Natural History), with references to the type-specimens from similar horizons contained in other collections belonging to the Geological Department of the Museum. By Richard Bullen Newton, F.G.S. Pp. xxviii., 365. [With table of Families and Genera, Bibliography, Correlation-table, Appendix, and Alphabetical Index.] 1891, 8vo. 6s.

Catalogue of Tertiary Mollusca in the Department of Geology, British Museum (Natural History). Part I. The Australasian Tertiary Mollusca. By George F. Harris, F.G.S., &c. Pp. xxvi., 407. 8 Plates. [With Table of Families, Genera, and SubGenera, and Index.] 1897, 8vo. 10s.

Catalogue of the Fossil Cephalopoda in the British Museum (Natural History) :—

Part I. Containing part of the Suborder Nautiloidea, consisting of the families Orthoceratidæ, Endoceratidæ, Actinoceratidæ, Gomphoceratidæ, Ascoceratidæ, Poterioceratidæ, Cyrtoceratidæ, and Supplement. By Arthur H. Foord, F.G.S. Pp. xxxi., 344. 51 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1888, 8vo. 10s. 6d.

Part II. Containing the remainder of the Suborder Nautiloidea, consisting of the families Lituitidæ, Trochoceratidæ, Nautilidæ, and Supplement. By Arthur H. Foord, F.G.S. Pp. xxviii., 407. 86 Woodcuts. [With Systematic Index, and Alphabetical Index of Genera and Species, including Synonyms.] 1891, 8vo. 15s.

Part III. Containing the Bactritidæ, and part of the Suborder Ammonoidea. By Arthur H. Foord, Ph.D., F.G.S., and George Charles Crick, A.R.S.M., F.G.S. Pp. xxxiii., 303. 146 Woodcuts. [With Systematic Index of Genera and Species, and Alphabetical Index.] 1897, 8vo. 12s. 6d.

List of the Types and Figured Specimens of Fossil Cephalopoda in the British Museum (Natural History). By G. C. Crick, F.G.S. Pp. 103. [With Index.] 1898, 8vo. 2s. 6d.

A Catalogue of British Fossil Crustacea, with their Synonyms and the Range in Time of each Genus and Order. By Henry Woodward, F.R.S. Pp. xii., 155. [With an Alphabetical Index.] 1877, 8vo. 5s.

Catalogue of the Fossil Bryozoa in the Department of Geology, British Museum (Natural History):—

The Jurassic Bryozoa. By J. W. Gregory, D.Sc., F.G.S., F.Z.S. Pp. [viii.,] 239 : 22 Woodcuts and 11 Plates. [With List of Species and Distribution, Bibliography, Index, and Explanation of Plates.] 1896, 8vo. 10s.

The Cretaceous Bryozoa. Vol. I. By J. W. Gregory, D.Sc., F.G.S., F.Z.S. Pp. xiv., 457 : 64 Woodcuts and 17 Plates. [With Index and Explanation of Plates.] 1899, 8vo. 16s.

Catalogue of the Blastoidea in the Geological Department of the British Museum (Natural History), with an account of the morphology and systematic position of the group, and a revision of the genera and species. By Robert Etheridge, jun., of the Department of Geology, British Museum (Natural History), and P. Herbert Carpenter, D.Sc., F.R.S., F.L.S. (of Eton College). Pp. xv., 322. 20 Plates. [With Preface by Dr. H. Woodward, Table of Contents, General Index, Explanations of the Plates, &c.] 1886, 4to. 25s.

The Genera and Species of Blastoidea, with a List of the Specimens in the British Museum (Natural History). By F. A. Bather, M.A., F.G.S., of the Geological Department. Pp. x., 70. 1 Woodcut. 1899, 8vo. 3s.

Catalogue of the Palæozoic Plants in the Department of Geology and Palæontology, British Museum (Natural History). By Robert Kidston, F.G.S. Pp. viii., 288. [With a list of works quoted, and an Index.] 1886, 8vo. 5s.

Catalogue of the Mesozoic Plants in the Department of Geology, British Museum (Natural History). By A. C. Seward, M.A., F.R.S., F.G.S., University Lecturer in Botany and Fellow of Emanuel College, Cambridge:—

Part I. The Wealden Flora. Part I. Thallophyta—Pteridophyta. Pp. xxxviii., 179. 17 Woodcuts and 11 Plates. [With Preface by Dr. Woodward, Alphabetical Index, Explanations of the Plates, &c.] 1894, 8vo. 10s.

Part II. The Wealden Flora. Part II. Gymnospermæ. Pp. viii., 259. 9 Woodcuts and 20 Plates. [With Alphabetical Index, Explanations of the Plates, &c.] 1895, 8vo. 15s.

Part III. The Jurassic Flora. Part I. The Yorkshire Coast. Pp. xii., 341. 53 Woodcuts and 21 Plates. [With Preface by Dr. Woodward, Alphabetical Index Explanations of the Plates, &c.] 1900, 8vo. 20s.

GUIDE-BOOKS.

(To be obtained only at the Museum.)

A General Guide to the British Museum (Natural History) Cromwell Road, London, S.W. With 31 Woodcuts, 2 Plans, 2 views of the building, and an illustrated cover. Pp. 97. 1901, 8vo. 3d.

Guide to the Galleries of Mammalia in the Department of Zoology of the British Museum (Natural History). 7th Edition. Pp. 126. 65 Woodcuts and 4 Plans. Index. 1902, 8vo. 6d.

Guide to the Galleries of Reptiles and Fishes in the Department of Zoology of the British Museum (Natural History). 4th Edition. Pp. iv., 119. 101 Woodcuts. Index. 1898. 8vo. 6d. (*Out of print.*)

Guide to the Shell and Starfish Galleries (Mollusca, Polyzoa, Brachiopoda, Tunicata, Echinoderma, and Worms), Department of Zoology, British Museum (Natural History). New Edition. Pp. iv., 130. 125 Woodcuts, Plan, and Indexes. 1901, 8vo. 6d.

Guide to the Coral Gallery (Protozoa, Porifera or Sponges, Hydrozoa, and Anthozoa) in the Department of Zoology, British Museum (Natural History). Pp. [iv.,] 73. 82 Illustrations, Plan, and Index, 1902, 8vo. 1s.

A Guide to the Fossil Mammals and Birds in the Department of Geology and Palæontology in the British Museum (Natural History). 7th Edition. [By Henry Woodward.] Pp. xii., 103. 116 Woodcuts. [With List of Illustrations, Table of Stratified Rocks, and Index.] 1896, 8vo. 6d. (*Out of print.*)

A Guide to the Fossil Reptiles and Fishes in the Department of Geology and Palæontology in the British Museum (Natural History). [By Henry Woodward.] Pp. xiv., 129 : 165 Woodcuts. [With List of Illustrations, Table of Stratified Rocks, and Index.] 1896, 8vo. 6d.

A Guide to the Fossil Invertebrates and Plants in the Department of Geology and Palæontology in the British Museum (Natural History). [By Henry Woodward.] Pp. xvi., 158. 182 Woodcuts. [With List of Illustrations, Table of Stratified Rocks, Introduction, and Index.] 1897, 8vo. 1s.

The same, in two parts :—

Part I. Mollusca to Bryozoa. Pp. xii., 64. 107 Woodcuts. [With List of Illustrations, Table of Stratified Rocks, and Introduction.] 1897, 8vo. 6d.

Part II. Insecta to Plants, &c. Pp. ix., 64*—158. Woodcuts 108—182. [With List of Illustrations and Index to the two parts.] 1897, 8vo. 6d.

Guide to Sowerby's Models of British Fungi in the Department of Botany, British Museum (Natural History). By Worthington G. Smith, F.L.S. Pp. 82. 93 Woodcuts. With Table of Diagnostic Characters, and Index. [Second Edition.] 1898, 8vo. 4d.
